Managing the Magic of Old Places Jeremy Wells, 2025-10-14 From 1849 to the early 1980s the development of US historic preservation policy was shaped by fewer than one hundred elite White men from Europe and America This orthodox preservation doctrine has too long silenced the vibrant experiential relationships between everyday people and their heritage *Managing the Magic of Old Places* Crafting Public Policies for People Centered Historic Preservation offers a radical rethinking of how historic preservation is approached in the United States Author Jeremy C Wells argues for a revolutionary shift in federal preservation policy one that embraces community based participatory practice and draws from environmental psychology to tap into the intangible emotional connections people have with old places Wells highlights the experiential values that laypeople often ascribe to historic environments which are frequently dismissed by expert driven policies He contends that if historic preservation policy continues to ignore these aspects the field will lose relevance as the gap between professionals and the public widens Drawing from interdisciplinary research in the social sciences particularly phenomenology and environmental psychology Wells's vision of public preservation policy centers the lived experiences of communities reinvigorating the field and ensuring that the preservation of historic places resonates with a wider more inclusive audience Wells positions his work within the growing field of critical heritage studies yet his focus on the psychological and emotional aspects of preservation distinguishes it as a unique contribution By placing the needs and experiences of the public at the

heart of preservation efforts Wells critiques the historical foundations of US preservation policy while offering a bold agenda for reform

ABSTRACT The Huntington Salamonie and Mississinewa reservoirs in northern Indiana control seasonal flooding in the Upper Wabash River drainage area They appeared in the 1960s after a long period of study and planning in response to large scale flooding in central and southern Indiana in the first half of the twentieth century Their construction disrupted the pattern of human ecology along the Wabash and its tributaries for many of the watershed s inhabitants Supporters touted the projects economic and recreational benefits while opponents experienced the change as a desecration of sacred space The projects saved millions in property damage and perhaps many human lives but at the cost of an enduring sense of place amid the advent of a new regime of scientific watershed management and state control over natural resources in the region Winnie L M YEE Fashion Affect and Poetry in a Global City ABSTRACT Everyday life is a central theme of Hong Kong poetry Many Hong Kong poets use the quotidian as a starting point for the exploration of history and alternative imaginings This is a mundane focus unlike the colonial dreamscape of Hong Kong as an economic miracle allows writers to reflect upon Hong Kong as a post colonial and global space The Hong Kong writer Natalia Chan examines the complex nature of everyday life within the space of the global and post colonial city Chan s poems deal with the essence of everydayness and use commodities to conjure up the vivacity of the urbanscape of Hong Kong Unlike the political and economic discourse that is usually used to define Hong Kong Chan s work portrays Hong Kong as a city that offers the possibility of daily recreation against the background of history In this article we will examine Chan s use of the circulation of commodities in the global world and explore the way fashion becomes a point where high and popular culture private and public domains and local and global interests clash negotiate and fertilize each other Chan s works do not conform to the economic and prosperity discourse that has repressed Hong Kong rather she guides her readers to re experience the everydayness of routines to celebrate alternate ways of understanding the urbanscape and to open themselves to the potentialities of art and the everyday Emmanuel YEWAH African Documentaries Films Texts and Environmental Issues ABSTRACT This study draws from theoretical environmental debates as well as a selection of films documentaries and texts to discuss Africans approaches to environmental and ecological problems Furthermore it highlights the various strategies that Africans have developed in their attempts to provide holistic and much more comprehensive responses to environmental challenges Informed by African indigenous knowledge those strategies do involve community based micro level initiatives grassroots organizations ancestral spirits and use local languages or lingua franca to educate as well as prod the people s consciousness about environmental and ecological issues REVIEWS Lorna Lueker ZUKAS Forgotten World Directed by Terri Ella Derek SHANAHAN The View from the Train Cities and Other Landscapes By Patrick Keiller **Sacred Places of a Lifetime** National Geographic,2008 A listing of five hundred sites new and old famous and unknown that have been used to connect humanity with its gods **The Routledge History of Medieval Magic** Sophie Page,Catherine Rider,2019-01-15 The Routledge History of Medieval Magic

Signs, Cures, & Witchery Gerald Milnes, 2007 The persecution of Old World German Protestants and Anabaptists in the seventeenth century following debilitating wars the Reformation and the Inquisition brought about significant immigration to America Many of the immigrants and their progeny settled in the Appalachian frontier Here they established a particularly old set of religious beliefs and traditions based on a strong sense of folk spirituality They practiced astrology numerology and other aspects of esoteric thinking and left a legacy that may still be found in Appalachian folklore today Based in part on the author s extensive collection of oral histories from the remote highlands of West Virginia Signs Cures and Witchery German Appalachian Folklore describes these various occult practices symbols and beliefs how they evolved within New World religious contexts how they arrived on the Appalachian frontier and the prospects of those beliefs continuing in the contemporary world By concentrating on these inheritances Gerald C Milnes draws a larger picture of the German influence on Appalachia Much has been written about the Anglo Celtic Scots Irish and English folkways of the Appalachian people but few studies have addressed their German cultural attributes and sensibilities Signs Cures and Witchery sheds startling light on folk influences from Germany making it a volume of tremendous value to Appalachian scholars folklorists and readers with an interest in Appalachian folklife and German American studies

Dark and Magical Places Christopher Kemp, 2022-01-25 Kemp is a natural storyteller a deft explainer and a terrific and funny writer Mary Roach author of Fuzz How the brain helps

us to understand and navigate space and why sometimes it doesn't work the way it should. Inside our heads we carry around an infinite and endlessly unfolding map of the world. Navigation is one of the most ancient neural abilities we have, older than language. In *Dark and Magical Places*, Christopher Kemp embarks on a journey to discover the remarkable extent of what our minds can do. Fueled by his own spatial shortcomings, Kemp describes the brain regions that orient us in space and the specialized neurons that do it: Place cells, Grid cells. He examines how the brain plans routes, recognizes landmarks, and makes sure we leave a room through a door instead of trying to leave through a painting. From the secrets of supernavigators like the indigenous hunters of the Bolivian rainforest to the confusing environments inhabited by people with place blindness, Kemp charts the myriad ways in which we find our way and explains the cutting-edge neuroscience behind them. How did Neanderthals navigate? Why do even seasoned hikers stray from the trail? What spatial skills do we inherit from our parents? How can smartphones and our reliance on GPS devices impact our brains? In engaging, engrossing language, Kemp unravels the mysteries of navigating and links the brain's complex functions to the effects that diseases like Alzheimer's, types of amnesia, and traumatic brain injuries have on our perception of the world around us. A book for anyone who has ever felt compelled to venture off the beaten path, *Dark and Magical Places* is a stirring reminder of the beauty in losing yourself to your surroundings. And the beauty in understanding how our brains can guide us home. **Why Old Places Matter**

Thompson M. Mayes, 2018-09-01. *Why Old Places Matter* is the only book that explores the reasons that old places matter to people. Although people often feel very deeply about the old places of their lives, they don't have the words to express why. This book brings these ideas together in evocative language and with illustrative images for a broad audience. The book reveals the fundamentally important yet under-recognized role old places play in our lives. While many people feel a deep-seated connection to old places, from those who love old houses to the millions of tourists who are drawn to historic cities to the pilgrims who flock to ancient sites throughout the world, few can articulate why. The book explores these deep attachments people have with old places: the feelings of belonging, continuity, stability, identity, and memory, as well as the more traditional reasons that old places have been deemed by society to be important, such as history, national identity, and architecture. This book will be appealing to anyone who has ever loved an old place. But more importantly, it will be an useful resource to articulate why old places are meaningful to people and their communities. This book will help people understand that the feeling many have for old places is supported by a wide variety of fields and that the continued existence of these old places is good. It will give people the words and phrases to understand and express why old places matter.
