

Gender Mainstreaming in Early Childhood Education

Elli Scambor, Men's Counselling Centre Graz / Jens Krabel, Dissens e.V. Berlin

The following paper is a proposal for how a process of change towards gender equality in early childhood education can be implemented in five steps: Formulation of main objectives/ Gender Analysis /Formulation of subordinated targets /Implementation of measures / Evaluation. These Steps should not be perceived as completed process, rather as an open spiral, where evaluation is followed by analysis and the development of new objectives and/or subordinated targets.

I. Main Objectives

The strategy Gender Mainstreaming implies a clear gender equality main objective, but it has to be concretised for a certain field of interest. The project partners of Gender Loops have developed the following main objectives for gender equality in early childhood education:

- Enlarge gender identities of children, educators, parents, students and teachers.
- Improve the equal allocation of resources (executive positions, money, time, attention) among children, educators, parents, students and teachers
- Improve the gender competence (gender knowledge) and gender sensibility among children, educators, parents, students and teachers
- Increase the proportion of men participating in the training for educators and as educators, respectively.

II. Analysis

In a second step, the structure of institutionalised early childhood education should be analysed. Therefore the 3-R Method of gender analysis, developed by the Swedish scientist Gertrud Aström, will give evidence to gender specific disparities.

effective early learning practices Effective early childhood education involves an interdisciplinary collaborative process that is influenced by many factors We present these aforementioned realities in Educating Young Children With and Without Exceptionalities New Perspectives In addition we argue that general and special educators need to focus on applying new knowledge to better address critical issues that advance the field of educator preparation and improve educational outcomes for young children Early childhood research confirms the need for intensive intervention and remedial education we need to avoid approaches that are too little or too late Also proven to yield positive results for children are practices familiar to early childhood educators These practices include relationship based teaching and learning partnering with families adapting teaching for children from different backgrounds and for individual children active meaningful and connected learning and smaller class sizes Evidence of the benefits of these practices suggests that they should be extended more widely into the elementary grades
