History Marshall G. S. Hodgson, 1993-05-28 Is the history of the modern world the history of Europe writ large Or is it possible to situate the history of modernity as a world historical process apart from its origins in Western Europe In this posthumous collection of essays Marshall G S Hodgson challenges adherents of both Eurocentrism and multiculturalism to rethink the place of Europe in world history He argues that the line that connects Ancient Greeks to the Renaissance to modern times is an optical illusion and that a global and Asia centred history can better locate the European experience in the shared histories of humanity Hodgson then shifts the historical focus and in a parallel move seeks to locate the history of Islamic civilisation in a world historical framework In so doing he concludes that there is but one history global history and that all partial or privileged accounts must necessarily be resituated in a world historical context The book also includes an introduction by the editor Edmund Burke contextualising Hodgson s work in world history and Islamic history **From the**

Confronting Mainstream Economics for Overcoming Capitalism Rémy Herrera,2022-07-06 This book provides analytical arguments that demonstrate the necessity to go beyond not only mainstream economics but also and especially the capitalist economy itself It provides a radical critique of mainstream economics comparing it to an unscientific form of single thought and applies this criticism to the specific fields of growth development the institutions defense or the environment It targets both neoclassical economics and reformist soft heterodox currents from neoinstitutionalists to neo Keynesians including Thomas Piketty or Amartya Sen among others In doing so it rejects Keynes theories of money the crisis and the state It then offers a Marxist interpretation of the current crisis of capitalism considering it as a systemic crisis without solutions internal to its own logic and dynamics and emphasizes the links between this capitalist crisis and imperialist wars and the destruction of the environment and natural resources by capital The book concludes by arguing that we must find the necessary theoretical and practical alternatives in a Marxist perspective advocating for socialist transitions away from the capitalist economy to protect humanity and the environment

The Belt and Road Initiative and Australian Mainstream Media Jon Yuan Jiang,2024-04-01 This book focuses on Australian mainstream media narratives about the Belt and Road Initiative BRI from 2013 to 2020 Set against the background of Sino Australian relations and taking into account the different media systems of China and Australia this book also critically investigates the Chinese public diplomacy narratives of the BRI Drawing on my analysis and semi structured interviews with prominent experts in this area the book addresses an important but under explored question how have Australian mainstream media narratives portrayed the BRI of the Chinese Government from 2013 to 2020 This book fills a gap regarding the portrayal of the BRI in Australian mainstream media and provides new insights into the reasons for narrative shifts in the coverage of the BRI More concretely the book finds that the public diplomacy narratives of the BRI were not explained well by Chinese officials thus allowing Australian journalists and commentators to project their own negative fearful narratives of China onto the BRI project particularly from 2017 onwards More importantly this book argues that the Australian Federal Government s policy towards China had a significant impact on the Australian media s coverage of the BRI that the media clearly followed the Australian Federal Government s lead and not vice versa Thus in many ways Australian mainstream media narratives of the BRI have had a similar outcome as China s ostensibly much more restrictive and propagandistic state dominated media system Noticeably this book not only has academic significance in the international research community but also holds practical importance in the real world benefiting Australian business leaders media professionals think tank specialists and policymakers

Beyond Mainstream Explanations of the Financial Crisis Ismael Hossein-zadeh,2014-04-16 This book provides a critique of the neoclassical explanations of the 2008 financial collapse of the ensuing long recession and of the neoliberal austerity responses to it The study argues that while the prevailing views of deregulation and financialization as instrumental culprits in the explosion and implosion of the financial bubble are not false they fail to point out that financialization is essentially an indication of an advanced stage of capitalist development These standard explanations tend to ignore the systemic dynamics of the accumulation of finance capital the inherent limits to that accumulation production and division of economic surplus class relations and the balance of social forces that mold economic policy Instead of simply blaming the irrational behavior of market players as neoliberals do or lax public supervision as Keynesians do this book focuses on the core dynamics of capitalist development that not only created the financial bubble but also fostered the irrational behavior of market players and subverted public policy Due to its interdisciplinary perspective this book will be of interest to students and researchers in economics finance politics and sociology

development of Austrian philosophy at the turn of the 20th century and a reevaluation of the impact and significance of his philosophy of mind or descriptive psychology which was Brentano's most important contribution to contemporary philosophy and to the philosophy in Vienna. In addition, the relation between Brentano's phenomenology and the Vienna Circle is investigated together with a related documentation of Brentano's disciple Alfred Kastil in German. The general part deals with the ongoing discussion of Carnap's *Aufbau*, Vienna Circle Lecture by Alan Chalmers and the philosophy of mind with a focus on physicalism as discussed by Carnap and Wittgenstein. Gergely Ambrus's usual two reviews of recent publications in the philosophy of mathematics, Paolo Mancosu and research on Otto Neurath's lifework, Jordi Cat, Adam Tuboly are included as related research contributions. This book is of interest to students, historians and philosophers dealing with the history of Austrian and German philosophy in the 19th and 20th century.

Out of the Mainstream Rutgerd Boelens, David H. Getches, Jorge Armando Guevara Gil, 2010. Water is not only a source of life and culture. It is also a source of power, conflicting interests and identity battles. Rights to materially access, culturally organize and politically control water resources are poorly understood by mainstream scientific approaches and hardly addressed by current normative frameworks. These issues become even more challenging when law and policy makers and dominant power groups try to grasp, contain and handle them in multicultural societies. The struggles over the uses, meanings and appropriation of water are especially well illustrated in Andean communities and local water systems of Peru, Chile, Ecuador and Bolivia, as well as in Native American communities in south western USA. The problem is that throughout history these nation states have attempted to civilize and bring into the mainstream the different cultures and peoples within their borders instead of understanding context and harnessing the strengths and potentials of diversity. This book examines the multi-scale struggles for cultural justice and socio-economic redistribution that arise as Latin American communities and user federations seek access to water resources and decision-making power regarding their control and management. It is set in the dynamic context of unequal globalizing power relations, politics of scale and identity, environmental encroachment and the increasing presence of extractive industries that are creating additional pressures on local livelihoods. While much of the focus of the book is on the Andean Region, a number of comparative chapters are also included. These address issues such as water rights and defence strategies in neighbouring countries and those of Native American people in the southern USA, as well as state reform and multiculturalism across Latin and Native America and the use of international standards in struggles for indigenous water rights. This book shows that against all odds, people are actively contesting neoliberal globalization and water power plays. In doing so, they construct new hybrid water rights systems, livelihoods, cultures and hydro-political networks and dynamically challenge the mainstream powers and politics.

Appalachia's Alternative to Mainstream America Paul Salstrom, 2023-08-18 In many communities across North America in the 1960s and 1970s the rural relocation movement became both a way of life and a path forward for many people inclined to buck the mainstream and Paul Salstrom embraced it His experiences in rural Lincoln County West Virginia led him to the self sufficient neighborly networking lifestyle well known in many Appalachian communities since the early nineteenth century In Appalachia's Alternative to Mainstream America Salstrom outlines his Appalachian experiences in a memoir revisiting this back to the land tradition that guided his cultural experience during this time While he pursued a number of experimental alternatives to a mainstream way of life during the late 1960s it was not until he landed in Lincoln County a few years later that he found himself engaging in an alternative way of living that didn't feel experimental at all This distinctive way of life was largely characterized by a closer connection to the earth local sufficiency informed by homesteading subsistence farming and gardening and the community wide trading of favors in a spirit of mutual aid Over

time Salstrom's engagement in this neighborly occupation has nurtured an informed belief that Americans will be drawn back to landed customs taking care of the earth and of one another to thrive as individuals and communities Facing today's pandemics climate change and deepening political divisions says Salstrom Americans urgently need to create a groundswell of localized food security and energy production
