Naturalistic Realism And The Antirealist Challenge:

Naturalistic Realism and the Antirealist Challenge Drew Khlentzos, R. L. Kosut, Sandro Mussa-Ivaldi, 2004 Examining the antirealist argument from a realist perspective **Naturalism, Realism, and Normativity** Hilary Putnam, 2016-04-11

Hilary Putnam's writings have shaped epistemology ethics metaphysics philosophy of physics and mathematics and philosophy of mind This volume illustrates his willingness to revisit past arguments above all how to articulate a theory of naturalism which acknowledges that normative phenomena form an ineluctable part of human experience **Continental Anti-Realism** Richard Sebold, 2014-11-03 There has been a resurgence of interest in the problem of realism the idea that the world exists in the way it does independently of the mind within contemporary Continental philosophy Many if not most of those writing on the topic demonstrates attitudes that range from mild skepticism to outright hostility Richard Sebold argues that the problem with this is that realism is correct and that the question should then become what happens to Continental philosophy if it is committed to the denial of a true doctrine Sebold outlines the reasons why realism is superior to anti realism and shows how Continental philosophical arguments against realism fail Focusing on the work of four important philosophers Kant Hegel Nietzsche and Husserl all of who have had a profound influence on more recent thinkers he provides alternative ways of interpreting their apparently anti realist sentiments and demonstrates that the insights of these Continental philosophers are nevertheless valuable despite their problematic metaphysical beliefs *Peirce on Realism and Idealism* Robert Lane, 2018 Re evaluates Peirce's metaphysics exploring his views on pragmatism reality truth and the mind's relation to the external world The Blackwell Companion to Naturalism Kelly James Clark, 2016-02-15 The Blackwell Companion to Naturalism provides a systematic introduction to philosophical naturalism and its relation to other schools of thought Features contributions from an international array of established and emerging scholars from across the humanities Explores the historical development of naturalism and its ascension to the dominant orthodoxy in the Western academy Juxtaposes theoretical criticisms with impassioned defenses encapsulating contemporary debates on naturalism Includes discussions of metaphysics realism feminism science knowledge truth mathematics free will and ethics viewed through a naturalist lens **The Consciousness Paradox** Rocco J. Gennaro, 2012 A defense of a version of the higher order thought HOT theory of consciousness with special attention to such topics as concepts and animal consciousness Consciousness is arguably the most important area within contemporary philosophy of mind and perhaps the most puzzling aspect of the world Despite an explosion of research from philosophers psychologists and scientists attempts to explain consciousness in neurophysiological or even cognitive terms are often met with great resistance In *The Consciousness Paradox* Rocco Gennaro aims to solve an underlying paradox namely how it is possible to hold a number of seemingly inconsistent views including higher order thought HOT theory conceptualism infant and animal consciousness concept acquisition and what he calls the HOT brain thesis He defends and further develops a metapsychological reductive representational theory of consciousness

and applies it to several importantly related problems Gennaro proposes a version of the HOT theory of consciousness that he calls the wide intrinsicality view and shows why it is superior to various alternatives such as self representationalism and first order representationalism HOT theory says that what makes a mental state conscious is that a suitable higher order thought is directed at that mental state Thus Gennaro argues for an overall philosophical theory of consciousness while applying it to other significant issues not usually addressed in the philosophical literature on consciousness Most cognitive science and empirical works on such topics as concepts and animal consciousness do not address central philosophical theories of consciousness Gennaro s integration of empirical and philosophical concerns will make his argument of interest to both philosophers and nonphilosophers

Reading Putnam Maria Baghramian,2013 Hilary Putnam is one of the world s leading philosophers His highly original and often provocative ideas have set the agenda for a variety of debates in philosophy of science philosophy of mind and philosophy of language His now famous philosophical thought experiments such as the Twin earth and the brains in the vat have become part of the established canon in philosophy and cognitive science Reading Putnam is an outstanding overview and assessment of Hilary Putnam s work by a team of international contributors and includes replies by Putnam himself Divided into clear sections it contains chapters on key aspects of Putnam s large body of writing including Scientific realism and the changes that Putnam s thought has undergone on this topic analyticity and ontology including the important interconnections between the views of Putnam and Quine Putnam s arguments concerning externalist views of meaning and reference questions of conceptual relativity and his preoccupation with ethics through a denial of the fact value dichotomy Putnam s developing views on perception Offering an excellent survey of Putnam s work Reading Putnam is essential for those studying philosophy of mind philosophy of language and philosophy of science as well as for anyone interested in contemporary philosophy

Wittgenstein and the Moral Life Cora Diamond,2007 Essays by leading scholars that take as their point of departure Cora Diamond s work on the unity of Wittgenstein s thought and her writings on moral philosophy

Mental States Andrea C. Schalley,Drew Khlentzos,2007-12-13 Collecting the work of linguists psychologists neuroscientists archaeologists artificial intelligence researchers and philosophers this volume presents a richly varied picture of the nature and function of mental states Starting from questions about the cognitive capacities of the early hominin homo floresiensis the essays proceed to the role mental representations play in guiding the behaviour of simple organisms and robots thence to the question of which features of its environment the human brain represents and the extent to which complex cognitive skills such as language acquisition and comprehension are impaired when the brain lacks certain important neural structures Other papers explore topics ranging from nativism to the presumed constancy of categorization across signed and spoken languages from the formal representation of metaphor actions and vague language to philosophical questions about conceptual schemes and colours Anyone interested in mental states will find much to reward them in this fine volume

Natural Kinds and Genesis Stewart

Umphrey,2016-08-22 In Natural Kinds and Genesis The Classification of Material Entities Stewart Umphrey raises and answers two questions What is it to be a natural kind And are there in fact any natural kinds First using the everyday understanding of things he argues that natural kinds may be understood as classes or as types and that the members or tokens of such kinds are individual continuants A continuant is essentially a being in becoming a material thing which changes and yet remains the same in virtue of its nature or essence as long as it exists In the primary sense of the term then a natural kind is a class whose members closely resemble one another substantially in virtue of their essences Alternatively it is a type whose tokens exemplify it in virtue of their essences To answer the second question one must make use of relevant scientific theories as well Umphrey agrees with scientific essentialists that there are natural kinds but he argues that most of the chemical physical and biological kinds posited in current theories are not natural kinds in the primary sense of the term The natural kinds realism he affirms is thus quite restricted it requires the existence of enduring things which closely resemble one another in virtue of their essences and such things exist apparently only if they have come into being or emerged in the course of symmetry breaking events Natural Kinds and Genesis will be of interest to philosophers of science and to those interested in the metaphysics of natural kinds and their members **The Slightest Philosophy** Quee

Nelson,2007 **Time and Realism** Yuval Dolev,2007-10-05 A new view of the metaphysics of time arguing that the traditional tensed tenseless debate within analytic philosophy should be seen as the first stage in a philosophical investigation of time and that the next stage belongs to phenomenology How does time pass Does time itself move or is time s passage merely an illusion Analytic philosophers belong for the most part to one of two camps on this question the tensed camp which defends the reality of time s passage conceiving the present as ontologically privileged over the past and future and the tenseless camp which denies time s passage and holds that all events whatever their temporal location are ontologically equal In Time and Realism Yuval Dolev goes beyond the tensed tenseless debate to argue that neither position is conclusive but that the debate over them should be seen as only the first stage in the philosophical investigation of time The next stage he claims belongs to phenomenology and he argues further the phenomenological analysis of time grows naturally out of the analytic enterprise Dolev shows that the two rival theories share a metaphysical presupposition that tense concerns the ontological status of things He argues that this ontological assumption is natural but untenable and that leaving it behind creates a new viewpoint from which to study central topics in the metaphysics of time Dolev shows that such a study depends on the kind of meticulous attention to our firsthand experiences that drives phenomenological investigations Thus he argues phenomenology is the venue for advancing the investigation of time Time and Realism not only analyzes the tensed tenseless debate resolving some of its central difficulties along the way it transcends it It serves as a bridge between the analytic and the continental traditions in the philosophy of mind both of which are shown to be vital to the philosophical examination of time **A Companion to the Philosophy of Language, 2 Volume Set** Bob Hale,Crispin

Wright, Alexander Miller, 2017-04-24 Providing up to date in depth coverage of the central question and written and edited by some of the foremost practitioners in the field this timely new edition will no doubt be a go to reference for anyone with a serious interest in the philosophy of language Kathrin Gl er Pagin Stockholm University Now published in two volumes the second edition of the best selling Companion to the Philosophy of Language provides a complete survey of contemporary philosophy of language The Companion has been greatly extended and now includes a monumental 17 new essays with topics chosen by the editors who curated suggestions from current contributors and almost all of the 25 original chapters have been updated to take account of recent developments in the field In addition to providing a synoptic view of the key issues figures concepts and debates each essay introduces new and original contributions to ongoing debates as well as addressing a number of new areas of interest including two dimensional semantics modality and epistemic modals and semantic relationism The extended state of the art chapter format allows the authors all of whom are internationally eminent scholars in the field to incorporate original research to a far greater degree than competitor volumes Unrivalled in scope this volume represents the best contemporary critical thinking relating to the philosophy of language

Causation and Counterfactuals John Collins, Ned Hall, L. A. Paul, 2004-06-25 One philosophical approach to causation sees counterfactual dependence as the key to the explanation of causal facts for example events *c* the cause and *e* the effect both occur but had *c* not occurred *e* would not have occurred either The counterfactual analysis of causation became a focus of philosophical debate after the 1973 publication of the late David Lewis's groundbreaking paper Causation which argues against the previously accepted regularity analysis and in favor of what he called the promising alternative of the counterfactual analysis Thirty years after Lewis's paper this book brings together some of the most important recent work connecting or in some cases disputing the connection between counterfactuals and causation including the complete version of Lewis's Whitehead lectures Causation as Influence a major reworking of his original paper Also included is a more recent essay by Lewis Void and Object on causation by omission Several of the essays first appeared in a special issue of the Journal of Philosophy but most including the unabridged version of Causation as Influence are published for the first time or in updated forms Other topics considered include the trumping of one event over another in determining causation de facto dependence challenges to the transitivity of causation the possibility that entities other than events are the fundamental causal relata the distinction between dependence and production in accounts of causation the distinction between causation and causal explanation the context dependence of causation probabilistic analyses of causation and a singularist theory of causation

Consciousness Revisited Michael Tye, 2011-08-19 Four major puzzles of consciousness philosophical materialism must confront after rejecting the phenomenal concept strategy We are material beings in a material world but we are also beings who have experiences and feelings How can these subjective states be just a matter of matter To defend materialism philosophical materialists have formulated what is sometimes called the phenomenal concept strategy which holds that we possess a range

of special concepts for classifying the subjective aspects of our experiences In *Consciousness Revisited* the philosopher Michael Tye until now a proponent of the the phenomenal concept strategy argues that the strategy is mistaken A rejection of phenomenal concepts leaves the materialist with the task of finding some other strategy for defending materialism Tye points to four major puzzles of consciousness that arise How is it possible for Mary in the famous thought experiment to make a discovery when she leaves her black and white room In what does the explanatory gap consist and how can it be bridged How can the hard problem of consciousness be solved How are zombies possible Tye presents solutions to these puzzles solutions that relieve the pressure on the materialist created by the failure of the phenomenal concept strategy In doing so he discusses and makes new proposals on a wide range of issues including the nature of perceptual content the conditions necessary for consciousness of a given object the proper understanding of change blindness the nature of phenomenal character and our awareness of it whether we have privileged access to our own experiences and if we do in what such access consists

Essays in Quasi-realism Simon Blackburn,1993 This volume collects together the author s pioneering essays on quasi realism a philosophical position he first introduced in 1980 which has become a distinctive and much discussed option in metaphysics and ethics

Meaning and Justification. An Internalist Theory of Meaning Gabriele Usberti,2023-07-28 This volume develops a theory of meaning and a semantics for both mathematical and empirical sentences inspired to Chomsky s internalism namely to a view of semantics as the study of the relations of language not with external reality but with internal or mental reality In the first part a theoretical notion of justification for a sentence A is defined by induction on the complexity of A intuitively justifications are conceived as cognitive states of a particular kind The main source of inspiration for this part is Heyting s explanation of the intuitionistic meaning of logical constants In the second part the theory is applied to the solution of several foundational problems in the theory of meaning and epistemology such as Frege s puzzle Mates puzzle about synonymy the paradox of analysis Kripke s puzzle about belief the de re de dicto distinction the specific non specific distinction Gettier s problems the paradox of knowability and the characterization of truth On a more general philosophical level throughout the book the author develops a tight critique of the neo verificationism of Dummett Prawitz and Martin L f and defends a mentalist interpretation of intuitionism

Mental Reality, second edition, with a new appendix Galen Strawson,2009-10-09 An argument against neobehaviorism and for naturalized Cartesianism which couples a wholly materialist approach to the mind with a fully realist attitude to the phenomena of conscious experience In *Mental Reality* Galen Strawson argues that much contemporary philosophy of mind gives undue primacy of place to publicly observable phenomena nonmental phenomena and behavioral phenomena understood as publicly observable phenomena in its account of the nature of mind It does so at the expense of the phenomena of conscious experience Strawson describes an alternative position naturalized Cartesianism which couples the materialist view that mind is entirely natural and wholly physical with a fully realist account of the nature of conscious experience Naturalized

Cartesianism is an adductive as opposed to reductive form of materialism Adductive materialists don't claim that conscious experience is anything less than we ordinarily conceive it to be in being wholly physical They claim instead that the physical is something more than we ordinarily conceive it to be given that many of the wholly physical goings on in the brain constitute literally are conscious experiences as we ordinarily conceive them Since naturalized Cartesianism downgrades the place of reference to nonmental and publicly observable phenomena in an adequate account of mental phenomena Strawson considers in detail the question of what part such reference still has to play He argues that it is a mistake to think that all behavioral phenomena are publicly observable phenomena This revised and expanded edition of *Mental Reality* includes a new appendix which thoroughly revises the account of intentionality given in chapter 7

The Routledge Handbook of Scientific Realism Juha Saatsi, 2017-11-22 Scientific realism is a central long standing and hotly debated topic in philosophy of science Debates about scientific realism concern the very nature and extent of scientific knowledge and progress Scientific realists defend a positive epistemic attitude towards our best theories and models regarding how they represent the world that is unobservable to our naked senses Various realist theses are under sceptical fire from scientific antirealists e.g. empiricists and instrumentalists The different dimensions of the ensuing debate centrally connect to numerous other topics in philosophy of science and beyond The Routledge Handbook of Scientific Realism is an outstanding reference source the first collection of its kind to the key issues positions and arguments in this important topic Its thirty four chapters written by a team of international experts are divided into five parts Historical development of the realist stance Classic debate core issues and positions Perspectives on contemporary debates The realism debate in disciplinary context Broader reflections In these sections the core issues and debates presented analysed and set into broader historical and disciplinary contexts The central issues covered include motivations and arguments for realism challenges to realism from underdetermination and history of science different variants of realism the connection of realism to relativism and perspectivism and the relationship between realism metaphysics and epistemology The Routledge Handbook of Scientific Realism is essential reading for students and researchers in philosophy of science It will also be very useful for anyone interested in the nature and extent of scientific knowledge

Action in Perception Alva Noë, 2006-01-20 Perception is not something that happens to us or in us writes Alva Noë It is something we do In *Action in Perception* Noë argues that perception and perceptual consciousness depend on capacities for action and thought that perception is a kind of thoughtful activity Touch not vision should be our model for perception Perception is not a process in the brain but a kind of skillful activity of the body as a whole We enact our perceptual experience To perceive according to this enactive approach to perception is not merely to have sensations it is to have sensations that we understand In *Action in Perception* Noë investigates the forms this understanding can take He begins by arguing on both phenomenological and empirical grounds that the content of perception is not like the content of a picture the world is not given to consciousness all at once but is gained gradually by active inquiry and exploration Noë then argues

that perceptual experience acquires content thanks to our possession and exercise of practical bodily knowledge and examines among other topics the problems posed by spatial content and the experience of color He considers the perspectival aspect of the representational content of experience and assesses the place of thought and understanding in experience Finally he explores the implications of the enactive approach for our understanding of the neuroscience of perception
