Making Re Engineering Happen:

Business Process Reengineering Sanjay Mohapatra, 2012-12-16 Business process reengineering BPR focuses on redesigning the strategic and value added processes which transcend the organizational boundaries. It is a cross functional approach that requires support from almost all the departments of the organization. Business Process Reengineering Automation Decision Points in Process Reengineering offers a new framework based process reengineering and links it to organization life cycle process life cycle and process management. This volume describes the fundamental concepts behind business process reengineering and examines them through case studies and should appeal to researchers and academics interested in business process reengineering operations strategy and organizational restructuring and design. *The Reengineering Revolution* David Knights, Hugh Willmott, 2000-01-26 The Reengineering Revolution reviews the significance of the Business Process Reengineering trend for management practice since the early 1990s. Combining empirical and theoretical perspectives, David Knights and Hugh Willmott show how both term and practice shaped the recent widely adopted policies of downsizing restructuring and emphasis on process rather than task. Well known contributors analyze the impact of Business Process Reengineering in a number of settings: supermarkets and the food chain, the public sector, banks. The theoretical history of Business Process Reengineering is also detailed in relation to ideas about bureaucracy, hierarchy, transformation and design. Reengineering the Corporation Michael Hammer, James Champy, 2009-10-13 The most successful business book of the last decade, Reengineering the Corporation is the pioneering work on the most important topic in business today: achieving dramatic performance improvements. This book leads readers through the radical redesign of a company's processes, organization and culture to achieve a quantum leap in performance. Michael Hammer and James Champy have updated and revised their milestone work for the New Economy; they helped to create promising ways to help corporations save hundreds of millions of dollars, more raise their customer satisfaction still higher and grow ever more nimble in the years to come. *Reengineering Health Care* Terry McNulty, Ewan Ferlie, 2002-03-21 Organizations are being urged to experiment with new structures and processes. A process perspective on organizing is emerging as a major challenge to functional principles of organizing established during the last century. Business process reengineering is one exemplar of process thinking that has received great attention amongst organizational theorists and practitioners. This in depth account of business process reengineering within a major NHS hospital is an important contribution to the very limited stock of empirical knowledge about new organizational forms, especially in the public sector. The book combines empirical data gathered through an intensive comparative case study method with strategic choice and neo institutional theories to analyse the changing context of public organizations, importation of models of organizing from private to public organizations and dynamics of public sector transformation. The outcomes of the change programme add to our more general organizational knowledge about the impact of corporate change programmes, particularly in professionalized and public

sector settings b impediments and enablers of lateral organizing structures and processes and c contradictions within the New Public Management between functional and process principles for organizing
