## Sampling

### Stratified

The sample is a mini reproduction of the wider population. Before sampling, the population is divided into characteristics of importance for the research. For example, by gender, social class, education level, religion, etc. Then the population is randomly sampled within each category or stratum.

#### Evaluation

- + Representative and more generalisable
- Cannot represent all possible strata
- Difficult and time consuming

### Opportunity

Use whoever happens to be willing and available. Most commonly used by researchers.

#### Evaluation

- + Quick, convenient and economical
- Researcher can be biased in who they select
- Not representative or generalisable

### Volunteer

Participants self select themselves to take part. Usually in response to an advert.

#### Evaluation

- + Less time consuming
- + Participants are motivated and engaged
- Volunteer bias means the sample is hard to generalise from
