Manual of Natural Therapy Moshe Olshevsky, 1989 Breaking down possible ailments into ten sections for convenient reference this medical guide offers a wide range of possible cures and treatments drawing on alternate therapies such as homeopathy acupuncture herbs reflexology and aromatherapy

The Evolving Self Robert KEGAN, 2009-06-30 The *Evolving Self* focuses upon the most basic and universal of psychological problems the individual's effort to make sense of experience to make meaning of life According to Robert Kegan meaning making is a lifelong activity that begins in earliest infancy and continues to evolve through a series of stages encompassing childhood adolescence and adulthood The *Evolving Self* describes this process of evolution in rich and human detail concentrating especially on the internal experience of growth and transition its costs and disruptions as well as its triumphs At the heart of our meaning making activity the book suggests is the drawing and redrawing of the distinction between self and other Using Piagetian theory in a creative new way to make sense of how we make sense of ourselves Kegan shows that each meaning making stage is a new solution to the lifelong tension between the universal human yearning to be connected attached and included on the one hand and to be distinct independent and autonomous on the other The *Evolving Self* is the story of our continuing negotiation of this tension It is a book that is

theoretically daring enough to propose a reinterpretation of the Oedipus complex and clinically concerned enough to suggest a variety of fresh new ways to treat those psychological complaints that commonly arise in the course of development Kegan is an irrepressible storyteller an impassioned opponent of the health and illness approach to psychological distress and a sturdy builder of psychological theory His is an original and distinctive new voice in the growing discussion of human development across the life span

The Cult of Health and Beauty in Germany

Michael Hau, 2003-04-15 From the 1890s to the 1930s a growing number of Germans began to scrutinize and discipline their bodies in a utopian search for perfect health and beauty Some became vegetarians nudists or bodybuilders while others turned to alternative medicine or eugenics In *The Cult of Health and Beauty in Germany* Michael Hau demonstrates why so many men and women were drawn to these life reform movements and examines their tremendous impact on German society and medicine Hau argues that the obsession with personal health and fitness was often rooted in anxieties over professional and economic success as well as fears that modern industrialized civilization was causing Germany and its people to degenerate He also examines how different social groups gave different meanings to the same hygienic practices and aesthetic ideals What results is a penetrating look at class formation in pre Nazi Germany that will interest historians of Europe and medicine and scholars of culture and gender
