Shim,2014 Heart disease the leading cause of death in the United States affects people from all walks of life yet who lives and who dies from heart disease still depends on race class and gender While scientists and clinicians understand and treat heart disease more effectively than ever before and industrialized countries have made substantial investments in research and treatment over the past six decades patterns of inequality persist Ina Heart Sick Janet K Shim argues that official accounts of cardiovascular health inequalities are unconvincing and inadequate and that clinical and public health interventions grounded in these accounts ignore many critical causes of those inequalities a Examining the routine activities of epidemiologyOCogrant applications data collection representations of research findings and post publication discussions of the interpretations and implications of study resultsOCoShim shows how social differences of race social class and gender are upheld by the scientific community She argues that such sites of expert knowledge routinely yet often invisibly make claims about how biological and cultural differences matterOCoclaims that differ substantially from the lived experiences of individuals who themselves suffer from health problems Based on firsthand research at epidemiologic conferences conversations with epidemiologists and in depth interviews with people of color who live with heart disease Shim explores how both scientists

Research for Social Workers Margaret Alston,Wendy Bowles,2019-09-11 Social work is developing its own research orientation and knowledge base springing from the research traditions of sociology and psychology and grounded in human rights and social justice Effective social research relies on critical thinking and the ability to view situations from new perspectives It is relevant to every area of social work practice from the initial stages of an intervention to planning a course of action and finally evaluating practice Research for Social Workers is an accessible introduction to the research methods most commonly used in social work and social welfare The major stages of research projects are outlined step by step including analysing results and reporting It is written in non technical language for students and practitioners without a strong maths background Illustrated with examples from across the world this book captures the realities of social work research in a wide range of settings End of chapter exercises and questions make this an ideal introduction to research methods This third edition is fully revised and updated It includes new chapters on systematic reviews and research in crisis situations as well as more substantial coverage of statistics      *Suing for Medical Malpractice* Frank A. Sloan,1993-09-15 Medical malpractice suits today can result in multi million dollar settlements and a practicing physician can pay 100 000 or more annually for malpractice insurance Some complain that lawyers and plaintiffs are overcompensated by exorbitant judgments that add to the rising cost of health care But there has been very little evidence to show whether these arguments are true In this timely work six experts in health policy law and medicine study nearly 200 malpractice claims to show that contrary to popular perceptions victims of malpractice are not overcompensated and our legal system for dealing with malpractice claims is not defective The authors survey claims filed in Florida between 1986 and 1989 by people who suffered permanent injury or death during birth or during treatment in an emergency room How often did illegitimate claims result in financial awards What was the relation between the injury and the amount the patient lost economically How much did the plaintiffs actually recover How did the claimants choose their lawyers and what kind of relationship did they have Contrary to common perceptions in the majority of cases the claims were merited and the authors found that claimants were on average substantially undercompensated only about one fifth of plaintiffs recovered more than their economic loss caused by injury or death The evidence in this book suggests that placing dollar limits on malpractice cases is unjustified and that our tort system is not so faulty after all      *ECIE 2016 11th European Conference on Innovation and Entrepreneurship* Minna Tunkkari Eskelinen,Iiris Aaltio,2016      **Evidence on the gendered impacts of extended school closures** UNESCO,2022-03-18
