Research In Sociology Of Knowledge Sciences And Art Volume 2:

The Social Relations of Physics, Mysticism, and Mathematics S. Restivo, 2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the

critical as opposed to apologetic or worshipful sociology of knowledge **The Pragmatics of Defining Religion** Jan G. Platvoet, Arie Leendert Molendijk, 1999 The Pragmatics of Defining Religion is a multidisciplinary volume on the problem of the definition of religion with chapters on the polemics of defining religion in modern contexts the history of the concept of religion the methodology of its definition it includes several definition proposals **In Search of Community** Eileen B.

Leonard, Hermann Strasser, Kenneth Westhues, 1993 In Search of Community is a collection of thirteen essays by former students of Dr Werner Stark influential historian of social thought The work opens with an introduction succinctly relating an outline of Stark's life's work encompassing the historical framework that influences him and the personal events that shape his outlook and scholarship The essayists address the entire range of central subjects of the sociological discipline by focusing on four areas of scientific debate the epistemic Sociology of Knowledge the theoretical Social Thought the societal Social Bond and the religious Sociology of Religion Those four areas were also of substantive concern to Werner Stark and his extraordinary range and depth of knowledge is reflected in this collection of essays **Extremist Mindsets and**

Strategies S. Clara Kim, 2021-06-11 Presenting an analysis of modern day extremism this book explores how any group of people or participants in a movement political ideological racial ethnonational religious or issue driven can adopt extremist mindsets if they believe their existence or interests are threatened Looking beyond fringe resistance groups already labeled as terrorists or subversives the author examines conventional organizations political parties religious groups corporations interest groups nation states police and the military that deploy extremist strategies to further their agendas Dynamics of mutual causation process between dominant and resistant extremist groups are explored including how resistant extremisms surface in response to oppressive and abusive measures advanced by the dominant groups to further their interests and maintain supremacy through systemic injustices as happens in slavery caste systems patriarchy colonialism autocracy exploitive capitalism and discrimination against minorities *The Pragmatics of Defining Religion* Platvoet, Arie

Molendijk,2018-11-13 This volume promotes a pragmatic anti essentialist and anti hegemonic approach to the problem of the definition of religion It argues that definitions of religion are context bound strategies for pursuing a variety of purposes extra academic as well as academic Religions being immensely varied complex and multi functional phenomena they need to be studied by several academic disciplines from many different perspectives It is therefore legitimate and useful that many definitions of religions are developed The volume has contributions from scholars in Philosophy of Religion the Comparative Study of Religions Anthropology of Religion Sociology of Religion and Psychology of Religion It has chapters on the polemics of defining religion in modern contexts the history of the concept of religion and the methodology of its definition it includes several definition proposals

Questioning Science in East Asian Contexts Yung Sik Kim,2014-01-16 Questioning Science in East Asian Contexts brings together twelve essays written by Yung Sik Kim addressing various questions about the social and cultural contexts of science in East Asia Most of the essays deal with the relationship between science and Confucianism especially the roles that Confucian thought values and institutions have on the development of science Kim shows that this relationship is very complex and multifaceted and cannot be dealt with in a simplistic manner Kim offers comparative perspectives and discusses the problems of intercultural comparisons he demonstrates that in spite of the potential dangers that accompany these comparisons they should be made nonetheless as they allow for a better understanding of the situation in East Asia

The Rise of Early Modern Science Toby E. Huff,2017-06-06 Now in its third edition The Rise of Early Modern Science argues that to understand why modern science arose in the West it is essential to study not only the technical aspects of scientific thought but also the religious legal and institutional arrangements that either opened the doors for enquiry or restricted scientific investigations Toby E Huff explores how the newly invented universities of the twelfth and thirteenth centuries and the European legal revolution created a neutral space that gave birth to the scientific revolution Including expanded comparative analysis of the European Islamic and Chinese legal systems Huff now responds to the debates of the last decade to explain why the Western world was set apart from other civilisations

Emile Durkheim Ivan Strenski,2017-05-15 A new appreciation of Durkheim now into its fourth decade has extended our grasp of his intellectual ambitions beyond standard academic boundaries Contributions to this revival of interest in Durkheim many secreted away in obscure periodicals are well worth being recognized for their unqualified excellence in helping us to uncover the original Durkheimian intellectual project in all its interdisciplinary complexity Besides classic Durkheimian subjects such as religion social solidarity and suicide these studies bring to light Durkheim s intellectual inquiry into political theory comparative ethnology social reconstruction questions of civil society and his articulation of an updated individualism in conversation with Marx Hegel Spencer and others Authors who have helped us attain this more rounded conception of the Durkheimian project include such well known figures as Robert N Bellah Robert Alun Jones Anthony Giddens W S F Pickering and Edward Tiryakian More than matching these contributions are the surprising writings by authors from across the

disciplines including such contemporaries of Durkheim as historian Henri Berr and theologian Alfred Loisy as well as modern day writers who deserve to be much better known such as philosopher John Brooks III or historian John Bossy Although this collection is overwhelmingly drawn from sources in English two classic critical pieces by French contemporaries of Durkheim enhance the value of this anthology

Social Reality Janak Pandey,1988 How Do Institutions Steer Events? John Wettersten,2017-03-02 Theories of explanation in the social sciences vacillate between holism and individualism Wettersten contends that this has been a consequence of theories of rationality which assume that rationality requires coherent theories to be shown to be true

Rejecting these traditional assumptions about rationality Wettersten claims that the traditional explanations of rationality have placed unrealistic demands on both individuals and institutions Analysing the theories of Weber and Popper Wettersten shows that Popper made considerable progress in the theory of rationality but ultimately stayed too close to the ideas of Hayek he explains how this dilemma leads to difficulties in economics anthropology sociology ethics and political theory and constructs an alternative theory that rationality is critical problem solving in institutional contexts Wettersten contends that the critical consideration of theories followed by their improvement dispenses with the need for justification and sees rationality as a social phenomena with an institutional basis The main social advantages this view offers is that the degree of rationality individuals achieve may be increased by institutional reform without moralizing and that we can explain how institutions steer events insofar as we understand how they determine the problems which individuals seek to solve It is argued that the central moral advantage of this view is that rationality is shown to be Spinozistic in the sense that it is natural and furthers morality and peace of mind

SSSS - Newsletter of the Society for Social Studies of Science 4S: Society for Social Studies of Science,1981 *SSSS Society for Social Studies of Science*,1979 **The Global Politics of Science and Technology - Vol. 2** Maximilian Mayer,Mariana Carpes,Ruth Knoblich,2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology The second volume raises a plethora of issue areas actors and cases under the umbrella notion techno politics Distinguishing between interactional and co productive perspectives it outlines a toolbox of analytical frameworks that transcend technological determinism and social constructivism
