Introduction to Political Psychology Prof. Dr. Bilal Semih Bozdemir, Schemas cognitive structures that organize knowledge and guide information processing are fundamental in shaping political judgments They consist of preconceived notions about political entities including parties ideologies and individuals that affect how information is perceived and interpreted For instance an individual with a schema that associates an opposing political party with corruption may filter new information through this lens leading to an automatic dismissal or reinterpretation of positive news about that party The influence of schemas is further compounded by the social context in which individuals operate Group norms and values often dictate what is deemed acceptable within a political discourse This social interdependence affects not only personal judgments but also broader political ideologies that dominate public discussions *Living Political Ideas* Geoff

Andrews, Michael Saward, 2005 This book aims to show that political ideas theories ideologies live in two senses ordinary people live their consequences and they change and adapt with the rhythms of political life It explores key political ideas in depth interrogating them through historical and conceptual analysis and case materials **Introduction to Global Politics**

Taylor, 2013-06-17 Fully revised and updated the second edition of *Introduction to Global Politics* places an increased emphasis on the themes of continuity and change It continues to explain global politics using an historical approach firmly linking history with the events of today By integrating theory and political practice at individual state and global levels students are introduced to key developments in global politics helping them make sense of major trends that are shaping our world This is a highly illustrated textbook with informative and interactive boxed material throughout Chapter opening timelines contextualise the material that follows and definitions of key terms are provided in a glossary at the end of the book Every chapter ends with student activities cultural materials and annotated suggestions for

further reading that now include websites Key updates for this edition New chapter on The causes of war and the changing nature of violence in global politics New chapter on Technology and global politics Enhanced coverage of theory including post positivist theories Uses levels of analysis framework throughout the text New material on the financial crisis BRIC and Iran Introduction to Global Politics continues to be essential reading for students of political science global politics and international relations

Reading the Postwar Future Kirrily Freeman, John Munro, 2019-10-17 This original collection explores a number of significant texts produced in 1944 that define that year as a textual turning point when overlapping and diverging visions of a new world emerged The questions posed at that moment about capitalism race empire nation and cultural modernity gave rise to debates that defined the global politics of their era and continue to delineate our own Highlighting the goals agendas and priorities that emerged for artists intellectuals and politicians in 1944 Reading the Postwar Future rethinks the intellectual history of the 20th century and the way 1944 s texts shaped the contours of the postwar world This is essential reading for any student or scholar of the intellectual political economic and cultural history of the postwar era

Concepts That Shape Politics and Government in Cameroon Akwalefo Bernadette Djeudo, 2013-10-30 In this book the reader is introduced to the concepts of politics government political theory and political culture with reference to Cameroon Defined as human activity concerned with controversies over public questions and the resolution of those controversies politics is concerned with the affairs of government and because government action deeply affects us we take a lively interest in what governments do We form associations and organize campaigns to articulate our demands We negotiate with others and try to shape the goals that governments pursue When we disagree with the policies of the government we protest and organize demonstration to persuade our governments to change the existing laws We passionately debate the actions of our representatives In this way we look for the rationale underlying the prevalent chaos and decay and aspire to create a better world To sum up politics arises from the fact that we have different visions of what is just and desirable for us and our society Politics exist because we possess reason and the ability to reflect on government actions and communicate our innermost thoughts and desires with each other Political theory has its roots in these twin aspects of the human being Defined as a network of concepts and generalizations about political life involving ideas assumptions and statements about the nature purpose and key features of government Political theory systematically thinks about the values that inform political life values such as freedom equality justice nationalism secularism development etc It explains the meanings and significance of these and other related concepts by focusing on some major political thinkers theologians kings economists sociologists popes etc of the past and present It also examines the extent to which freedom or equality are actually present in the institutions that we participate in everyday such as schools shops buses or trains or government offices and it looks at whether existing definitions and institutions are adequate or must be modified to become more democratic The objective of political theory is to train citizens to think rationally about political questions and assess

correctly the political events of our time In applying political theory some countries are more successful than others due to the variations in political culture A country s degree of success in operating a governmental system that is democratic in character depends to a very large extent upon the nature and content of the political culture of that country For democracy to work the country s political culture must be compatible with and support the very concepts of constitutionalism the rule of law and representative democracy as well as be consistent with and sustain the country s established agreed upon Constitution including the constitutionally prescribed procedures for managing and resolving controversy over public questions making and carrying out authoritative decisions on public policy protecting the rights and liberties of citizens and peacefully transferring governing authority from one group of political leaders to another In all discussions examples are drawn from Cameroon and elsewhere in the world

Explaining Political Judgement Perri 6,2011-09-22 What is political judgement Why do politicians exhibit such contrasting thought styles in making decisions even when they agree ideologically What happens when governments with contrasting thought styles have to deal with each other In this book Perri 6 presents a fresh rigorous explanatory theory of judgement its varieties and its consequences drawing upon Durkheim and Douglas He argues that policy makers will understand and misunderstand their problems and choices in ways that reproduce their own social organisation This theory is developed by using the Cuban Missile Crisis of 1962 as an extended case study examining the decision making of the Kennedy Castro and Khrushchev regimes Explaining Political Judgement is the first comprehensive study to show what a neo Durkheimian institutional approach can offer to political science and to the social sciences generally

Anatomy of Political Choice ARTUR VICTORIA,2025-06-08 The Anatomy of Political Choice investigates the fascinating and often frustrating world of political decision making exploring the mechanisms through which laws policies and the allocation of resources are determined We examine the various actors involved in the process from elected officials and bureaucrats to lobbyists and the general public and analyse how their interactions shape the final outcomes We address the dynamics of negotiation compromise and conflict resolution recognising both the successes and failures of different approaches This analysis goes beyond the mechanics of decision making exploring the underlying power dynamics ideological differences and public opinion that influence decisions The analysis also considers the ethical implications of political choices emphasising the importance of accountability transparency and fairness By understanding the anatomy of political choice we can strive for a more informed fair and effective system of governance We will explore how these decisions are made the factors that influence them and the ultimate consequences for society In essence politics is a dynamic tension between conflict and co operation While conflict results from divergent ideologies competing interests and power struggles co operation is essential for achieving collective goals adopting effective policies and maintaining social order We analyse this inherent duality and provide a comprehensive framework for understanding how these seemingly opposing forces shape political outcomes We explore the sources of conflict the mechanisms of co operation and the impact

of institutional design and social factors on both The book is designed to be both academically rigorous and accessible appealing to students researchers policy makers and informed citizens We hope that this analysis will enable readers to engage more critically with the complex political landscape and contribute to more effective policy processes **European Citizenship Practice** Antje Wiener,2018-02-19 Although great efforts have been made to understand citizenship it has remained a contested concept largely because of the problem of the changing relationship between citizens and their community of membership or belonging The European Union poses the most recent and dramatic change to this definition of citizenship Arguing that citizenship must be explored from a perspective that takes this continual change into account Antje Wiener develops the concept of citizenship practice the process of policymaking and or political participation which contributes to creating the terms of citizenship The approach draws on both comparative social historical literature on the state and the new historical institutionalism in European integration theories European Citizenship Practice advances a discursive analysis of citizenship practice based on these related bodies of literature which lie at the heart of this important contribution to citizenship studies The Routledge Handbook of Global and Digital Governance Crossroads Preeti Shroff-Mehta,Jagdish.N Sheth,John Garrison,Shailendra Raj Mehta,2024-08-26 This handbook maps and analyzes cross sector public corporate social community faith governance theories models and practices as they are evolving in a digital world It studies human cultural societal institutional interactions and challenges in a digitally enabled world especially in the context of post crisis resilience and agility Every global crisis forces societies and nations to realign while addressing deeper structural and cultural issues in governance The Covid 19 pandemic has necessitated swift local to global governance responses for timely digital innovations for health crisis interventions economic recovery and societal equity While every nation state is developing global pandemic responses in a digitally enabled world the deeper crisis of human institutional and societal governance deficit is also evident This handbook documents digital governance innovations that enhance stakeholder engagement and inclusion for resilient accountable and effective governance across sectors This volume reflects on a range of theoretical frameworks adapted for understanding global and digital governance It looks at international governance collaborations corporate governance reform education governance innovations public sector and urban governance health system governance sustainability and environmental governance community and faith based governance and digital cultural and creativity governance This book is unique as it presents important work on post Covid 19 digital and democratic governance and brings together holistic interdisciplinary and intersectoral perspectives from the Global North and Global South engaging the leading scholars practitioners businesses and civil society It will be of interest to multi sector institutions and global audiences governments corporates social sector institutions digital entrepreneurs students and researchers academic professionals policy makers public and private sector institutional leaders and organizational and entrepreneurial innovators interested in the field of governance **China, Oil and Global Politics** Philip Andrews-Speed,Roland

Dannreuther, 2011-05-12 China's rapid economic growth has led to a huge increase in its domestic energy needs. This book provides a critical overview of how China's growing need for oil imports is shaping its international economic and diplomatic strategy and how this affects global political relations and behaviour. Part One is focused on the domestic drivers of energy policy; it provides a systematic account of recent trends in China's energy sector and assesses the context and processes of energy policy making and concludes by showing how and why China's oil industry has spread across the world in the last fifteen years. Part Two analyses the political and foreign policy implications of this energy driven expansion and the challenges this potentially poses for China's integration into the international system. It examines a number of factors linked to this integration in the energy field including the unpredictabilities of internal policymaking, China's determination to promote its own critical national interests and the general ambition of the Chinese leadership to integrate with the international system on its own terms and at its own speed. The highly topical book draws together the various dimensions of China's international energy strategy and provides insights into the impact of this on China's growing international presence in various parts of the world.

The Shaping of Socio-Economic Systems Thomas Baumgartner, Tom Burns, Philippe DeVillie, 2014-08-07 Actor systems dynamics is an innovative multidisciplinary methodology for investigating and analyzing social struggles over economic resources and the related interplay between economic and socio-political institutions and processes. The authors, sociologists and economists, offer a systemic perspective on contemporary socio-economic issues such as economic crisis, unemployment, inflation, economic democracy and development. In their analyses, they identify several of the key factors that drive people to interact to initiate change and transformation as well as to resist such change. Major underlying themes in the book are: Conflict over the distribution of economic resources and economic policies and institutions; the structural bases of economic inequality and conflict; the shaping and reshaping of socio-economic institutions and the contradictions, conflicts and instabilities evoked by such developments; the failure of orthodox economic theories including Keynesianism in the face of recurrent economic crises and instabilities; the development and application of an open dynamic actor-oriented systems theory grounded in the social sciences addressing complex socio-economic phenomena in ways diverging substantially from conventional economics. All in all, the papers collected here deal on the one hand with social power conflict and struggle concerning economic resources and institutions and on the other hand the structural and other factors which drive powering initiatives, conflict and social innovation and transformation. The book is addressed to a broad spectrum of social and managerial scientists concerned with socio-economic issues, institutions and development.
