**Altering Nature** B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-11-01 B Andrew Lustig Baruch A Brody and Gerald P McKenny In this second volume of the *Altering Nature* project we situate specific religious and policy discussions of four broad areas of biotechnology within the context of our interdisciplinary research on concepts of nature and the natural in the first volume *Altering Nature Concepts of Nature and the Natural in Biotechnology Debates* In the first volume we invited five groups of scholars to explore the diverse conceptions of nature and the natural that shape moral judgments about human alterations of nature as especially exemplified by recent developments in biotechnology A careful reading of such developments reveals that assessments of them whether positive or

negative are often informed by different conceptual interpretations of nature and the natural with differing implications for judgments about the appropriateness of particular alterations of nature. These varying interpretations of nature and the natural often result from the distinctive perspectives that characterize various scholarly disciplines. Therefore, in an effort to explore the variety of meanings that attend discussions of the concepts of nature and the natural, the contributors to the first volume of *Altering Nature* addressed those concepts from five different disciplinary vantages. A first group of scholars analyzed a range of religious and spiritual perspectives on concepts of nature and the natural. Their research highlighted the thematic historical and methodological touchstones in those traditions that shape their perspectives on nature. *Judaism in Motion* Sibylle Lustenberger, 2020-11-17 In Israel, where the Orthodox rabbinate wields historically sanctioned influence over the legal definitions of marriage and parenthood, same-sex parenthood raises important questions such as what constitutes belonging to the national collective, who has the authority to define the norms of reproduction, and where the boundaries of Orthodox Judaism begin and end. *Judaism in Motion* addresses these questions from a transgenerational perspective that pays heed to how religiously informed rules, norms, and practices of transferring material properties, names, and societal belonging are adopted and transformed. It presents a detailed ethnographic account of the dynamic interaction between kinship, religion, and the state that complicates the commonly held assumption that places same-sex parenthood in a radically secular sphere that stands in stark opposition to Orthodox Judaism. Taking same-sex parenthood as a prism through which society at large is reflected, this volume further explores how transformations of societal structures take place and what flexibility and leeway exist in organized religions. *American Jewish Loss after the Holocaust* Laura Levitt, 2007-11-01 Many of us belong to communities that have been scarred by terrible calamities. And many of us come from families that have suffered grievous losses. How we reflect on these legacies of loss and the ways they inform each other are the questions Laura Levitt takes up in this provocative and passionate book. An American Jew whose family was not directly affected by the Holocaust, Levitt grapples with the challenges of contending with ordinary Jewish loss. She suggests that although the memory of the Holocaust may seem to overshadow all other kinds of loss for American Jews, it can also open up possibilities for engaging these more personal and everyday legacies. Weaving in discussions of her own family stories and writing in a manner that is both deeply personal and erudite, Levitt shows what happens when public and private losses are seen next to each other and what happens when difficult works of art or commemoration, such as museum exhibits or films, are seen alongside ordinary family stories about more intimate losses. In so doing, she illuminates how, through these ordinary stories, we may create an alternative model for confronting Holocaust memory in Jewish culture. *Quasi Person* Pnina Lifshitz-Avram, 2024-02-09 This book delves into the controversial subject of late-term abortions, particularly those occurring after 24 weeks of gestation. It emphasizes that the abortion debate is multifaceted, involving ethical, legal, medical, and philosophical aspects. Different countries have diverse policies on abortion, from strict prohibitions to more permissive approaches. Recent legal

developments in the United States exemplified by the *Dobbs v Jackson Women's Health Organization* case overturning *Roe v Wade* have stirred significant legal political and public upheaval surrounding abortion rights. Advancements in medical technology have enabled early detection of fetal defects forcing expectant mothers to make complex decisions regarding continuing a pregnancy with potential health challenges for the child or opting for termination. The book introduces the concept of viewing the fetus as a quasi person with the right to be born and enjoy good health especially after the 24th week of pregnancy. It aims to strike a balance between women's autonomy and fetal rights considering advances in fetal therapy. Employing a multidisciplinary approach drawing insights from law philosophy ethics medicine psychology and public policy the book seeks to reconcile the rights of women and fetuses. It unequivocally supports protecting the right to life for viable fetuses justifying this stance through historical context advancements in fetal therapy and ethical considerations related to women's autonomy and fetal rights. In summary this book provides a thorough examination of abortions performed after 24 weeks of gestation exploring the ethical legal medical and philosophical dimensions while advocating for the preservation of the right to life for viable fetuses.
