Nørskov,J. Seibt,O.S. Quick,2021-01-04 The subject of social robotics has enormous projected economic significance However social robots not only present us with novel opportunities but also with novel risks that go far beyond safety issues It is a potentially highly disruptive technology which could negatively affect the most valuable parts of the fabric of human social interactions in irreparable ways Since engineering educations do not yet offer the necessary competences to analyze holistically assess and constructively mitigate these risks new alliances must be established between engineering and SSH disciplines with special emphasis on the humanities i e disciplines specializing in the analysis of socio cultural interactions and human experience The Robophilosophy Conference Series was established in 2014 with the purpose of creating a new forum and catalyzing the research discussion in this important area of applied humanities research with focus on robophilosophy Robophilosophy conferences have been the world s largest venues for humanities research in and on social robotics The book at hand presents the proceedings of Robophilosophy Conference 2020 Culturally Sustainable Social Robotics the fourth event in the

international biennial Robophilosophy Conference Series which brought together close to 400 participants from 29 countries. The speakers of the conference whose contributions are collected in this volume were invited to offer concrete proposals for how the Humanities can help to shape a future where social robotics is guided by the goals of enhancing socio cultural values rather than by utility alone. The book is divided into 3 parts: Abstracts of Plenaries which contains 6 plenary sessions; Session Papers with 44 papers under 8 thematic categories; and Workshops containing 25 items on 5 selected topics. Providing concrete proposals from philosophers and other SSH researchers for new models and methods, this book will be of interest to all those involved in developing artificial social agents in a culturally sustainable way that is also a fortiori ethically responsible.

Action Research in Criminal Justice Inge Vanfraechem, Ivo Aertsen, 2017-09-14. To understand how people experience justice and security is a challenging task in times of unrest marked by growing perceptions of insecurity, discrimination and uncertainty. The European project ALTERNATIVE aimed to understand justice and security experiences related to conflicts in intercultural settings when citizens are given the means to actively contribute to these processes. This book relates how the project was set up as an action research through the concrete description of four action sites: social housing estates in Vienna, Austria; a small community in Hungary with a Roma population; three border towns in Serbia; and three communities in Northern Ireland. These four sites have been compared through an innovative methodology which leads to a deeper understanding of the impact of participatory and restorative justice oriented processes and in a more general way of what action research may entail in the criminological field. Bringing together researchers and case studies from around Europe, this book examines the scientific potential of action research as a methodology in criminal justice settings. This book is one of two volumes resulting from the work by a group of researchers in six European countries having cooperated intensively during four years in ALTERNATIVE, an action research project funded under the EU Seventh Framework Programme.

The Demonstration Society Claude Rosental, 2021-10-12. Today as in the past, public demonstrations are not only tools to prove, persuade and promote but also fundamental forms of social interaction and exchange. YouTube demos of makeup products by famous influencers, demonstrations of strength during street protests, demonstrations of military might in North Korea: public demonstrations are omnipresent in social life. Yet they are often perceived as isolated events unworthy of systematic examination. In *The Demonstration Society*, Claude Rosental explores the underlying dynamics of what he calls a demonstration society. He shows how both in today's world and historically, public demonstrations constitute not only tools to prove, persuade and promote but fundamental forms of interaction and exchange and in some cases attempts to lead the world. Rosental compares demos with other forms of public demonstrations, drawing out both their peculiarities and common features. He analyzes the processes through which demonstrations are conceived and carried out as well as the skills of their producers. He also compares contemporary demos with historical demonstrations including theaters of machines in the Renaissance, public demonstrations of natural philosophy in the seventeenth century.

and demonstrations of the magic lantern in the nineteenth century Above and beyond the entertainment they sometimes provide demonstrations are experienced as intense moments that broadly involve alliances material and symbolic goods and more generally the future of individuals and collectives Rosental elucidates the many ways in which we live today as in the past in a society of demonstration Hazardous Substances & Public Health ,1996 **Dog Behavior** James C.
