Naturalization in the American Colonies Joseph Willard,1859 **Proceedings of the Massachusetts Historical Society** Massachusetts Historical Society,1873 The Development of American Citizenship, 1608-1870 James H. Kettner,2014-01-01 he concept of citizenship that achieved full legal form and force in mid nineteenth century America had English roots in the sense that it was the product of a theoretical and legal development that extended over three hundred years This prize winning volume describes and explains the process by which the circumstances of life in the New World transformed the quasi medieval ideas of seventeenth century English jurists about subjectship community sovereignty and allegiance into a wholly new doctrine of volitional allegiance The central British idea was that subjectship involved a personal relationship with the king a relationship based upon the laws of nature and hence perpetual and immutable The conceptual analogue of the subject king relationship was the natural bond between parent and child Across the Atlantic divergent ideas were taking hold Colonial societies adopted naturalization policies that were suited to practical needs regardless of doctrinal consistency Americans continued to value their status as subjects and to affirm their allegiance to the king but they also moved toward a new understanding of the ties that bind individuals to the community English judges of the seventeenth and eighteenth centuries assumed that the essential purpose of naturalization was to make the alien legally the same as a native that is to make his allegiance natural personal and perpetual In the colonies this reasoning was being reversed Americans took the model of naturalization as their starting point for defining all political allegiance as the result of a legal contract resting on consent This as yet barely articulated difference between the American and English definition of citizenship was formulated with precision in the course of the American Revolution Amidst the conflict and confusion of that time Americans sought to define principles of membership that adequately encompassed their ideals of individual liberty and community security The idea that all obligation rested on individual volition and consent shaped their response to the claims of Parliament and king legitimized their withdrawal from the British empire controlled their reaction to the loyalists and underwrote their creation of independent governments This new concept of citizenship left many questions unanswered however The newly emergent principles clashed with deep seated prejudices including the traditional exclusion of Indians and Negroes from membership in the sovereign community It was only the triumph of the Union in the Civil War that allowed Congress to affirm the quality of native and naturalized citizens to state unequivocally the primacy of the national over state citizenship to write black citizenship into the Constitution and to recognize the volitional character of the status of citizen by formally adopting the principle of expatriation **Bibliography of the Massachusetts Historical Society** Samuel Abbott Green,1871 Public Documents of Massachusetts Massachusetts,1893 *Annual Report of the American Historical Association* American Historical Association,1907 Catalogue of the Library of the Law School of Harvard University Harvard Law School.
