

Leisure and Later Life: Past, Present and Future

HEATHER J. GIBSON

Department of Tourism, Recreation and Sport Management, University of Florida, USA

As the first of the Baby Boom Generation sit on the cusp of late adulthood and possibly retirement, it is an opportune time to reflect on what we know and what we should know about leisure in later life. To help me with this task I conducted an informal discussion forum via email with a group of researchers from Canada and the US who work in the area of leisure and aging. While much of this discussion has a North American focus, the content and suggestions for future action can be applied more universally.

During the early days of leisure studies, leisure and aging garnered a lot of attention, particularly in North America (notable exceptions include Parker, 1982; Long, 1987). Much of this work demonstrated through survey-based research that there is a link between leisure and later life satisfaction (e.g. Havighurst, 1961; Ragheb & Griffith, 1982; Riddick, 1985; Romsa *et al.*, 1985; Kelly, 1987; Kelly *et al.*, 1987; Russell, 1987). Nonetheless, while the findings of this era are still relevant today, many of us feel that it is time to move beyond activity theory (Hendricks & Hendricks, 1981), disengagement theory (Cumming & Henry, 1961) and continuity theory (Atchley, 1977) that framed much of this work. The question now arises, where do we go next?

Over the years, many scholars have attempted to raise the profile of our work among mainstream gerontologists. One of the obstacles to this is not necessarily the lack of respect that leisure as a concept garners from gerontologists, but the ways in which we conceptualize and operationalize leisure differently. While we may argue that leisure is more than activity, gerontologists consistently study the relationship between activity and later life well-being. They generally find that meaningful activity is beneficial in later life and they reconfirm the tenets of activity theory, thereby not moving the body of knowledge further than we did in the 1970s. However, because they view leisure in a way that is less nebulous than we
