Douglas Hurt,2020-03-03 A synthesis of the agricultural history of the Green Revolution The Green Revolution was devised to increase agricultural production worldwide particularly in the developing world Agriculturalists employed anhydrous ammonia and other fertilizing agents mechanical tilling hybridized seeds pesticides herbicides and a multitude of other techniques to increase yields and feed a mushrooming human population that would otherwise suffer starvation as the world's food supply dwindled In *The Green Revolution in the Global South* Science Politics and Unintended Consequences R Douglas Hurt demonstrates that the Green Revolution did not turn out as neatly as scientists predicted When its methods and products were imported to places like Indonesia and Nigeria or even replicated indigenously the result was a tumultuous impact on a society's functioning A range of factors including cultural practices ethnic and religious barriers cost and availability of new technologies climate rainfall and aridity soil quality the scale of landholdings political policies and opportunism the rise of industrial farms civil unrest indigenous diseases and corruption entered into the Green Revolution calculus producing a series of unintended consequences that varied from place to place As the Green Revolution played out over time these consequences rippled throughout societies affecting environments economies political structures and countless human lives Analyzing change over time almost decade by decade Hurt shows that the Green Revolution was driven by the state as well as science Rather than acknowledge the vast problems with the Green Revolution or explore other models Hurt argues scientists and political leaders doubled down and repeated the same missteps in the name of humanity and food security In tracing the permutations of modern science's impact on international agricultural systems Hurt documents how beyond increasing yields the Green Revolution affected social orders politics and lifestyles in every place its methods were applied usually far more than once      Green revolution in Bangladesh Mahabub Hossain,1987      **The Oxford Handbook of Agricultural History** Jeannie M. Whayne,2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over

precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

**Water Policy and Governance in South Asia** M. Anwar Hossen, 2017-03-16 Dr Hossen carried out an exceptional program of research in Bangladesh which focused on water governance in relation to human rights international water law and environmental sustainability His major argument is that eco agricultural system encounters major disruptions due to a number of factors including regional hydropolitics and neoliberal and highly centralized approaches to water resource management that follow the principles of ecocracy In this context Dr Hossen explores three major questions i How can local ecological knowledge be incorporated into national water policy ii What strategies and reforms are required at the international watershed governance level and iii How can human rights principles including the principle of water as a human right be used to formulate more effective water policy and governance principles To answer these questions Dr Hossen explores the effects of regional hydropolitics on water management focusing on three large engineering projects the Farakka Barrage built by India on the Ganges River and the Ganges Kobodak GK and Gorai River Restoration GRR Projects in Bangladesh This analysis is based on his research into local knowledge and farming practices during a year of fieldwork in 2011 12 focus group discussions in depth case studies and social survey methods In addition to this primary data he looks at extensive secondary documents from the government of Bangladesh pertaining to water management agricultural modernization and institutional structures The arguments herein are applicable particularly to the Ganges Brahmaputra Basin countries in South Asia but also to the river basins of other parts of the world

*Environmental Management in the Tropics* Randall Baker, 2021-06-24 The arrival of western science and economic interests to the tropics has dramatically changed the tropical environment and its ecology Environmental Management in the Tropics discusses the ecology of the tropics and examines how it is different from the temperate zone where western science evolved The author discusses how native people traditionally subsisted in different ecological zones of the tropics and how they rationalized their relationship The author also takes a critical look at the impact of colonialism in the tropics and how it changed traditional cultures and their relationship with the environment The current clash between economics and ecology in the tropics is explored in depth According to the author we are now able to draw a line in the sand and illustrate the consequences of continuing current practices Environmental Management in the Tropics shows how this situation developed and discusses how the two opposing concepts must be brought back into harmony The book is one of the few studies to take a truly interdisciplinary approach combining the serious inevitabilities of natural science with the variables of history culture politics and economics It gives us a new respect for the past and tradition of the tropics and clearly spells out why dramatic changes must occur to prevent further degradation of the tropical environment Environmental Management in the Tropics is

an important reference for ecologists conservationists scientists researchers environmental consultants land managers and developers members of the world regulatory community and anyone working on projects in tropical regions

**Natural Resource Policymaking in Developing Countries** William Ascher, Robert G. Healy, 1990 Drawing on case studies developed over a two year period 1987-1989 by Fellows in the Program in International Development Policy at Duke University including experienced representatives from developing countries the World Bank and scholars the authors integrate the growing interest in environmental protection and resource conservation into the existing body of knowledge about the political economy of developing countries This book is about the links that tie resource use environmental quality and economic development and the way in which those links are affected by the distribution of income and resource ownership The links may be relatively simple as in the case of peasant farmers too poor to conserve resources for the future and with nothing to gain from sound environmental practices Or they may be very complex as the authors find when they demonstrate how achievement of higher incomes by the rich can increase environmentally destructive behavior by the poor Many of the links in some way involve rural land use whether for agriculture or forestry **Natural Resource Policymaking in Developing Countries** argues that the policies that matter are not merely those dealing with resources and the environment but a much broader set that includes income distribution and asset ownership

State, Market and Society in an Emerging Economy Quamrul Alam, Rizwan Khair, Asif M. Shahan, 2023-07-26 The economic and social development that Bangladesh has achieved in the past two decades has made Bangladesh a development paradox This book tries to explain this paradox through a political economy lens The book explains the linkages between the state changing society and emerging private sector and examines whether the social transformation taking place in Bangladesh has the potential to live up to the expectations of a middle income country The early part of the book unravels the myriad relations between the state society and market to project the aspirations of a newly independent nation It analyzes how political turmoil militarization of politics politicization of institutions reforms initiatives industrial and social development policies and the power nexus influenced the nature of the political economy of Bangladesh The book goes on to examine how domestic appetite for capital and raw materials the digital revolution and the capacity of the local market to absorb expanded economic activities have created an environment that catalyzes innovation and entrepreneurship The book also explains how the country has attempted to transform from an agrarian to a manufacturing based economy with rapid growth in the ready made garment industry pisciculture pharmaceuticals and the ICT sector Bangladesh's journey from an emerging economy towards a developed country would interest those researching on development economics and those in policy making

**Small Farmer Development in Asia and the Pacific** N. S. Randhawa, K. V. Sundaram, 1990-01-01

Trade, Planning and Rural Development Azizur Rahman Khan, Rehman Sobhan, 1990-06-18 A volume of essays by a number of economists to honour Nurul Islam an Asian economist who made important contributions as an academic economist and political planner The

essays fall under three subject headings international trade and aid planning and rural development

**The Nonfarm Sector and Rural Development** Nurul Islam,1997 In most developing countries the rural labor force is growing rapidly but rural employment opportunities are dwindling This paper brings together empirical evidence on the nonfarm sector and analyzes policies for its future development It examines the linkages between the farm and nonfarm sectors and between the nonfarm sector and urban enterprises and considers ways the government can promote rural employment

The 'Green Revolution' and Economic Development M. Alauddin,C. Tisdell,1991-11-13 Green Revolution technologies have transformed the countryside of many less developed countries This book examines the processes involved in the adoption of these new technologies and their socio economic impact It provides an integrated view of the effects of Green Revolution technologies on economic growth and returns distribution of income and resources stability of agricultural production and returns and their sustainability in Bangladesh

**Agricultural research, livelihoods, and poverty** Adato, Michelle,Meinzen-Dick, Ruth,2007-06-11 Those who study global poverty and ways to reduce it face a perennial set of questions Do advances in knowledge research and technology make a real difference in the lives of poor people What effect does research have on the poor Who benefits The contributors to Agricultural Research Livelihoods and Poverty shed light on these questions through a collection of case studies that explore the types of impact that agricultural research has had on livelihoods and poverty in low income countries

**Environment and the poor development** H. Jeffrey Leonard,1989-01-01 This volume one of the ODC s U S Third World Policy Perspectives series offers useful steps for policymakers concerned with the critical challenges of integrating environment and development concerns Jessica Tuchman Matthews World Resources Institute Six out of every ten of the world s people are being inexorably pushed by agricultural modernization and continuing high population growth rates into ecologically vulnerable environments tropical forests dryland and hilly areas and the fringes of great urban centers Unless development strategies support their capabilities to ensure their own survival the 470 million people living in these vulnerable areas will be forced to meet their short term need to survive at the cost of long term ecological sustainability and the well being of future generations In response to these startling statistics the authors call for new policies and new forms of collaboration among participants at the local national and international levels They offer practical and stimulating recommendations to bring together population planners water engineers health professionals bankers among others to find solutions to both poverty and environmental problems

Agricultural Biotechnology in Developing Countries Matin Qaim,Anatole F. Krattiger,Joachim von Braun,2013-03-09 Biotechnology offers great potential to contribute to sustainable agricultural growth food security and poverty alleviation in developing countries Yet there are economic and institutional constraints at national and international levels that inhibit the poor people s access to appropriate biotechnological innovations Agricultural Biotechnology in Developing Countries Towards Optimizing the Benefits for the Poor addresses the major constraints Twenty three chapters written by a wide range of scholars and stake holders provide an up to date analysis

of agricultural biotechnology developments in Latin America Africa and Asia Besides the expected economic and social impacts the challenges for an adjustment of the international research structure are discussed with a special focus on intellectual property rights and the roles of the main research organizations Harnessing the comparative advantages of the public and private sectors through innovative partnerships is the only way forward to optimize the benefits of biotechnology for the poor The book will be an invaluable resource for both academics and policy makers concerned with agricultural biotechnology in context of developing countries

**How the World Hunger Problem Was not Solved** Christian Gerlach, 2024-02-14 The world food crisis 1972 1975 gave rise to new development concepts To eradicate world hunger small peasants were supposed to use modern inputs like high yielding seeds fertilizer pesticides and irrigation This would turn subsistence producers into business owners transform rural areas invigorate national economies and the crisis stricken world economy and thus stabilize capitalism Together with an in depth account of the world food crisis this book analyses how this global scheme largely failed It shows its diverse initiators their reasoning and motives its political breakthrough the degrees to which it was implemented globally and nationally in the following decades and its socioeconomic effects in rural areas Despite internationally coordinated policies and coercive means the scheme failed on all levels situation analysis design policies incapable institutions including big business implementation and peasants responses Selective realization in certain regions and for certain crops and the appropriation of funds by local elites often aggravated inequality and hunger Case studies are about Bangladesh Indonesia Tanzania and Mali The book shows limits to global social engineering imperialism and state control It is aimed at students scholars activists and non specialists interested in development and the world food problem The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**Proven Successes in Agricultural Development** David J. Spielman, Rajul Pandya-Lorch, 2010-01-01 The world has made enormous progress in the past 50 years toward eliminating hunger and malnutrition While in 1960 roughly 30 percent of the world's population suffered from hunger and malnutrition today less than 20 percent do some five billion people now have enough food to live healthy productive lives Agricultural development has contributed significantly to these gains by increasing food supplies reducing food prices and creating new income and employment opportunities for some of the world's poorest people This book examines where why and how past interventions in agricultural development have succeeded It carefully reviews the policies programs and investments in agricultural development that have reduced hunger and poverty across Africa Asia and Latin America over the past half century The 19 successes included here are described in in depth case studies that synthesize the evidence on the intervention's impact on agricultural productivity and food security evaluate the rigor with which the evidence was collected and assess the tradeoffs inherent in each success Together these chapters provide evidence of what works in agricultural development
