Magnificent Desolation:

Magnificent Desolation Buzz Aldrin, Ken Abraham, 2010 Recounts the astronaut's life and career including his childhood the landmark 1969 moon landing and his battles with alcoholism and depression after his fame *This Magnificent Desolation* Thomas O'Malley, 2013-03-19 Duncan's entire world is the orphanage where he lives a solitary outpost on the open plains of northern Minnesota Aged ten in 1980 he has no memories of his life before now but he has stories that he recites like prayers the story of how his mother brought him here during the worst blizzard of the century the story of how God spoke to him at his birth and gave him a special purpose Duncan is sure that his mother is dead until the day she turns up to claim him Maggie Bright a soprano who was once the talent of her generation now sings in a San Francisco bar through a haze of whisky cut with sharp regret She often finishes up in the arms of Joshua McGreevey a Vietnam vet who earns his living as part of a tunneling crew seventy feet beneath the Bay He smells of sea silt and loam as if he has been dredged from the deep bottom of the world and his wounds run deep too Thrown into this mysterious adult world Duncan finds comfort in an ancient radio from which tumble the voices of Apollo mission astronauts who never came home and dreams of finding his real father A heart breaking staggering soaring novel This Magnificent Desolation allows a child's perspective to illuminate a dark world and explores the creeping devastation of war the many facets of loneliness the redemptive power of the imagination and the possibility of a kind of grace *Magnificent Desolation* John

Scavengers of Beauty Philippe Sibaud, 2020-08-28 Why was the mission to the Moon named after the God of the Sun and not after a Moon Goddess or God In this unconventional work Philippe Sibaud explores the symbolism behind the 1969 landing on the Moon More than fifty years after this seminal event and whilst the Moon is attracting renewed interest the author offers a bold new interpretation of the iconic Apollo mission Was the Apollo landing the ultimate triumph of solar consciousness over the ancient lunar ways a concrete enactment of the god Apollo mythically slaying the mother dragon at Delphi or can the whole venture be seen as the sacred union of Sun and Moon birthing a new vision at a time of great need By weaving his own personal story with a greater cultural and symbolic narrative Philippe Sibaud invites us to reflect on the importance of myths and the power of the Imagination to unlock the deeper meaning of our individual and collective experiences You will never look at the Moon with the same eyes again

John Houbolt William F. Causey, 2020-03-15 In May 1961 President Kennedy announced that the United States would attempt to land a man on the moon and return him safely to the earth before the end of that decade Yet NASA did not have a specific plan for how to accomplish that goal Over the next fourteen months NASA vigorously debated several options At first the consensus was to

send one big rocket with several astronauts to the moon land and explore and then take off and return the astronauts to earth in the same vehicle Another idea involved launching several smaller Saturn V rockets into the earth orbit where a lander would be assembled and fueled before sending the crew to the moon But it was a small group of engineers led by John C Houbolt who came up with the plan that propelled human beings to the moon and back not only safely but faster cheaper and more reliably Houbolt and his colleagues called it lunar orbit rendezvous or LOR At first the LOR idea was ignored then it was criticized and then finally dismissed by many senior NASA officials Nevertheless the group under Houbolt's leadership continued to press the LOR idea arguing that it was the only way to get men to the moon and back by President Kennedy's deadline Houbolt persisted risking his career in the face of overwhelming opposition This is the story of how John Houbolt convinced NASA to adopt the plan that made history

Zwicky John Johnson Jr., 2019-09-10 A fitting biography of one of the most brilliant acerbic and under appreciated astrophysicists of the twentieth century John Johnson has delved deeply into a rich and eventful life and produced a rollicking account of how Fritz Zwicky split his time between picking fights with his colleagues and discovering amazing things about

our universe Sean Carroll author of The Big Picture Fritz Zwicky was one of the most inventive and iconoclastic scientists of his time He predicted the existence of neutron stars and his research pointed the way toward the discovery of pulsars and black holes He was the first to conceive of the existence of dark matter the first to make a detailed catalog of thousands of galaxies and the first to correctly suggest that cosmic rays originate from supernovas Not content to confine his discoveries to the heavens Zwicky contributed to the United States war against Japan with inventions in jet propulsion that enabled aircraft to launch from carriers in the Pacific After the war he was the first Western scientist to interview Wernher von Braun the Nazi engineer who developed the V 2 rocket Later he became an outspoken advocate for space exploration but also tangled with almost every leading scientist of the time from Edwin Hubble and Richard Feynman to J Robert Oppenheimer and Subrahmanyan Chandrasekhar In Zwicky John Johnson Jr brings this tempestuous maverick to life Zwicky not only made groundbreaking contributions to science and engineering he rose to fame as one of the most imaginative science popularizers of his day Yet he became a pariah in the scientific community denouncing his enemies real and imagined as spherical bastards and horses asses Largely forgotten today Zwicky deserves rediscovery for introducing some of the most destructive forces in the universe and as a reminder that genius obeys no rules and has no friends
