Standing Together In Troubled Times: Unpublished Letters Of Pauli, Einstein, Franck And Others Misha Shifman, 2017-01-16. This captivating book is a story of the friendship between a genius physicist Wolfgang Pauli and Charlotte Houtermans whose career in physics was not as glamorous. They met in the late 1920s in Germany at the very onset of the quantum era and personally knew all the major players in the emergent quantum world that was very much part of central Europe: Germany, Austria, Hungary, Denmark, and Switzerland. And Charlotte was a student at Göttingen that was right at the heart. Caught between two evils: Soviet Communism and German National Socialism, she would have probably perished if it were not for the brotherhood of physicists: Niels Bohr, Wolfgang Pauli, Albert Einstein, James Franck, Max Born, Robert Oppenheimer, and many other noted scientists who tried to save friends and colleagues, either leftist sympathizers or Jews who were in mortal danger of being entrapped in a simmering pre-WWII Europe. Using newly discovered documents from the Houtermans family archive, twenty-three Pauli's letters to Charlotte Houtermans, her correspondence with other great physicists, Charlotte's diaries, interviews with her children, almost all documents presented in this book are published for the first time.

The Private Lives of Albert Einstein Roger Highfield, Paul Carter, 1994-03-15 This controversial account of Albert Einstein's scandalous personal life challenges the image of this genius, painting a shocking portrait that exposes him as an adulterous, egomaniacal misogynist who may have even beaten his first wife. *The New York Times Sunday Magazine Photos*

Einstein's Theories of Relativity Alan Q. Morton, 2006 Explores Albert Einstein's career, private life, development of two main sets of theories: special and general relativity, and position on nuclear weapons.

Saving Science from Quantum Mechanics Emily Adlam, 2025-07-25 The quantum measurement problem refers to a collection of unresolved questions about what happens during the measurement of a quantum system. The measurement problem must be solved in order for us to understand what kind of underlying reality could be compatible with the mathematical formalism of quantum mechanics. The existing literature on the measurement problem typically views the problem through the lens of ontology and metaphysics. Adlam reconceptualizes the quantum measurement problem as a problem of epistemology, and in doing so, presents a novel perspective on the issue, offering a new approach to finding valid solutions. Once we understand the importance of epistemology to the measurement problem, it becomes clear that several popular proposals have epistemic flaws which threaten their viability as solutions. This reframing helps clear the field so we can see where future research should be focused. *Saving Science from Quantum Mechanics* delves into the subtle relationship between physics and epistemology, exploring how they constrain and inspire each other. It will use the measurement problem to motivate a wide-ranging account of the epistemology of science and to highlight the role of coherence in justifying the use of measurements and observations in the scientific process.

Getting Started with Salesforce Einstein Analytics Johan Yu, 2019-09-11 Build interactive dashboards using Salesforce Einstein Analytics. Explore all of your data quickly and easily by providing AI-powered advanced analytics right in Salesforce. You will manage datasets, query data with Salesforce Analytics Query Language (SAQL), and customize dashboards. Because Einstein Analytics is new, the curve to learn this technology can be difficult. This book guides you step by step in simple, easy-to-understand terms to get data from the Salesforce platform to the Einstein Analytics platform and also shows you how to import external data, e.g., CSV files. Core chapters focus on understanding data sources, dataflow, dataset, and lens, leading up to building dashboards from scratch. Advanced features such as data transformation using `computeExpression` and `computeRelative`, as well as dataflow with a multi-value lookup, are explored. What You Will
