Third Series** Library of Congress. Copyright Office,1967 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December      [The Young Researchers Conference on Cultural Policy and Cultural Diplomacy 21-22 August 2020](#) Assoc. Prof. Dr. Serhan ADA, We were in the mids of 2019 when we decided to organize a young researchers conference as the most important transnational event subsequent to the inauguration of the UNESCO Chair of Culture Policy and Cultural Diplomacy of Istanbul Bilgi University established in 2018 held together with the chairs working in the same field While deciding on the method content and form of participation of the conference we consulted with UNESCO chairs with which we have been in cooperation for a long time As a result we decided to invite

young researchers who are in the early stages of their academic career irrespective of their age and who have had their master's degree and/or conducting doctoral studies. Our purpose was to ensure that they would start a dialogue with their colleagues in similar statuses and benefit from the comments of reviewers having experience in the profession through the assessment of their presentations. We wished the conference that we planned to last two days to address the main themes of cultural policy. Hence we projected holding of five sessions on the themes of Culture as Agent in International Relations, Managing and Sharing Cultural Heritage, Cities, New Actors of Cultural Policy, Cultural Industries, Film as a Case, and Culture and Arts in all Their Forms. Our call for applications has been welcomed with considerable interest. At that time another thing happened as well. We wanted those young researchers would meet face to face, get to know each other and exchange their views outside of the conference. However, the pandemic broke out and we were faced with the choices of postponing the conference or acknowledging to hold it online due to travel prohibitions and lockdowns. As a result, the second alternative prevailed to maintain the excitement of the studies of the researchers. Our conference was held online while Covid 19 was reigning with all its severity on 21-22 August 2020. At the conference, papers of a total of eighteen researchers in charge at universities or working professionally in the sector in four continents took place. The fact that almost all of the researchers included the original features of the practice which emerged from the theoretical literature in different subfields of cultural policy but which they followed closely or were a part of directly in their analyses was attention-inviting. At the same time it was possible to see in the presentations the traces of the mostly negative impacts of the international political environment which continues with tensions, hot or cold conflicts and inequalities in addition to the oppressive political environment prevailing in the countries of today on cultural policy. On the other hand, the lack of presentation and discussion of enough examples concerning cultural policies at the city scale was noteworthy. However, the quest of the young ones working in these disciplines for new concepts and different methodological approaches was extremely clear.

*Political Science Research in the Middle East and North Africa* Janine A. Clark, Francesco Cavatorta, 2018-07-20. In conducting political science research today, one's methodology is of paramount concern. Yet despite the obvious chasm between theory and practice that all scholars experience in the field, there are no specific guidebooks on meeting the methodological and ethical challenges that fieldwork presents. *Political Science Research in the Middle East and North Africa* helps fill this vacuum, focusing specifically on doing research in one of the most important regions in contemporary world politics. Janine A. Clark and Francesco Cavatorta have gathered together a large and diverse group of researchers who study the region and focus on methodological lessons learned from their first-hand experiences of employing a variety of research methods while conducting fieldwork. The contributors also look at the challenges of conducting field research in a variety of contexts such as in areas of violence and using research methods such as interviewing and ethnography. This volume will therefore be an invaluable companion book to more standard methods books and a useful tool not just for Middle East scholars but for all

Scientific Freedom Donald W. Braben, 2020-09-10

A radical and timely proposal for reinvigorating transformative scientific discovery So rich was the scientific harvest of the early 20th century that it transformed entire industries and economies Max Planck laid the foundation for quantum physics Barbara McClintock for modern genetics Linus Pauling for chemistry the list goes on In the 1970s the nature of scientific work started to change Increases in public funding for scientific research brought demands that spending be justified a system of peer review that selected only the research proposals promising the greatest returns and a push for endless short term miracles instead of in depth boundary pushing research A vicious spiral of decline began In Scientific Freedom Donald W Braben presents a framework to find and support cutting edge much needed scientific innovation Braben who led British Petroleum's Venture Research initiative which aimed to identify and aid researchers challenging current scientific thinking explains The conditions that catalyzed scientific research in the early 20th century The costs to society of our current research model The changing role of the university as a research institution How BP's Venture Research initiative succeeded by minimizing bureaucracy and peer review and the program's impact The selection budget and organizational criteria for implementing a Venture Research program today Even in the earliest stages transformative and groundbreaking research can look unrecognizable to those who are accustomed to the patterns established by the past Support for this research can in fact be low risk and offer rich rewards but it requires rethinking the processes used to discover and sponsor scientists with groundbreaking ideas and then giving those innovators the freedom to explore First published in 2008 this new edition of Scientific Freedom includes over 30 redesigned charts and figures and a new foreword by Donald Braben AEC
