Natural Resources And Violent Conflict Options And Actions:

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Conflicts over Natural Resources in the Global South Maarten Bavinck, Lorenzo Pellegrini, Erik Mostert, 2014-01-15 Inhabitants of poor rural areas in the Global South heavily depend on natural resources in their immediate vicinity Conflicts over and exploitation of these resources whether it is water fish wood fuel minerals or land severely affect their livelihoods The contributors to this volume leave behind the polarised debate previously surrounding the relationship between natural resources and conflict preferring a more nuanced approach that allows for multiple causes at various levels The contributions cover a wide array of resources geographical contexts Africa Asia and Latin America and conflict dynamics Most are of a comparative nature exploring experiences of conflict as well as cooperation in multiple regions This volume finds its origin in an innovative research programme with the acronym CoCooN steered by The Netherlands Organisation for Scientific Research NWO WOTRO and involving universities and civil society partners in many countries It presents the conceptual approaches adhered to by each of seven interdisciplinary projects ranging from green criminology and political ecology to institutional analysis legal pluralism and identity politics The volume will be of interest to academics and practitioners concerned with an understanding of conflict as well as cooperation over natural resources

Natural Resources and Violent Conflict Ian Bannon, Paul Collier, 2003-01-01 Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country s economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict This book brings together a collection of reports and case studies that explore what the

international community in particular can do to reduce this risk The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance governance secessionist movements and rebel financing It then explores avenues for international action from financial and resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments including sanctions certification requirements aid conditionality legislative and judicial instruments

Oil Sparks in the Amazon Patricia I. Vasquez, 2014 For decades studies of oil related conflicts focused on the causes and effects of natural resources mismanagement commonly known as the resource curse the paradoxical connection between oil wealth and economic busts as in Venezuela or in a later twist the link between the predatory behavior of armed rebel organizations and the abundant natural resources that funded their existence Patricia Vasquez notes that oil busts and civil wars associated with the resource curse were quite different from the now predominant local hydrocarbons disputes that are multiplying rapidly in Latin America These more recent localized disputes over land population displacement water contamination oil jobs that are promised but never materialize etc primarily involve Indigenous groups with a different social and cultural identity from the rest of the population Vasquez spent fifteen years making regular field visits to the oil producing regions of Latin America and conducting hundreds of interviews with the various stakeholders in these local conflicts Her book based on this field research analyzes the dynamics that characterize each of fifty five social and environmental conflicts related to oil and gas extraction in the Andean countries Peru Ecuador and Colombia She is interested not in promulgating a new theory of conflict but in examining the triggers of local hydrocarbons disputes and providing policy recommendations to resolve or prevent them

Armed Groups and Contemporary Conflicts Keith Krause, 2013-09-13 Armed groups operating beyond the state have become the most important actors in most contemporary wars and violent conflicts from Iraq and Afghanistan to Colombia and Somalia They come in a dizzying array of forms some informally linked to the state and state power others in opposition to the state some pursuing classic political goals others primarily predatory and large scale criminal enterprises All groups however challenge the state's Weberian monopoly of the legitimate use of force yet their origins evolution violent dynamics and relations with state power are poorly understood This interdisciplinary collection includes both conceptual and empirical studies of contemporary armed groups examining cases in Latin America Asia and Africa It brings sociological political economy and ethnographic approaches to bear on larger questions including armed groups and the changing nature of warfare the economic dimensions of their activities and means of engagement with armed actors It both broadens and sharpens our understanding of how force and violence are used in today's contemporary armed conflicts This book was published as a special issue of *Contemporary Security Policy*

Hastings,2014-05-23 This book is an exploration of nonviolent strategies and tactics that have been used to prevent and end civil wars invasions and occupations The problem of war is examined in light of efforts to transform destructive conflict into constructive conflict Research into alternatives has produced a corpus of knowledge that enables civil society increasingly to expect success when it engages decision makers in peaceful conflict resolution The book asks the reader to consider the questions of social conflict using a cost benefit analysis which can reveal the advisability of strategic nonviolence Research into the causes and correlates of war is robust and when that research is applied to comparisons of conflict management methods numerous conclusions about potential strategies for ending war emerge Investment and Human Rights in Armed Conflict Daria Davitti,2019-05-30 This book analyses the way in which international human rights law IHRL and international investment law IIL are deployed or fail to be deployed in conflict countries within the context of natural resources extraction It specifically analyses the way in which IIL protections impact on the parallel protection of economic social and cultural rights ESC rights in the host state especially the right to water Arguing that current responses have been unsatisfactory it considers the emergence of the Protect Respect and Remedy framework and the Guiding Principles for Business and Human Rights jointly the Framework as a possible analytical instrument In so doing it proposes a different approach to the way in which the Framework is generally interpreted and then investigates the possible applicability of this recalibrated Framework to the study of the IHRL IIL interplay in a host country in a protracted armed conflict Afghanistan Through the emblematic example of Afghanistan the book presents a practical dimension to its legal analysis It uniquely portrays the elusive intersection between these two bodies of international law within a host country

where the armed conflict continues to rage and a full economic restructuring is taking place away from the public eye not least through the deployment of IIL and the inaction or merely partial consideration of IHRL The book will be of interest to academics policy makers and practitioners of international organisations involved in IHRL IIL and or deployed in contexts of armed conflict
