*Folklore, Magic, and Witchcraft* Marina Montesano,2021-08-19 This volume offers 18 studies linked together by a common focus on the circulation and reception of motifs and beliefs in the field of folklore magic and witchcraft The chapters traverse a broad spectrum both chronologically and thematically yet together their shared focus on cultural exchange and encounters emerges in an important way revealing a valuable methodology that goes beyond the pure comparativism that has dominated historiography in recent decades Several of the chapters touch on gender relations and contact between

different religious faiths using case studies to explore the variety of these encounters Whilst the essays focus geographically on Europe they prefer to investigate relationships over highlighting singular local traits In this way the collection aims to respond to the challenge set by recent debates in cultural studies for a global history that prioritises inclusivity moving beyond biased or learned attachments toward broader and broadening foci and methods With analysis of sources from manuscripts and archival documents to iconography and drawing on writings in Latin Hebrew Arabic and other languages this volume is essential reading for all students and scholars interested in cultural exchange and ideas about folklore magic and witchcraft in medieval and early modern Europe

**Witchcraft, Demonology and Magic** Marina Montesano, 2020-05-20 Witchcraft and magic are topics of enduring interest for many reasons The main one lies in their extraordinary interdisciplinarity anthropologists folklorists historians and more have contributed to build a body of work of extreme variety and consistence Of course this also means that the subjects themselves are not easy to assess In a very general way we can define witchcraft as a supernatural means to cause harm death or misfortune while magic also belongs to the field of supernatural or at least esoteric knowledge but can be used to less dangerous effects e.g. divination and astrology In Western civilization however the witch hunt has set a very peculiar perspective in which diabolical witchcraft the invention of the Sabbat the persecution of many thousands of mostly female and sometimes male presumed witches gave way to a phenomenon that is fundamentally different from traditional witchcraft This Special Issue of Religions dedicated to

Witchcraft Demonology and Magic features nine articles that deal with four different regions of Europe England Germany Hungary and Italy between Late Medieval and Modern times in different contexts and social milieus Far from pretending to offer a complete picture they focus on some topics that are central to the research in those fields and fit well in the current cumulative concept of Western witchcraft that rules out all mono causality theories investigating a plurality of causes
