**No Ordinary Disruption** Richard Dobbs, James Manyika, Jonathan Woetzel, 2016-08-30. Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene or businesses protected by large and deep moats find their defenses easily breached or vast new markets are conjured from nothing. Trend lines resemble sawtooth mountain ridges. The world not only feels different, the data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, *No Ordinary Disruption: The Four Forces Breaking All the Trends* is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital, and people. Our intuitions formed during a uniquely benign period for the world economy, often termed the Great Moderation, when asset prices were rising, the cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything, from grain to steel, may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets *No Ordinary Disruption* apart is the depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that by 2025 a single regional city in China, Tianjin, will have a GDP equal to that of Sweden, and that in the decades ahead, half of the world's economic growth will come from 440 cities, including Kumasi in Ghana or Santa Carina in Brazil, that most executives today would be hard pressed to locate on a map. What we are now seeing is no ordinary disruption, but the new facts of business life: facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

*Writing History from the Margins* Claire Parfait, Hélène Le Dantec-Lowry, Claire Bourhis-Mariotti, 2016-09-13. With contributions from leading American and European scholars, this collection of original essays surveys the actors and the modes of writing history from the margins of society, focusing specifically on African Americans. Nearly 100 years after *The Journal of Negro History* was founded, this book assesses the legacy of the African American historians, mostly amateur historians initially, who wrote the history of their community between the 1830s and World War II. Subsequently, the growth of the civil rights movement further changed historical paradigms and the place of African Americans, and that of black writers in publishing and in the historical profession. Through slavery and segregation, self-educated and formally educated Blacks wrote works of history, often in order to inscribe African Americans within the main historical narrative of the nation, with a two-fold objective: to make African

Americans proud of their past and to enable them to fight against white prejudice Over the past decade historians have turned to the study of these pioneers but a number of issues remain to be considered This anthology will contribute to answering several key questions concerning who published these books and how were they distributed read and received Little has been written concerning what they reveal about the construction of professional history in the nineteenth century when examined in relation to other writings by Euro Americans working in an academic setting or as independent researchers

**The Economy of Collaboration** Francesco Ramella,Cecilia Manzo,2020-11-29 Over the past few decades the world economy has undergone radical transformations in part connected to the expansion of the digital economy in part to the growing interconnection via the internet of the world of objects and physical processes This great transformation poses the dilemma on the capitalism s ability to reconcile economic and social value keeping together economic well being social cohesion and political freedom The Economy of Collaboration can offer a contribution in this direction but requires courageous policies to mediate the various interests at stake as well as to rethink and make more sustainable its development by increasing the benefits not only for businesses but also for workers and consumers In short to create shared value This book refers to a mode of organizing the production distribution and consumption of goods and services based on cooperative relations The main reference is to activities linked to the digital economy since they are the emerging forms of a definitely older phenomenon but which is expanding on an ever wider scale thanks to new technologies These collaborative activities can be regulated differently along a continuum that ranges from the pole of market exchanges to that of generalized reciprocity with various intermediate mixed forms
