Data Mining: Foundations and Practice Tsau Young Lin,Ying Xie,Anita Wasilewska,Churn-Jung Liau,2008-08-20 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions

We feel that the papers presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners

To express the visions forged in the workshops to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes studies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book

Analysis of Correlated Data with SAS and R Mohamed M.

Shoukri, 2018-04-27 Analysis of Correlated Data with SAS and R 4th edition presents an applied treatment of recently developed statistical models and methods for the analysis of hierarchical binary count and continuous response data It explains how to use procedures in SAS and packages in R for exploring data fitting appropriate models presenting programming codes and results The book is designed for senior undergraduate and graduate students in the health sciences epidemiology statistics and biostatistics as well as clinical researchers and consulting statisticians who can apply the methods with their own data analyses In each chapter a brief description of the foundations of statistical theory needed to understand the methods is given thereafter the author illustrates the applicability of the techniques by providing sufficient number of examples The last three chapters of the 4th edition contain introductory material on propensity score analysis meta analysis and the treatment of missing data using SAS and R These topics were not covered in previous editions The main reason is that there is an increasing demand by clinical researchers to have these topics covered at a reasonably understandable level of complexity Mohamed Shoukri is principal scientist and professor of biostatistics at The National Biotechnology Center King Faisal Specialist Hospital and Research Center and Al Faisal University Saudi Arabia Professor Shoukri's research includes analytic epidemiology analysis of hierarchical data and clinical biostatistics He is an associate editor of the 3Biotech journal a Fellow of the Royal Statistical Society and an elected member of the International Statistical Institute
