China to Chinatown

J.A.G. Roberts, 2002 *China to Chinatown* tells the story of one of the most notable examples of the globalization of food the spread of Chinese recipes ingredients and cooking styles to the Western world Beginning with the accounts of Marco Polo and Franciscan missionaries J A G Roberts describes how Westerners first impressions of Chinese food were decidedly mixed with many regarding Chinese eating habits as repugnant Chinese food was brought back to the West merely as a curiosity The Western encounter with a wider variety of Chinese cuisine dates from the first half of the 20th century when Chinese food spread to the West with emigrant communities The author shows how Chinese cooking has come to be regarded by some as among the world s most sophisticated cuisines and yet is harshly criticized by others for example on the grounds that its preparation involves cruelty to animals Roberts discusses the extent to which Chinese food as a facet of Chinese culture overseas has remained differentiated and questions whether its ethnic identity is dissolving Written in a lively style the book will appeal to food historians and specialists in Chinese culture as well as to readers interested in Chinese cuisine

Healthy Yet Amazingly Delicious Chinese Recipes Ted Alling, Why Chinese respect their food that much Cooking is a very important part of living in China It is even connected with its philosophy and medicine In China the art of cooking is even equalized with the theatre music or even literature Chinese people believe that eating is not just a need but also a satisfaction which brings health and harmony peace of mind and long life Chinese cuisine is one of the oldest in the world too therefore one of the most popular It dates a thousand of years ago by the time of first emperors What could be found on a plate was then considered to be influential on the health and well being the clearness of the mind and the harmony of the spirit of every individual This has continued to this day For the Chinese food is not just a daily ritual but is associated with every pleasant moment of life They go so far that they consider a nation that cannot distinguish tastes cannot cook or have their own kitchen to be one that has no culture at all According to them civilization is strictly related to food

HIV / AIDS, Health and the Media in China Johanna Hood,2011-01-25 HIV AIDS is an increasingly serious problem in China with an increasing number of new cases every year As a result HIV organizations have boomed with both state and non governmental organisations responding to the threat with campaigns to increase public awareness of the disease utilising the media as the primary tool to reshape citizens understandings and views of HIV AIDS This book explores how HIV AIDS is portrayed in China s media It argues that despite increasing education campaigns media coverage and social and academic openness towards HIV AIDS many Chinese of the majority Han ethnic group regard infection as a distant possibility believing themselves to be immune and infection a problem only for certain non Han ethnic groups with perceived lower moral standards in particular black Africans The book explores how HIV AIDS is reported analysing the language used in constructing and encoding the health narrative its subjects and ideas about the disease It demonstrates how China s media frequently employs negative events to present the most extreme possibilities of poverty danger disasters and disease with black Africa portrayed as an antiquated distant and socioculturally and politically backward place uniquely unsuitable for the containment of disease in contrast with the progressive scientifically sophisticated and morally upstanding Chinese It argues that this discourse has had the effect of distancing many Chinese from the perceived possibility of infection thus compromising the effectiveness of public health campaigns on HIV AIDs It suggests that the key to combating the spread of the disease lies in challenging the racialised

narratives through which the disease is portrayed in China's media rather than simply by aiming to educate greater numbers of people **American Book Publishing Record Cumulative, 1950-1977** R.R.
