The Mabinogi (Routledge Revivals) C. W. Sullivan III,2020-03-27 The purpose of this collection which was first published in 1996 is to provide both an overview of the major critical approaches to the Four Branches of the Mabinogi and a selection of the best essays dealing with them The essays examine the origins of the Mabinogion comparative analyses and structural and thematic interpretations This book is ideal for students of literature and Medieval studies *The War of the Gods (RLE Myth)* Jarich Oosten,2015-03-05 This structural analysis of myth first published in 1985 focuses on social and political problems of Indo European mythology Dr Jarich Oosten tells how the ancient Indo European gods competed for supreme power and the exclusive possession of the sacred potion of wisdom and immortality In examining the social code of

the wars of the gods he reveals that there are remarkably consistent patterns in time and space paternal relatives equals at first prove unable to share power magic goods etc while some gods retain their divine status as an exclusive prerogative their brothers or paternal cousins are transformed into demons relatives by marriage however who are unequal at first succeed in sharing power and magic goods and thus become equal partners in the pantheon Dr Oosten describes how the ancient mythological cycles were broken down and transformed into heroic sagas and epics and shows how many traditionally related themes the severed head the magic cauldron were preserved Gradually the political problems of kingship came to overshadow the social problems of kinship as in the development of the myths of King Arthur Dr Oosten argues that the social code remains basically the same and his analysis of this code gives a fascinating perspective on the development of Indo European mythology from the oldest written sources to the comparatively recent fairytales

The Mabinogi Charles William Sullivan, 1996 Culture in Practice collects the academic and political writings from the 1960s through the 1990s of anthropologist Marshall Sahlins More than a compilation Culture in Practice unfolds as an intellectual autobiography The book opens with Sahlins's early general studies of culture economy and human nature It then moves to his reportage and reflections on the war in Vietnam and the antiwar movement the event that most strongly affected his thinking about cultural specificity Finally it offers his more historical and globally aware works on

indigenous peoples especially those of the Pacific islands Sahlins exposes the cultural specificity of the West developing a critical account of the distinctive ways that we act in and understand the world The book includes a play review of Robert Ardrey's sociobiology essays on native consumption patterns of food and clothes in America and the West explorations of how two thousand years of Western cosmology affect our understanding of others and ethnohistorical accounts of how cultural orders of Europeans and Pacific islanders structured the historical experiences of both Throughout Sahlins offers his own way of thinking about the anthropological project To transcend critically our native categories in order to understand how other peoples have historically constructed their modes of existence even now in the era of globalization is the great challenge of contemporary anthropology
