Buffalo Medical Journal and Monthly Review of Medical and Surgical Science ,1849 Institutionalizing Gender
Jessie Hewitt,2020-06-15 Institutionalizing Gender analyzes the relationship between class gender and psychiatry in France from 1789 to 1900 an era noteworthy for the creation of the psychiatric profession the development of a national asylum system and the spread of bourgeois gender values Asylum doctors in nineteenth century France promoted the notion that manliness was synonymous with rationality using this fact to pathologize non normative behaviors and confine people who did not embody mainstream gender expectations to asylums And yet this gendering of rationality also had the power to upset prevailing dynamics between men and women Jessie Hewitt argues that the ways that doctors used dominant gender values to find cures for madness inadvertently undermined both medical and masculine power in large part because the performance of gender as a pathway to health had to be taught it was not inherent Institutionalizing Gender examines a series of controversies and clinical contexts where doctors ideas about gender and class simultaneously legitimated authority and revealed unexpected opportunities for resistance Thanks to generous funding from the Andrew W Mellon Foundation through The Sustainable History Monograph Pilot the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories Army Medical Bulletin U.S. Army Medical Dept,United States. national health services systems The modern fields of psychiatry and mental health care are located at the intersection of these spheres There emerged concepts practices and institutions that marked responses to challenges posed by urbanization industrialization and the formation of the nation state These psychiatric responses were locally distinctive and yet at the same time established influential models with an international impact In spite of rising nationalism in Europe the intellectual institutional and material resources that emerged in the various local and national contexts were rapidly observed to have had an impact beyond any national boundaries In numerous ways innovations were adopted and refashioned for the needs and purposes of new national and local systems

International Relations in Psychiatry Britain Germany and the United States to World War II brings together hitherto separate approaches from the social political and cultural history of medicine and health care and argues that modern psychiatry developed in a constant though not always continuous transfer of ideas perceptions and experts across national borders Contributors John C Burnham Eric J Engstrom Rhodri Hayward Mark Jackson Pamela Michael Hans Pols Volker Roelcke Heinz Peter Schmiedebach Mathew Thomson Paul J Weindling Louise Westwood Volker Roelcke is professor and director at the Institute for the History of Medicine Giessen University Germany Paul J Weindling is professor in the history of medicine Oxford Brookes University UK Louise Westwood is honorary research reader University of Sussex UK

Madness Mary de Young, 2014-01-10 Madness is of course personally experienced but because of its intimate relationship to the sociocultural context it is also socially constructed culturally represented and socially controlled all of which make it a topic ripe for sociological analysis Using a range of historical and contemporary textual material this work exercises the sociological imagination to explore some of the most perplexing questions in the history of madness including why some behaviors thoughts and emotions are labeled mad while others are not why they are labeled mad in one historical period and not another why the label of mad is applied to some types of people and not others by whom the label is applied and with what consequences Journal of Comparative Legislation and International Law, 1899 Includes annual Review of legislation covering the years 1859 1949

Inheriting Madness Ian Dowbiggin, 1991-05-14 Historically one of the recurring arguments in psychiatry has been that heredity is the root cause of mental illness In *Inheriting Madness* Ian Dowbiggin traces the rise in popularity of hereditarianism in France during the second half of the nineteenth century to illuminate the nature and evolution of psychiatry during this period In Dowbiggin's mind this fondness for hereditarianism stemmed from the need to reconcile two counteracting factors On the one hand psychiatrists were attempting to expand their power and privileges by excluding other groups from the treatment of the mentally ill On the other hand medicine's failure to effectively diagnose cure and understand the causes of madness made it extremely difficult for psychiatrists to justify such an expansion

These two factors Dowbiggin argues shaped the way psychiatrists thought about insanity encouraging them to adopt hereditarian ideas such as the degeneracy theory to explain why psychiatry had failed to meet expectations Hereditarian theories in turn provided evidence of the need for psychiatrists to assume more authority resources and cultural influence Inheriting Madness is a forceful reminder that psychiatric notions are deeply rooted in the social political and cultural history of the profession itself At a time when genetic interpretations of mental disease are again in vogue Dowbiggin demonstrates that these views are far from unprecedented and that in fact they share remarkable similarities with earlier theories A familiarity with the history of the psychiatric profession compels the author to ask whether or not public faith in it is warranted

Sensational Deviance Heidi Logan, 2018-07-06 Sensational Deviance Disability in Nineteenth Century Sensation Fiction investigates the representation of disability in fictional works by the leading Victorian sensation novelists Wilkie Collins and Mary Elizabeth Braddon exploring how disability acts as a major element in the shaping of the sensation novel genre and how various sensation novels respond to traditional viewpoints of disability and to new developments in physiological and psychiatric knowledge The depictions of disabled characters in sensation fiction frequently deviate strongly from typical depictions of disability in mainstream Victorian literature undermining its stigmatized positioning as tragic deficit severe limitation or pathology Close readings of nine individual novels situate their investigations of physical sensory and cognitive disabilities against the period's disability discourses and interest in senses perception stimuli the nervous system and the heritability of impairments The importance of moral insanity and degeneration theory within sensation fiction connect the genre with criminal anthropology suggesting the genre's further significance in the light of the later emergence of eugenics psychoanalysis and genetics
