Research Advances in Alcohol and Drug Problems H.M. Annis, H.D. Cappell, F.B. Glaser, L.T. Kozlowski, M.S. Goodstadt, 1990-01-31 This is the tenth volume in the Research Advances series and the seventh published by Plenum Press Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol illicit drugs and tobacco We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution Two of the chapters are decidedly longer than the others very long chapters have appeared occasionally in the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews Again the editorial board has changed After several years of service Reginald G Smart has stepped down New to the board are Helen M Annis Michael S Goodstadt Lynn T Kozlowski and Evelyn R Vingilis This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies Rutgers University The Pharmacology of Alcohol Abuse Henry R. Kranzler, 2012-12-06 In recent years alcohol abuse has received increased international attention Such attention is justified by the enormous negative impact that this disorder has on health as well as on economic and social well being Governmental and other sources of research support have promoted substantial investigation into the negative consequences of alcohol examining both animal models and human subjects Consequently there has been a virtual explosion of preclinical and clinical data much of it focused on alcohol's pharmacologic effects However there have been few efforts to integrate this wealth of new information into a single manageable volume This volume provides an up to date in depth treatment of the pharmacology of alcohol particularly as it relates to alcohol abuse The overriding theme of the book is the interplay between the preclinical and clinical domains Increasingly these areas of investigation have served to inform one another a trend that can be expected to grow with time The topics covered include the effects of alcohol on biological systems and the impact of medications on those effects In addition recent insights obtained from molecular biological investigations are discussed in terms of their relevance for understanding the effects of alcohol at the cellular level and the implications of these for the development of medications Consideration is also given to important methodological issues that influence the evaluation of medications in the context of clinical trials **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1971 **Monthly Catalogue, United States Public Documents** ,1990 **Monthly Catalog of United**

Van Hasselt,2013-11-22 Over the last two decades the number of persons over 65 has increased by 65% Handbook of Clinical Geropsychology focuses attention on how the contributions of clinical psychology address the problems faced by this enormous population In the first part chapters cover a historical perspective clinical geropsychology and U S federal policy psychodynamic issues and other key topics Part II details assessment and treatment for a wide range of disorders affecting the elderly Part III considers such special issues as family caregiving minority issues physical activity and elder abuse and neglect *Alcohol Research & Health* ,2006 Subject Guide to Books in Print ,1997 Drugs, Alcohol, and Social Problems James D.
