The Solar System Jennifer Lawson, 2001 The 16 lessons in this module introduce students to the solar system through an investigation of the planets and the sun. Students explore the earth-sun relationship in terms of the day-night cycle and the year cycle. As well, students investigate the characteristics of the moon, its phases and its eclipses. Students also explore gravity and the constellations and the history of space exploration. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record-keeping templates. *Hands-On Science, Level 6*

Jennifer Lawson, 2000 This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 6 students use and develop, and a classroom assessment plan complete with record-keeping templates. The guide has four instructional units: Unit 1 Diversity of Living Things, Unit 2 Flight, Unit 3 Electricity, Unit 4 The Solar System. Each unit is divided into lessons that focus on specific curricular outcomes. Each lesson has materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. *15-Minute STEM Book 2*

Emily Hunt, 2020-12-08 Emily Hunt's 15 Minute STEM Book 2: More quick creative science, technology, engineering, and mathematics activities for 5-11 year olds offers a stimulating selection of easy-to-resource STEM activities designed to engage and inspire young learners. Like most teachers and parents, you probably recognise STEM as being an important priority area for modern education. You may however be wondering: What does STEM education look like for young learners? How do I get children excited about STEM education? How can children learn STEM skills in just 15 minutes? What equipment do I need to teach STEM activities? Enter 15 minute STEM with the answers! Full of engaging and practical ideas, this innovative resource builds on the success of Emily's 15 Minute STEM. ISBN 978 178583335 9 and reassures teachers and parents that they don't need to be experts to deliver high quality STEM education. Each of the 40 activities includes step-by-step instructions, takes just 15 minutes to complete, and can be resourced from everyday materials found in the classroom or at home. This means that with minimal preparation, teachers and parents can slot these cross-curricular activities into an otherwise busy day simultaneously broadening children's learning and piquing their curiosity about the world around them. Accompanying instructions are phrased in a way that encourages the children to lead the learning and exploration, and opportunities for further investigation are provided in order to broaden the learning focus. Hand-drawn illustrations and full-colour photographs are also included alongside each activity to give an idea of what the end results might look like. The activities make connections to real-world scenarios and have been linked to conceptually similar STEM-related careers, all of which are individually profiled in a glossary at the back of the book. The practical problem-solving element of each activity offers a great way for children to

develop important soft skills such as creativity critical thinking and spatial awareness Suitable for both educators and parents of young children **Official Gazette of the United States Patent Office** United States. Patent Office,1891
