Natural History Of Badgers:

Badgers Ernest G. Neal, C. L. Cheeseman, 1996 *The Natural History of Badgers* Ernest G. Neal, **The Natural History of Badgers** Ernest Neal, 1986 *Natural History of Badgers* Ernest Gordon Neal, 1988-01-31 **The Conservation and Management of the European Badger (Meles Meles)** Huw I. Griffiths, David H. Thomas, Council of Europe, 1997-01-01 **RSPB Spotlight: Badgers** James Lowen, 2016-06-16

The Spotlight series introduces readers to the lives and behaviours of our favourite animals with eye catching colour photography and informative expert text. Badgers are elusive wanderers of the night and few mammals are as mysterious. Their nocturnal lifestyle means not many of us have ever glimpsed their monochrome form as they sniff and bustle their way through woodland or across pasture yet most of us live far closer to a Badger group than we might think. In *Spotlight Badgers* James Lowen explores all aspects of their lives including their communal living feeding habits as well as the major threats to and conservation support for Badgers. These iconic omnivores are widely represented in folklore and have permeated our popular culture. Generations of children have been entranced by Badger in Kenneth Grahame's book *Wind in the Willows* however these determined yet mostly peaceful animals have also been loathed and persecuted for centuries. Badger baiting is thankfully now illegal but the legal badger cull introduced in 2011 in parts of Gloucestershire and Somerset remains in place following the 2015 general election. With so much politics surrounding Badgers in the UK it's not easy to get unbiased information. In *RSPB Spotlight Badgers* James Lowen keeps a neutral tone on the debate about Badger culling. He describes the history from the first Badger found to be infected with bTB in 1972 and the subsequent gassing of setts from 1975 to 1982. He also outlines the RSPB's stance on the Badger cull. As one of the UK's largest landowners the RSPB oppose Badger culling on their land in favour of vaccination, cattle testing, bio security and movement controls.

[Thinking Through Badgers](#) Stephan Price, 2020-10-06. Bovine tuberculosis is seriously damaging the UK dairy and beef industry. Many farmers believe culling badgers must be part of the solution but in 2013 a record 300 000 people signed a Downing Street petition asking the government to stop planned culls of badgers in Somerset and Gloucestershire fuelling media controversy and signalling the beginning of a social conflict that was acted out in studios, streets, fields and village halls across England. The four year trial culls which began that year aimed to establish that culling was a viable way of tackling the disease but the widely divergent experiences and values of policy makers, farming, conservation and animal welfare supporters means that decades of science on the disease in badgers and the effects of culling has not helped resolve the dispute. Reporting on original UK research, council funded social science, this book takes on the challenge of understanding the contrasting views involved. Listening carefully to what the different protagonists have to say, the book unpicks the way science is interpreted to sustain differing conclusions and considers how social science thinking could contribute. The book develops a critical perspective on the increasingly important literature influenced by new materialism, the social science response to the Science Wars and explores the extent to which a social

movement around opposition to the culls is emerging In approachable prose this access all areas account describes the struggle to develop understanding through the messy process of research and the difficulties of scientific analysis and philosophical thought As such it provides a valuable resource for both research practitioners and teachers within the social sciences as well as an accessible way for biological scientists conservationists and farmers to reflect on the issues around the management of disease in livestock and wildlife Bulletin of the American Museum of Natural History American Museum of Natural History,1891 Comprises articles on geology paleontology mammalogy ornithology entomology and anthropology
