The Politics of Mainstreaming in Critical Perspective Sharleene May Bibbings, 2011-11-15 Gender mainstreaming GM has been identified in academic literature as a crucial topic for both public attention and academic research This is because GM is currently considered an essential strategy for achieving the highly sought after outcome of gender equality in public organisations However an exhaustive degree of academic practitioner and advocate attention has been paid to challenges observed in the GM process Specifically concerns have crystallised on the following twin puzzles i conceptual confusion and ii the challenges of operationalising the process The central purpose of this book has been to make a contribution in relation to both of these academic and practice based issues at a time when questions appertaining to gender equality are reaching critical mass Moreover we are simply not there yet in terms of our aspirations for gender equality in public organisations and new insights on strategies used to move us forward need to be brought to the foreground to engender progress To address the aims of the book the author uses three novel argumentative turns to interrogate the politics of mainstreaming from a critical perspective First is the challenge related to conceptual confusion It is important to clarify that this book does not intend to investigate and define the issue of gender inequality in organisations per se something that is beyond the scope of this book and deserves attention in its own right Instead this work focuses on the specific processes of change mainstreaming rather than the content of change gender Secondly the practice element was also approached in a inimitable way by concentrating on local government in the UK which has had a long history with GM despite the dearth of books on the issue and thus an

opportunity to analyse instructive and empirically rich cases Finally through a longitudinal view of local government history this has included previously excluded evidence for consideration Using these argumentative turns the book has met its three aims by mapping out i the core conceptual features of mainstreaming across a range of organisational settings ii developed an evaluation framework for understanding the outcomes of GM through a national level review and primary research and iii interrogated the findings through a productive theory practice dialogue using the work of social learning theory This book should be of interest to a wide ranging audience As the study at the broadest level is essentially a study into the politics of change over time students and academics may wish to utilise the books findings as they point to some of the challenges and difficulties associated with analysis of change within organisations Feminists should also find the theoretical and methodological approach of interest in the sense that it challenges conventional wisdom and provides novel argumentative turns Historical specialist may also find this book of interest for those concerned with process tracing methods and diachronic analysis Finally practitioners involved in different forms of mainstreaming organisational change and development should be interested in the experiences encountered by the local government officers in adopting and implementing GM in the case studies These include but are not limited to Program Management Specialists Development Officers Policy Experts Equality Practitioners and Gender Experts in a variety of organisational contexts from the local to the supranational levels private public and mixed economy sectors

Boserup's legacy as a scholar and activist and the continuing relevance of her work. This highlights the key issue of how the role of women in economic development has or has not changed over the past four decades in developing countries and covers crucial current topics including women and inequality, international and national migration, conflict, HIV and AIDS, markets and employment, urbanization, leadership, property rights, global processes including the Millennium Development Goals and barriers to change. Gender equality: it's your business Lauren McCarthy, Liz Kirk, Kate Grosser, 2012. *Not just a drop in the bucket: Measuring women's empowerment in water, sanitation, and hygiene* Myers, Emily, Baek, Yuna, Ramani, Gayathri V., Heckert, Jessica, 2022-03-11. Given the lack of consensus around how to measure empowerment in WASH, mapping existing indicators to two frameworks frequently used in the empowerment literature illustrates knowledge gaps. We identified 290 gender-sensitive indicators across nine WASH themes that were mapped to the Reach Benefit Empower and Resources Agency Achievements frameworks. Most indicators measure Benefit and/or Resources. Existing gender-sensitive indicators capturing empowerment and agency in WASH are lacking: only 10.3% of indicators capture Empower and 24.8% of indicators capture Agency. Cities, Slums and Gender in the Global South Sylvia Chant, Cathy McIlwaine, 2015-12-22. Developing regions are set to account for the vast majority of future urban growth and women and girls will become the majority inhabitants of these locations in the Global South. This is one of the first books to detail the challenges facing poorer segments of the female population who commonly reside in slums. It explores the variegated disadvantages of urban poverty and slum dwelling from a gender perspective. This book revolves around conceptualisation of the gender-urban-slum interface which explains key elements to understanding women's experiences in slum environments. It has a specific focus on the ways in which gender inequalities can be entrenched but also alleviated. Included is a review of the demographic factors which are increasingly making cities everywhere feminised spaces such as increased rural-urban migration among women, demographic ageing and rising proportions of female-headed households in urban areas. Discussions focus in particular on education, paid and unpaid work, access to land, property and urban services, violence, intra-urban mobility and political participation and representation. This book will be of use to researchers and professionals concerned with gender and development, urbanisation and rural-urban migration. Gender, Power and Politics in Agriculture Jemimah Njuki, Hale Ann Tufan, Vivian Polar, Hugo Campos, Monifa Morgan-Bell, 2024-10-07. This is an open access book. In the agriculture sector, the language of gender integration often ignores the politics and the power dynamics that are central to critical and feminist analysis of gender relations. This volume explores largely neglected topics such as power dynamics, masculinities, gendered social norms, feminist research practice, intersectionality, critical analysis of tools and more that are fundamental to shifting the entrenched power dynamics and politics of gender research in agriculture. The purpose of this book is to reduce the gap existing between theory, methods and practice of gender relations in agriculture and agricultural research. Through an in-depth analysis of current processes in agriculture and drawing on existing experiences in other

sectors it seeks to create pathways for learning catalyzing change and positive impact on gender equity and social inclusion This volume seeks to bring forth a change in how gender relations in agriculture are researched practiced and taught

Building Feminist Movements and Organizations Lydia Alpízar Durán,Noël D. Payne,Anahi Russo,2013-07-18 The struggle for the advancement of women s rights and gender equality globally is impossible without strong women s organizations and movements to provide leadership and momentum But what does a strong women s organization look like And what does it take to create effective and sustainable women s movements This groundbreaking collection of essays by activists from all corners of the globe explores what it means to be an influential women s organization and what it takes to build the kinds of movements needed to transform women s lives From how to build successful participatory democratic processes and implement shared leadership models to lessons on overcoming internal organizational divisions the case studies in this collection focus not only on the what but also the how of movement building Those concerned with how to effect sustainable change will find not only much food for thought but also an abundance of creative ideas and innovative strategies served up with a uniquely feminist twist

The United Nations and Human Rights Frédéric Mégret,Philip Alston,2020-04-02 The very concept of human rights implies governmental accountability To ensure that governments are indeed held accountable for their treatment of citizens and others the United Nations has established a wide range of mechanisms to monitor compliance and to seek to prevent as well as respond to violations The panoply of implementation measures that the UN has taken since 1945 has resulted in a diverse and complex set of institutional arrangements the effectiveness of which varies widely Indeed there is much doubt as to the effectiveness of much of the UN s human rights efforts but also about what direction it should take Inevitable instances of politicization and the hostile or at best ambivalent attitude of most governments has at times endangered the fragile progress made on the more technical fronts At the same time technical efforts cannot dispense with the complex politics of actualizing the promise of human rights at and through the UN In addition to significant actual and potential problems of duplication overlapping and inconsistent approaches there are major problems of under funding and insufficient expertise The complexity of these arrangements and the difficulty in evaluating their impact makes a comprehensive guide of the type provided here all the more indispensable These essays critically examine the functions procedures and performance of each of the major UN organs dealing with human rights including the Security Council and the International Court of Justice as well as the more specialized bodies monitoring the implementation of human rights treaties Significant attention is devoted to the considerable efforts at reforming the UN s human rights machinery as illustrated most notably by the creation of the Human Rights Council to replace the Commission on Human Rights The book also looks at the relationship between the various bodies and the potential for major reforms and restructuring

Development, Sexual Rights and Global Governance Amy Lind,2010-01-04 This book addresses how sexual practices and identities are imagined and regulated through development discourses and within institutions of global

governance The underlying premise of this volume is that the global development industry plays a central role in constructing people's sexual lives access to citizenship and struggles for livelihood Despite the industry's persistent insistence on viewing sexuality as basically outside the realm of economic modernization and anti poverty programs this volume brings to the fore heterosexual bias within macroeconomic and human rights development frameworks The work fills an important gap in understanding how people's intimate lives are governed through heteronormative policies which typically assume that the family is based on blood or property ties rather than on alternative forms of kinship By placing heteronormativity at the center of analysis this anthology thus provides a much needed discussion about the development industry's role in pathologizing sexual deviance yet also more recently in helping make visible a sexual rights agenda Providing insights valuable to a range of disciplines this book will be of particular interest to students and scholars of Development Studies Gender Studies and International Relations It will also be highly relevant to development practitioners and international human rights advocates The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9780203868348> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
