The Global Debate Over Constitutional Property Gregory S. Alexander, 2006-07-15 Countries around the world are heatedly debating whether property should be a constitutional right But American lawyers have largely ignored this debate which is divided into two clear camps those who believe making property a constitutional right undermines democracy by fostering inequality and those who believe it provides the security necessary to make democracy possible In

The Global Debate over Constitutional Property Gregory Alexander recasts this discussion arguing that both sides overlook a key problem that constitutional protection or lack thereof has little bearing on how a society actually treats property A society's traditions and culture Alexander argues have a much greater effect on property rights Laws must aim then to change cultural ideas of property rather than deem whether one has the right to own it Ultimately Alexander builds a strong case for improving American takings law by borrowing features from the laws of other countries particularly those laws based on the idea that owning property not only confers rights but also entails responsibilities to society as a whole

Understanding Poverty and the Environment Fiona Nunan, 2015-03-27 Does poverty lead to environmental degradation Do degraded environments and natural resources lead to poverty Or are there other forces at play Is the relationship between poverty and the environment really as straightforward as the vicious circle portrayal of poverty leading to environmental destruction leading to more poverty would suggest Does it matter if the relationship is portrayed in this way This book suggests that it does matter Arguing that such a portrayal is unhelpful and misleading the book brings together a diverse range of analytical frameworks and approaches that can enable a much deeper investigation of the context and nature of poverty environment relationships Analytical frameworks and approaches examined in the book include political ecology a gendered lens Critical Institutionalism the Environmental Entitlements framework the Institutional Analysis and Development approach the Sustainable Livelihoods Framework wellbeing analysis social network analysis and frameworks for the analysis of the governance of natural resources Recommended further reading draws on published material from the last thirty years as well as key contemporary publications giving readers a steer towards essential texts and authors within each subject area Key themes running through the analytical frameworks and approaches are identified and examined including power access institutions and scale

Immanuel Kant Arthur Ripstein, 2017-05-15 Kant casts a long shadow over contemporary debates in political philosophy The Kantian roots of ideas of dignity autonomy equality and freedom under law are widely acknowledged Kant's own developments of those ideas in his explicitly political writings are taken up less frequently The aim of this volume is to help bring those contributions out of the shadows The articles and essays explore various dimensions of Kant's complex and powerful picture of the relation between morality and politics that Kant develops

Recent Acquisitions Ohio State University. College of Law. Library, 1998 Changes in Land Access and Governance in West Africa Jean-Pierre Chauveau, 2006 Globalization, Privatization and Free Market Economy C. Rao, 1998-06-25 The three dominant forces shaping societies and economies around the world are globalization privatization and liberalization Because these processes are interrelated they must be addressed collectively The contributors to the volume show that globalization privatization and liberalization are multidimensional phenomena that impact not only the economic considerations of governments but also sociocultural and environmental aspects of societies The three phenomena also affect these units of analysis which Rao and his colleagues identify as regional country industrial and organizational The result is a cogent discussion of these powerful global forces for the academic community professionals in economic development banking finance international investment and global commerce After treating the conceptual issues of meaning definition and differing interpretations and perspectives the volume examines the historical experience with regional economic integration The flow of foreign direct investment a major consequence of globalization privatization and liberalization of economies is considered next This leads to a study of the challenges created for management at the microlevel in organizations such as the intensification of competitiveness and the increased importance of technology and technology management In their examination of country specific issues the contributors show how widely experiences vary with regard to the way in which the three major processes are implemented and how the policies behind them are adopted Finally in their discussion of sectoral and industry specific issues the contributors note that great variations on how different industrial sectors and industries will approach and recreate themselves under the power of the three great processes *Food Biotechnology in Ethical Perspective* Paul B. Thompson, 2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson's path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson's unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological

innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system Conquest, Constitutionalism and Democratic Contestations Joel M. Modiri, 2020-05-21 Two decades since the enactment of South Africa's present constitution the durability and endurance of past inequalities and injustices illustrate that the new South Africa lauded as a miracle nation with the best constitution in the world can no longer be regarded as an unqualified success The legal and constitutional foundations of post 1994 South Africa are in a process of renegotiation that invites new and alternative perspectives and approaches This comprehensive volume explores this process of renegotiation by engaging political and intellectual contestations circulating in South African academic and public discourse relating to continuities and discontinuities between the colonial apartheid past and the post 1994 constitutional present The authors analyse the moral intellectual and political unravelling of post 1994 South African constitutionalism as legal text and political culture and enquire whether it has been able to respond adequately to the fundamental contradictions generated by colonisation and apartheid They also consider how centring the historical problem of European domination and conquest in Africa and South Africa in particular might provide an alternative frame or lens to theorise and understand contemporary South African realities This book marks out a complex field of contestation involving competing histories locations visions and perspectives that raises multifaceted questions regarding law history and politics It is the outcome of a South African Journal of Human Rights colloquium and was originally published as a special issue of the journal **Property Rights and Social Justice** Rachael Walsh, 2021-06-10 Property Rights and Social Justice analyses progressive property in action by examining the role of constitutional property rights guarantees in mediating private ownership and social justice It combines insights from property theory with enlightening doctrinal analysis of the interaction between property rights and social justice in the constitutional and broader legal context It does so through the prism of the Irish Constitution's property guarantees which uniquely in the English speaking common law world both protect property rights and requires their regulation by the State to secure social justice Through this analysis the book grounds key debates in contemporary property theory in fresh illuminating doctrinal examples and enhances global debates about the constitutional protection of property rights It argues that primacy is perhaps inevitably afforded to political determinations about the appropriate mediation of property rights and social justice meaning that the political impact of constitutionalisation needs to be disentangled from its strict legal effects
