politics of representation critical geopolitics considers the ways in which the use of particular discourses shape political practices Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As critical geopolitics has become a more established part of political geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics

*Health Systems Resilience Index: A Sub-National Analysis of India's COVID-19 Response* Debosmita Sarkar, Soumya Bhowmick, Renita D'Souza, Oommen C. Kurian, 2022-07-22 India's COVID 19 battle will be told and retold in the coming years inspiring both praise for what the country has achieved and critique for its shortfalls As India's story continues to unfold two strands will mould the various assessments First is India's aggregate performance as a developing economy It marshalled its meagre resources to respond to the exponential threat of the virus and was determined too to be part of global solutions to this scourge such as the manufacture and supply of life saving vaccines The second and perhaps even more important story is on ground zero In its cities and villages India's success or failure would be a factor of the leadership and stewardship of Prime Minister Narendra Modi and his team in responding to the crisis and the commitment of the chief ministers and state functionaries to beef up their health systems and save lives

Whichever way the India story is told there are certain truths that cannot be hidden We need to invest more in our health systems and acknowledge the stellar role of our frontline workers and formal and informal health sector personnel as well as India's prowess in certain segments of the medical and health industry In this context it becomes interesting to see how in the country's federal structure where health is a State subject the sub national units i.e states and union territories UTs have performed The present work Health Systems Resilience Index A Sub National Analysis of India's COVID 19 Response provides answers to that question It builds on an earlier report published by the Observer Research Foundation in May 2020 That report State of the States Two Months of the Pandemic evaluated India's initial response to the pandemic shortly after the crisis was officially named by the World Health Organization WHO Two years since then this report attempts a more ambitious goal to devise a unique Resilience Index for the health systems of India's states and UTs
