In the foreground, several horses of various colors (white, brown, and black) are grazing in a lush green field. Dairy Industry Restructuring Andrew P. Davidson, Harry K. Schwarzweller, 2000-12-20 Dairy industry restructuring is being affected by formidable forces of change the withdrawal of government protections and price support mechanisms the globalization of markets the rising power of food processors and the associated discontinuities of modern life This book examines various aspects about the reshaping of this troubled industry *Research in Rural Sociology and Development*, 1991 *Research in Rural Sociology and Development*, 1984 **Opening Windows Onto Hidden Lives** Julie N. Zimmerman, Olaf F. Larson, 2010 Examines the embeddedness of rural and farm women's lives in rural sociological research conducted by the USDA's Division of Farm Population and Rural Life 1919-1953 Explores how early rural sociologists found the conceptual space to include women in their analyses Provided by publisher **Constructing a new framework for rural development** Pierluigi Milone, Flaminia Ventura, Jingzhong Ye, 2015-03-13 This book critically discusses these new practices and the actors engaged in them In doing so it deals with several countries in three different continents Asia South America and Europe It proposes new concepts and approaches for a better understanding of the re-emergence of peasants as indispensable part of modern societies **Research in Rural Sociology and Development**, 1985 **Research in Rural Sociology and Development Vol. 8** Harry K. Schwarzweller, 2000 **Research in Rural Sociology and Development** Harry K. Schwarzweller, 1984 *From Community to Consumption* Alessandro Bonanno, Hans Baker, Raymond Jussaume, Yoshio Kawamura, Mark Shuksmith, 2010-09-08 Contains papers presented at the XII World Congress of Rural Sociology held in South Korea in 2008 This book provides an international view of the advanced production in rural sociology **Routledge International Handbook of Rural Studies** Mark Shuksmith, David L. Brown, 2016-05-20 Rural societies around the world are changing in fundamental ways both at their own initiative and in response to external forces The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world taking an interdisciplinary and problem focused approach Written by leading social scientists from many countries it addresses emerging issues and challenges in innovative and provocative ways to inform future policy This volume is organised around eight emerging social economic and environmental challenges Demographic change Economic transformations Food systems and land Environment and resources Changing configurations of gender and rural society Social and economic equality Social dynamics and institutional capacity Power and governance Cross-cutting these challenges are the growing interdependence of rural and urban the rise in inequality within and between places the impact of fiscal crisis on rural societies neoliberalism power and agency and rural areas as potential sites of resistance The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas **Diffusion Research in Rural Sociology** Frederick C. Fliegel, 1993 Fliegel overviews and summarizes research on the spread of innovations through rural populations The volume begins with a look at the discovery of diffusion as a patterned

process in the 1940s and examines the creation of the classical model to explain diffusion as a transfer of information. Fliegel then notes how the classical model changed to accommodate the particular socioeconomic condition when the model was applied to developing countries after 1945. He concludes by commenting on the revival of interest in diffusion research, the further development and refinement of the classical model, and the modern emphasis on conservation-oriented innovations rather than on innovations that enhance production. Fliegel overviews and summarizes research on the spread of innovations through rural populations. The volume gives detailed attention to the development and utilization of diffusion research from the 1940s to 1970 and traces the creation of the classical model for explaining the spread of innovations. Because the classical model seemed inadequate when applied to the diffusion of innovations in lesser developed countries after World War II, the model changed to accommodate new research. The book notes the role of diffusion research in developing countries after the second world war, the change of the classical model to include socioeconomic conditions peculiar to these countries, and the growth and development of diffusion research to the present day. The first part of the book provides an historical survey of diffusion research through 1970. The chapters in this section discuss the discovery of diffusion as a patterned process, the development of the classical model to explain diffusion as an information transfer, and the implementation of diffusion research in developing countries after 1945. The second part, devoted to recent trends, includes chapters on the further development and refinement of the classical model, the revival of interest in diffusion research, and the modern emphasis on conservation-oriented innovations rather than on ones that enhance production. An extensive bibliography concludes this comprehensive study.

Handbook of Research on Rural Sociology and Community Mobilization for Sustainable Growth Qaiser Rafique Yasser, 2018-11-16

Rural areas are a key sector in every nation's economy due to a sizeable majority of the population living therein as well as their impact on global agriculture and food security. Rural development transcends the availability of infrastructure, technology, and industrialization to also encompass the environmental and psychosocial needs of its inhabitants. The necessity for greater and deliberate efforts targeting all aspects of development of these rural areas is required to sustain growth. The *Handbook of Research on Rural Sociology and Community Mobilization for Sustainable Growth* is an essential reference source investigating how global trends, state policies, and grassroots movements affect contemporary rural areas in both developed and developing countries. Featuring research on topics such as gender and rural development, micro-financing, and water resource management, this book is ideally designed for government officials, policy makers, professionals, researchers, and students seeking coverage on the sustainable development of rural areas.

The Community in Rural America Kenneth P. Wilkinson, 2023-03-15 The Community in Rural America by Kenneth P. Wilkinson is a foundational theoretical work that both defines the interactional approach to the study of the community in rural areas and frames its application to encourage and promote rural community development. Recognized for its detailed theoretical construction and logic for understanding human interactions, this book has been widely adopted and used by researchers, extension faculty, and community development practitioners for over thirty years. Presenting Wilkinson's groundbreaking work in its original form with a new foreword aimed at clarifying several key concepts in interactional theory, this edition of The Community in Rural America will appeal to new students of the community as well as established scholars in the field.

Social Structure Of Contemporary China Xueyi Lu, 2012-07-24 This book is the third study done by the Research Group on Social Structure Change in Contemporary China, a group affiliated with the Institute of Sociology, Chinese Academy of Social Sciences. The group has focused on the process of development and change in contemporary Chinese social structure and come to the following conclusions: Contemporary China is transitioning from a traditional agricultural and rural society to a modern industrialized and urban society from a highly centralized planned economy to a robust socialist market economic system. The entire society is undertaking an unprecedented evolution. During the three decades of reform and opening up, China has made brilliant achievements never seen before in history. Now China is in a critical period of reform and opening up with very complex, far-reaching and closely intertwined social problems which are also unprecedented. After deep and detailed analysis, the Research Group believes that these problems cannot be resolved only by economic methods. In order to get to the roots of these social problems, China must develop new social policies, strengthen the social structure, and carry out social system reform. The core purpose of the book is to recommend theories and methods on social structure to society and readers and to investigate the development and change in China's social structure. We believe that social structure theory, a brand new point of view to analyze the current situation, is capable of deciphering the social contradictions in China's development to some extent, as opposed to mere economic theory which is inadequate to fully address the structural problems in China.
