*Saving the Royal Mail's universal postal service in the digital age* Richard Hooper, Great Britain Department for Business, Innovation and Skills, 2010-09-10 The Coalition Government asked Richard Hooper to update the 2008 report *Modernise or decline* policies to maintain the universal postal service in the United Kingdom Cm 7529 2008 ISBN 9780101752923 He finds the universal postal service still under serious threat with most of the original causes for concern having got worse the market and Royal Mail's market share continue to decline the company has still not modernised sufficiently the accounting pension deficit has grown from 2.9bn to 8.0bn the current regulatory regime is not fit for purpose The 2008 recommendation that private sector capital is required by Royal Mail is reiterated for several reasons The company is unlikely to generate sufficient cash to finance the modernisation required Private sector capital will inject private sector disciplines and reduce the risk of political intervention in commercial decisions And the state of the public finances means that Royal Mail will find it harder to compete for Government capital against other public spending priorities But private capital will not be attracted without action on the pension deficit and the regulatory regime The historic pension deficit should be taken over by the public purse A new regulatory framework must be created that increases certainty for investors in the postal services sector in general and in Royal Mail in particular Postcomm has recently consulted on a new framework and this should be built upon This update sets out the high level principles that should guide regulation ensuring the overall burden is reduced

Royal Enfield Bullet Peter Henshaw, 2020-10-26 Despite being one of the most successful motorcycles of all time the Royal Enfield Bullet has had a very chequered history Its story begins in the 1930s and by the 1950s it was at the height of its popularity in post War Britain Then it became a stalwart of the Indian Army and manufacture transitioned from Britain to India The near collapse of the Royal Enfield marque in the 1990s almost meant the end of this classic motorbike but with the involvement of the Eicher Group from 2001 onwards the updated Bullet generated new interest and renewed its original commercial success just like a phoenix rising from the ashes With over 200 photographs this book describes the origins of the Royal Enfield company and the pre war Bullets from 1932 and the relaunch of the Bullet in 1949 with its radical swinging arm frame Derivative models such as the 350 and 500 as well as those for competition and road are covered as well as specials such as diesels V twins Egli and big bore Bullets The development story behind the lean burn electric start and 5 speed updates is discussed as well as the UCE the all new Bullet from 2008 and the Classic and its design story Finally the evolution beyond the Bullet is covered which includes the Continental GT and Himalayan 650 twins *Modernise Or Decline* Richard Hooper, Deirdre Hutton, Ian R. Smith, 2008 This review Cm 7529 ISBN 9780102958393 was established to maintain the universal postal service that is the collection sorting transportation and delivery of letters to all 28 million businesses and residential addresses It sets out a number of conclusions and recommendations on how the universal service can be maintained The postal service is seen as having a strong social and economic rationale Customers place a high value on the

affordability of the service on a uniform tariff and deliveries on six days per week The Review states that the post offices provide a vital point of access for residential consumers and small businesses The universal service is under threat though with the explosion of digital media the internet email mobile text and broadcasting which has prompted an unprecedented decline in the letters market The Review does see a positive future for the postal service provided that postal companies are able to respond quickly to the changing needs of customers and embrace the opportunities which new technology brings Although the Royal Mail is the only company currently capable of providing the universal service in the UK it is much less efficient than many of its European peers and faces severe difficulties Therefore a radical reform of the Royal Mail's network is inevitable and the organisation needs to modernise faster To sustain the universal service the Royal Mail needs to tackle inefficiency the pension deficit and the difficult relationships between the company unions and regulator The Review sees two distinct phases to modernisation i Transformation that is changing the culture of the organisation by improving efficiency and reducing costs ii Diversify that is finding new sources of revenue either by providing related products or expanding to cover a wider geographical area The Review believes that the Royal Mail urgently needs commercial confidence capital and corporate experience to modernise quickly and effectively and recommends a strategic partnership with one or more private sector companies with demonstrable experience of transforming a major business ideally a major network business but that Post Office Ltd should remain wholly within public sector ownership *Handbook of Worldwide Postal Reform* Michael A. criteria for access to the network a matter of concern because the current criteria could be met by 7 500 branches rather than the existing 11 500 branches This could lead to many closures in Scotland The Committee recommends that the Government gives assurances to preserving the existing network of branches Elements of Outreach Post Offices which replaced 102 Post Office branches in rural and remote parts of Scotland are not sufficiently robust or reliable to provide an adequate service according to the Committee and it fears the new Post Office Local risks downgrading the service further Improvements should be delivered as a matter of urgency
