Reptile Quarterly Giant Snakes:

Land Managers Guide to the Amphibians and Reptiles of the South Lawrence A. Wilson, 1995 The Snakes of Trinidad and Tobago Hans E. A. Boos, 2001 Scientific fact meets island folklore as Hans Boos presents more than sixty species of snakes found in the twin island independent Caribbean nation of Trinidad and Tobago The culmination of thirty years of collecting and observing the snakes of these islands The Snakes of Trinidad and Tobago engagingly informs readers about these often feared and misunderstood creatures Tracing the contributions of scientists to the evolving taxonomy of the islands reptiles Boos describes each unique species of snake found on the two islands including local names from two centuries back Species accounts come complete with tales both documented and apocryphal of human encounters with the more dangerous island snakes Forty eight color photographs and fifty black and white photographs and pieces of line art most by the author illustrate the text and aid in identification While tiny Tobago is mercifully devoid of poisonous snakes Trinidad hosts four venomous species including coral snakes and the notorious bushmaster Boos refutes many of the myths about these deadly but usually nonaggressive snakes with information about their habits and behavior He also writes about the giant anaconda and the boa constrictor about which many half truths and fictions abound All snakes bite but only a few species are venomous Boos gives information about what to do and what not to do in the event of a bite and discusses intriguing folk medicine cures such as the Belgian Black Stone sure to work only if a bite was harmless to begin with The Snakes of Trinidad and Tobago will find an enthusiastic audience among herpetologists ecologists and other scientists concerned about the snakes and wildlife of Trinidad and Tobago the Caribbean and South America It will also appeal to general readers interested in snakes and in Caribbean folklore **The Story of the Amphibians and the Reptiles** James Newton Baskett, Raymond Lee Ditmars, 1902 Giant Reptiles Sherman A. Shoe and Leather Reporter ,1928 **Current Literature** ,1896 **Youth's Companion** ,1903 The New Wild Fred Pearce,2016-04-05 Named one of the best books of 2015 by The Economist A provocative exploration of the new ecology and why most of what we think we know about alien species is wrong For a long time veteran environmental journalist Fred Pearce thought in stark terms about invasive species they were the evil interlopers spoiling pristine natural ecosystems Most conservationists and environmentalists share this view But what if the traditional view of ecology is wrong what if true environmentalists should be applauding the invaders In *The New Wild* Pearce goes on a journey across six continents to rediscover what conservation in the twenty first century should be about Pearce explores ecosystems from remote Pacific islands to the United Kingdom from San Francisco Bay to the Great Lakes as he digs into questionable estimates of the cost of invader species and reveals the outdated intellectual sources of our ideas about the balance of nature Pearce acknowledges that there are horror stories about alien species disrupting ecosystems but most of the time the tens of thousands of introduced species usually swiftly die out or settle down and become model eco citizens The case for keeping out alien species he finds looks increasingly flawed As Pearce argues mainstream environmentalists are right that we need a rewilding of the earth but they are wrong if they imagine that we can achieve that by reengineering ecosystems Humans have changed the planet too much and nature never goes backward But a growing group of scientists is taking a fresh look at how species interact in the wild According to these new ecologists we should applaud the dynamism of alien species and the novel ecosystems they create In an era of climate change and widespread ecological damage it is absolutely crucial that we find ways to help nature regenerate Embracing the new ecology Pearce shows us is our best chance To be an environmentalist in the twenty first century means celebrating nature s wildness and capacity for change **Chambers's Journal of Popular Literature, Science and Arts** ,1862 **Cincinnati Zoo Guide** ,1928 **Reptiles Round the World** ,1957 **Snakes** John Netherton, *Voyageur* Naturally is your one stop resource for books about nature and country sports We have one of the largest selections available for both adult and young adult and readers Zoos and aquariums natural history museums gift shops sporting book retailers and other booksellers all appreciate the depth and quality of our series and our commitment to providing up to date information from leading naturalists and scientists
