centuries Understanding how these rivers and rivers in general function and how these functions have been altered over time will allow us to find innovative approaches to restoring river ecosystems Wide Rivers Crossed looks at these historical changes and discusses opportunities for much needed protection and restoration for the future South Suburban Airport, Chicago Region, Draft Environmental Assessment (EA) B1(3v); Phase I Engineering Report Summary Draft B2; Letter of Transmittal and Press Release B3; Final Environmental Assessment (EA) ,1998 **Illinois; a Descriptive and Historical Guide**, Best Books on,1939 originally compiled and written by the Federal writers project for the state of Illinois Rev with additions in 1946 **The WPA Guide to Illinois** Federal Writers' Project,2013-10-31 During the 1930s in the United States the Works Progress Administration developed the Federal Writers Project to support writers and artists while making a national effort to document the country s shared history and culture The American Guide series consists of individual guides to each of the states Little known authors many of whom would later become celebrated literary figures were commissioned to write these important books John Steinbeck Saul Bellow Zora Neale Hurston and Ralph Ellison are among the more than 6 000 writers editors historians and researchers who documented this celebration of local histories Photographs drawings driving tours detailed descriptions of towns and rich cultural details exhibit each state s unique flavor The Prarie State nestled in the heart of the Midwest among the Great Lakes and Mississippi River is finely represented in the WPA Guide to Illinois The section on Chicago could stand alone as a guidebook in itself spanning over 100 pages and incorporating the history and tourist attractions of the city An essay about Abraham Lincoln by then governor Henry Horner 26 total tours of the state and a list of 50 books about the state of Illinois are also included in this extensive guide Earth Shapers Maxim Samson,2025-10-13 The globetrotting story of how humans have harnessed the geographical landscape and written ourselves onto our surroundings Mountains meridians rivers and borders these are some of the features that divide the world on our maps and in our minds But geography is far less set in stone than we might believe and as Maxim Samson s Earth Shapers contends in our relatively short time on this planet humans have become experts at fundamentally reshaping our surroundings From the Qhapaq an the Inca s great road and Mozambique s colonial railways to a Saudi Arabian smart city and from Korea s sacred Baekdu daegan mountain range and the Great Green Wall in Africa to the streets of Chicago Samson explores how we mold the world around us And how as we etch our needs onto the natural landscape we alter the course of history These fascinating stories of connectivity show that in our desire to make geographical connections humans have broken through boundaries of all kinds conquered treacherous terrain and carved up landscapes We crave linkages and though we do not always pay attention to the in between these pathways these ways of earth shaping in Samson s words are key to understanding our relationship with the planet we call home An immense work of cultural geography touching on ecology sociology history and politics Earth Shapers argues that far from being constrained by geography we are instead its creators **Indiana Birds and Their Haunts** Charles E. Marzluff, Reed Bowman, Roarke Donnelly, 2012-12-06 One of the most striking and persistent ways humans dominate Earth is by changing land cover as we settle a region Much of our ecological understanding about this process comes from studies of birds yet the existing literature is scattered mostly decades old and rarely synthesized or standardized The twenty seven contributions authored by leaders in the fields of avian and urban ecology present a unique summary of current research on birds in settled environments ranging from wildlands to exurban rural to urban Ecologists land managers wildlife managers evolutionary ecologists urban planners landscape architects and conservation biologists will find our information useful because we address the conservation and evolutionary implications of urban life from an ecological and planning perspective Graduate students in these fields also will find the volume to be a useful summary and synthesis of current research extant literature and prescriptions for future work All interested in human driven land cover changes will benefit from a perusal of this book because we present high altitude photographs of each study area      Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas Elmqvist, Michail Fragkias, Julie Goodness, Burak Güneralp, Peter J.

Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C. Seto, Cathy Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services
