Supporting Research Writing Valerie Matarese, 2012-11-06 Supporting Research Writing explores the range of services designed to facilitate academic writing and publication in English by non native English speaking NNES authors It analyses the realities of offering services such as education translation editing and writing and then considers the challenges and benefits that result when these boundaries are consciously blurred It thus provides an opportunity for readers to reflect on their professional roles and the services that will best serve their clients needs A recurring theme is therefore the interaction between language professional and client author The book offers insights into the opportunities and challenges presented by considering ourselves first and foremost as writing support professionals differing in our primary approach through teaching translating editing writing or a combination of those but with a common goal This view has major

consequences for the training of professionals who support English language publication by NNES academics and scientists Supporting Research Writing will therefore be a stimulus to professional development for those who support English language publication in real life contexts and an important resource for those entering the profession Takes a holistic approach to writing support and reveals how it is best conceived as a spectrum of overlapping and interrelated professional activities Stresses the importance of understanding the real world needs of authors in their quest to publish Provides insights into the approaches used by experienced practitioners across Europe

Multimodal Composing and Writing Transfer Kara Poe Alexander, Matthew Davis, Lilian W. Mina, Ryan P. Shepherd, 2024-02-15

Multimodal Composing and Writing Transfer explores transfer across various contexts of multimodal composing extending the early conversations connecting multimodality to writing Contributors address how writing transfer theories intersect with multimodal composing and present methods for facilitating transfer across modes and media offering insight into how writers can learn to compose when they encounter familiar modes in new contexts Over the past two decades the concepts of multimodal composing and writing transfer have grown and reshaped the nature of writing studies but rarely have the ways in which these areas overlap been studied This collection shows how this shift in writing studies has been mutually informative covering a wider range of contexts for multimodality and writing transfer than just in first year composition courses It places composition teaching practices and multimodal research in conversation with learning transfer theory to provide an in depth examination of how they influence one another Multimodal Composing and Writing Transfer develops these intersections to connect multimodal composition and writing practices across a wide array of fields and contexts Scholars across disciplines postsecondary writing teachers writing program administrators writing center directors and graduate students will find this collection indispensable

The Function of Theory in Composition Studies

Raul Sanchez, 2012-02-01 How can theory improve our knowledge of writing Raul Sanchez answers this question by examining dominant theoretical trends in composition studies over the last fifteen years citing their common origins in a narrow representational metatheory of writing He argues that this adherence actually leads the field away from its objects of study writing and the writing subject Through this extended critique he elaborates an alternative metatheory one that restores writing to the conceptual center of composition studies by emphasizing its generative rather than its representational characteristics particularly in increasingly networked and textualized cultures

The Politics of Writing Studies Robert Samuels, 2017-09-07 A friendly critique of the field The Politics of Writing Studies examines a set of recent pivotal texts in composition to show how writing scholarship in an effort to improve disciplinary prestige and garner institutional resources inadvertently reproduces structures of inequality within American higher education Not only does this enable the exploitation of contingent faculty but it also puts writing studies a field that inherently challenges many institutional hierarchies in a debased institutional position and at odds with itself Instead of aligning with the dominant paradigm of research universities where research is privileged over teaching theory over practice the sciences over the humanities and graduate education over undergraduate writing studies should conceive itself in terms more often associated with labor By identifying more profoundly as workers as a collective in solidarity with contingent faculty writing professionals can achieve solutions to the material problems that the field in its best moments wants to address Ultimately the change compositionists want to see in the university will not come from high theory or the social science research agenda it must come from below Offering new insight into a complex issue The Politics of Writing Studies will be of great interest to writing studies professionals university administrators and anyone interested in the political economy of education and the reform of institutions of higher education in America
