**Why Wellness Sells** Colleen Derkatch, 2022-12-13 How and why the idea of wellness holds such rhetorical and harmful power In *Why Wellness Sells* Colleen Derkatch examines why the concept of wellness holds such rhetorical power in contemporary culture Public interest in wellness is driven by two opposing philosophies of health that cycle into and amplify each other restoration where people use natural health products to restore themselves to prior states of wellness and enhancement where people strive for maximum wellness by optimizing their body's systems and functions *Why Wellness Sells* tracks the tension between these two ideas of wellness across a variety of sources including interviews popular and social media advertising and online activism Derkatch examines how wellness manifests across multiple domains where being well means different things ranging from a state of pre illness to an empowered act of good consumer citizenship from physical or moral purification to sustenance and care and from harm reduction to optimization Along the way Derkatch demonstrates that the idea of wellness may promise access to the good life but it serves primarily as a strategy for coping with a devastating and overwhelming present Drawing on scholarship in the rhetoric of health and medicine the health and medical humanities and related fields Derkatch offers a nuanced account of how language belief behavior experience and persuasion collide to produce and promote wellness one of the most compelling and harmful concepts that govern contemporary Western life She explains that wellness has become so pervasive in the United States and Canada because it is an ever moving and thus unachievable goal The concept of wellness entrenches an individualist model of health as a personal responsibility when collectivist approaches would more readily serve the health and well being of whole populations

**Complementary Medicine in Australia and New Zealand** Hans Baer,2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in

Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States     Insiders' Guide® to Seattle Shelley Seale,2010-12-07 A first edition Insiders Guide to Seattle is the essential source for in depth travel and relocation information to this thriving city in the Pacific Northwest Written by a local and true insider this guide offers a personal and practical perspective of Seattle and its surrounding environs     *Pharmacovigilance for Herbal and Traditional Medicines* Joanne Barnes,2022-08-11 This remarkable new book is the first text dedicated to the topic of pharmacovigilance for herbal and traditional medicines Taking a truly global perspective this volume draws together contributions from a diverse group of experts writing on current knowledge and practices in pharmacovigilance for herbal and traditional medicines and on advances and innovation in monitoring the safety of this unique and complex category of products and preparations In part one the book discusses the current status of pharmacovigilance for herbal and traditional medicines including the importance of natural products chemistry to harms and its relevance in considering how pharmacovigilance for these products could be undertaken Several other chapters discuss methodological approaches and ongoing challenges in pharmacovigilance for herbal and traditional medicines including issues relating to nomenclature coding and classification and the nuances involved in causality assessment Part two of the book focusses on pharmacovigilance for herbal and traditional medicines around the world with chapters from authors in several different countries representing diverse historical ethnic cultural social and political contexts These chapters provide deeper insights and perspectives into spontaneous reporting for herbal and traditional medicines in those countries and in the context of the local use practice and regulatory landscape for these products Part two also provides an overview and new analysis of international case safety reports for herbal medicines held in VigiBase the World Health Organization's global database of individual case safety reports maintained by the Uppsala Monitoring Centre This book is aimed at pharmacists doctors nurses and other health professionals herbal medicine practitioners and organisations herbal medicine and pharmaceutical industry personnel pharmacovigilance specialists medicines regulators health and social science researchers and academics pharmacovigilance and health professional students and students of herbal and traditional medicine throughout the world It is an extremely valuable resource for all individuals whose work touches the intersection between herbal medicines and pharmacovigilance and it provides both an introduction to the topic and a deeper comprehensive contemporary account of the topic     **Alternative Medicine** Larry Trivieri, Jr.,John W.

Anderson,2002 21st Century Science Collection      **Fundamentals of HIV Medicine 2021** W. David Hardy,2021

Fundamentals of HIV Medicine 2021 is the AAHIVM s end to end clinical resource for the treatment of individuals with HIV AIDS Now updated with HIV workforce strains and PrEP newly emerging antiretroviral treatment options and the evolving effects of COVID 19 on HIV care      Alternative Medicines Stefano Maddalena,2005 During the past few decades alternative medicines have gained increasing importance in Western countries This book is the first extensive comparative and interdisciplinary study on the subject The recent evolution of these alternative techniques is considered from the perspective of their integration into Western medical systems The first part of the research is an overview of the current position of alternative medicines in some Western countries Sociological elements as well as various research and educational issues are presented The study then focuses on the licensing to practise alternative medicine and the coverage of alternative medicines The second part of the study analyses and compares the most important regulatory mechanisms Proposals are also made for the regulation of alternative medicines The last chapter deals with the concept of an integrated system of medicine The main components of the system are presented and compared to current trends and a theoretical model Moreover the book addresses the questions What is an integrated system of medicine Are we moving towards such a system If so what are the reasons and is such a shift reasonable and feasible      Comparative Health Law and Policy Irehobhude O. Iyioha,Remigius N. Nwabueze,2016-05-23 Health law and policy in Nigeria is an evolving and complex field of law spanning a broad legal landscape and drawn from various sources In addressing and interacting with these sources the volume advances research on health care law and policy in Nigeria and spells the beginning of what may now be formally termed the Nigerian health law and policy legal field The collection provides a comparative analysis of relevant health policies and laws such as reproductive and sexual health policy organ donation and transplantation abortion and assisted conception with those in the United Kingdom United States Canada and South Africa It critically examines the duties and rights of physicians patients health institutions and organizations and government parastatals against the backdrop of increased awareness of rights among patient populations The subjects which are discussed from a legal ethical and policy reform perspective critique current legislation and policies and make suggestions for reform The volume presents a cohesive comparative and comprehensive analysis of the state of health law and policy in Nigeria with those in the US Canada South Africa and the UK As such it provides a valuable comparison between Western and Non Western countries
