National Governance And The Global Climate Change Regime:

National Governance and the Global Climate Change Regime Dana Fisher, 2004 How do domestic interests affect international policymaking What is the role of the nation state within multilateral regimes How can we understand the diversity of state responses to the internationalization of environmental regulation National Governance and the Global Climate Change Regime compares the roles of different actors and institutions in international environmental policymaking It focuses on the formation of a legally binding treaty to reduce greenhouse gases the Kyoto Protocol to show how domestic interests affect international treaty negotiations Dana Fisher combines quantitative analysis of social economic and environmental data for the member states of the OECD with qualitative case studies of three key countries the United States Japan and the Netherlands She argues compellingly that domestic debates within states and subsequent national policy formation have a significantly larger role in international environmental regime formation than many scholars recognize

The Global Development Of Policy Regimes To Combat Climate Change Alex Bowen, Nicholas Stern, John Whalley, 2014-04-01 The year 2015 will be a landmark year for international climate change negotiations Governments have agreed to adopt a universal

legal agreement on climate change at the 21st Conference of Parties COP21 to the United Nations Framework Convention on Climate Change UNFCCC in Paris in 2015 The agreement will come into force no later than 2020 This book focuses on the prospects for global agreement how to encourage compliance with any such agreement and perspectives of key players in the negotiations the United States India China and the EU It finds that there is strong commitment to the established UN institutions and processes within which the search for further agreed actions will occur There are already a myriad of local and regional policies that are helping to reduce greenhouse gas emissions and build mutual confidence However the chapters in the book also highlight potential areas of discord For instance varying interpretations of the common but differentiated responsibilities of developing countries agreed as part of the UNFCCC could be a major sticking point for negotiators When combined with other issues such as the choice of consumption or production as the basis for mitigation commitments the appropriate time frame and base date for their measurement and whether level or intensity commitments are to be negotiated the challenges that need to be overcome are considerable The authors bring to bear insights from economics public finance and game theory

Environmental Policy David M.Konisky,2020-04-24 A comprehensive analysis of diverse areas of scholarly research on U S environmental policy and politics this Handbook looks at the key ideas theoretical frameworks empirical findings and methodological approaches to the topic Leading environmental policy scholars emphasize areas of emerging research and opportunities for future enquiry **Rethinking Authority in Global Climate Governance** Thomas Hickmann,2015-10-16

In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development **Global Climate Governance** David Coen,Julia Kreienkamp,Tom Pegram,2020-12-17
