Commentaries on the Laws of England William Blackstone, 1872      **Current Law Index**, 2001      Liberalizations in Network Industries Antonio Nicita, Filippo Belloc, 2016-09-15 This book explores the wave of liberalization reforms experienced by OECD network industries Focusing on the telecommunications sector the authors analyze the latest data available on liberalization and privatization and following a political economics approach they integrate standard economic analysis with the most recent studies of the political determinants of market oriented policies The book presents new econometric evidence on several policy issues including institutional complementarities dynamics the problem of policy sequencing and the role of government political ideology The detailed and comprehensive discussion offers insights into how so many countries adopting similar reforms actually differ in their policy bundling intensity and implementation of liberalization and privatization      EU Competition Law and the Information and Communication Technology Network

Industries Andrej Fatur, 2012-03-08 Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation. However, recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context. This is especially important in the field of information and communication technology (ICT) network industries where competition centres on network effects, innovation and intellectual property rights and where the key driver of consumer benefit is technological progress. Consequently, when an antitrust intervention is contemplated, a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare. This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory. Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area, such as non-price predatory practices, tying and bundling, co-operative standard setting, platform joint ventures and co-operative R D.

**Antitrust Law Journal**, 1986 Case for Discrimination, The, **Intellectual Property Rights and the EC Competition Rules** Valentine Korah, 2006-02-16 This latest monograph by Professor Korah on the recent group exemption consists of a detailed and critical commentary on the technology transfer block exemption and guidelines of 2004 and of the case law of the ECJ and Commission on licensing and refusals to license together with annotated copies of the regulation and guidelines. There is a substantial chapter on refusal to supply or license in the light of the recent case law under Article 82. It embraces many of the competition issues that may affect intellectual property rights. After a brief introduction, the work starts with short chapters on the free movement of goods and services, the status of the Commission's guidelines and the historically hostile attitude of the Commission under Article 81 towards licensing. It then launches into a detailed analysis of the regulation and the probable treatment of licences that do not fall within it. Throughout the book, the author provides extensive analysis of policy and economics as well as comparison with US practice. **The Writers Directory**, 2013

**Intellectual Property and Competition Law** Peter Chrocziel, Moritz Lorenz, 2016-05-15 Inevitably every marketed product or service can always be located at the intersection of intellectual property law and competition law, a nexus rife with potential problems throughout the life of an intellectual property (IP) right. This important book is the first to focus in depth on this intersection in the European context, masterfully elucidating the consequences for IP rights owners from the right's inception to its transfer, sale or demise. The authors describe and analyse the following topics and more in detail: characteristics, purpose and theoretical justifications of IP rights; obtaining, maintaining and exploiting an IP right; effects of provisions of European competition law regarding cartels, block exemptions, abuse of dominant position, free movement of goods and merger control; competition between originator companies and generic companies; licensing, especially the problem of refusal to grant a license; and enforcement of an IP right. The book analyses all major cases affecting aspects of the

intersection supported by an examination of the historical background and political influence concerning the two areas of European law There are also special chapters on the prominent and influential national legal systems of Germany the United States China The Netherlands and the United Kingdom An annex provides texts of the major antitrust regulations dealing with European IP rights As a biography of IP rights focusing on areas of entanglement with European competition law this book is without peer Its clear sighted view of the status quo and emerging trends in the two fields will be of immeasurable value to practitioners policymakers and academics dealing with issues at the intersection of intellectual property law and competition law in Europe and elsewhere     EU Competition Law Alison Jones,Brenda Sufrin,2010-10-14 New to this edition
