Nature First Keeping Our Wild Places And Wild Creatures Wild:

Nature First Thomas McNamee, 1987 **The Killing of Wolf Number Ten** Thomas McNamee, 2014-06-03 A killer A manhunt The triumph of justice and of the wolf The greatest event in Yellowstone history Greater Yellowstone was the last great truly intact ecosystem in the temperate zones of the earth until in the 1920s U S government agents exterminated its top predator the gray wolf With traps and rifles even torching pups in their dens the killing campaign was entirely successful The howl of the evil wolf was heard no more The good animals elk deer bison proliferated until they too had to be managed Two decades later recognizing that ecosystems lacking their keystone predators tend to unravel the visionary naturalist Aldo Leopold called for the return of the wolf to Yellowstone It would take another fifty years for his vision to come true In the early 1990s as the movement for Yellowstone wolf restoration gained momentum rage against it grew apace When at last in February 1995 fifteen wolves were trapped in Alberta and brought to acclimation pens in Yellowstone even then legal and political challenges continued There was also a lot of talk in the bars about shoot shovel and shut up While the wolves enemies worked to return them to Canada the biologists in charge of the project feared that the wolves might well return on their own Once they were released two packs remained in the national park but one bore only one pup and the other none The other comprising Wolves Nine and Ten and Nine s yearling daughter disappeared They were in fact heading home As they emerged from protected federal land an unemployed ne er do well from Red Lodge Montana trained a high powered rifle on Wolf Number Ten and shot him through the chest Number Nine dug a den next to the body of her mate and gave birth to eight pups The story of their rescue and the manhunt for the killer is the heart of *The Killing of Wolf Number Ten* Read this book and if you are ever fortunate enough to hear the howling of Yellowstone wolves you will always think of Wolves Nine and Ten If you ever see a Yellowstone wolf chance are it will be carrying their DNA The restoration of the wolf to Yellowstone is now recognized as one of conservation s greatest achievements and Wolves Nine and Ten will always be known as its emblematic heroes *The Wilderness Debate Rages on* Michael P. Nelson, J. Baird Callicott, 2008 Ten years ago The Great New Wilderness Debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them *The Wilderness Debate Rages On* will reinvigorate that conversation and usher in a second decade of debate Like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices *The Wilderness Debate Rages On* includes the best explorations of the concept of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness Narrative writers such as Wendell Berry Scott Russell Sanders Marilynne Robinson Kathleen Dean Moore and Lynn Maria Laitala are also given a voice in order to show how the wilderness debate is expanding outside the academy The writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural

geographers and environmental activists The book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did Thoreau Muir and the early Leopold for purposes of outdoor recreation The editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity

Ecosystem Management for Parks and Wilderness James K. Agee, Darryll R. Johnson, 1988 The need for cooperation among government agencies as well as an interdisciplinary approach to the increasingly challenging and complicated problem of managing park and wilderness areas prompted the University of Washington College of Forest Resources the National Park Service and the Forest Service to sponsor an ecosystem management workshop for scientists planners and managers To develop an improved conceptual approach to managing change in ecosystems crossing natural and political boundaries the workshop focused on defining terms uncovering areas of misunderstanding and barriers to cooperation and developing methods to determine the most important problems and issues Three needs emerged from the prioritization process a precise definition of the management objectives for park and wilderness lands and how to integrate them with objectives for surrounding lands nationally as well as site specific more information about physical biological and social components of park and wilderness ecosystems from both sides of political boundaries and key indicators of ecosystem condition as well as methods for evaluating management effectiveness All of these common themes point to a need for more precise direction in management goal setting and more accurate assessment of progress toward goals The book includes an introductory chapter by the editors and summary in which they outline a direction for ecosystem management in the next critical decades The other chapters by individual contributors include studies on laws governing park and wilderness lands paleoecological records that reveal the historic effects of climatic variations on vegetation change succession and natural disturbance in relation to the problems of what can and should be preserved managing ecosystems for large populations of vertebrates the management of large carnivores effects of air pollution lake acidification human ecology and environmental management the role of economics cooperation in ecosystem management and management challenges in Yellowstone National Park

The Man Who Changed the Way We Eat Thomas McNamee, 2013-03-12 Originally published in hardcover in 2012

Threats to National Park Animal and Plant Resources United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on National Parks and Public Lands, 1992

The Return of the Wolf to Yellowstone Thomas McNamee, 1998-05-15 Is easy to see why this saga has stirred the imagination of a nation for it is indeed the environmental story of the decade

Morel Tales Gary Alan FINE, Gary Alan Fine, 2009-06-30 In this thoughtful book Gary Fine explores how Americans attempt to give meaning to the natural world that surrounds them Although nature has often been treated as an unproblematic reality Fine suggests that the meanings we assign to the natural environment are culturally grounded In other words there is no nature separate from culture He calls this process of cultural construction and

interpretation naturework Of course there is no denying the biological reality of trees mountains earthquakes and hurricanes but he argues they must be interpreted to be made meaningful Fine supports this claim by examining the fascinating world of mushrooming Based on three years of field research with mushroomers at local and national forays Morel Tales highlights the extensive range of meanings that mushrooms have for mushroomers Fine details how mushroomers talk about their finds turning their experiences into fish stories the one that got away war stories and treasure tales how mushroomers routinely joke about dying from or killing others with misidentified mushrooms and how this dark humor contributes to the sense of community among collectors He also describes the sometimes friendly sometimes tense relations between amateur mushroom collectors and professional mycologists Fine extends his argument to show that the elaboration of cultural meanings found among mushroom collectors is equally applicable to birders butterfly collectors rock hounds and other naturalists

Alice Waters and Chez Panisse Thomas McNamee, 2007-03-22 The first authorized biography of the mother of American cooking The New York Times This adventurous book charts the origins of the local market cooking culture that we all savor today When Francophile Alice Waters opened Chez Panisse in Berkeley in 1971 few Americans were familiar with goat cheese cappuccino or mesclun But it wasn't long before Waters and her motley coterie of dreamers inspired a new culinary standard incorporating ethics politics and the conviction that the best grown food is also the tastiest Based on unprecedented access to Waters and her inner circle this is a truly delicious rags to riches saga Wild Hunters Monte Hummel, Sherry Pettigrew, John A. Murray, 1992 Noted Canadian and American authors address important wildlife survival issues Future Survey Annual 1988-1989 Michael Marien, Lane Jennings, 1990-01-01 BMW Z cars have carved a huge reputation for themselves in a very short time From the revolutionary and innovative Z1 of the late 1980s to the beautiful and exclusive Z8 of more recent times via the popular Z3 and its controversial replacement the Z4 the family has made BMW's name in the increasingly competitive sports car market

Gallatin National Forest (N.F.), East Boulder Mine Project, 1992 **A Different Nature** David Hancocks, 2001 A well written and provocative opinion rich account of zoos their history and their goals and purposes Hancocks has earned the right to speak authoritatively about these subjects thanks to his tenure as director of two leading U S zoos This book will appeal to general readers and to all persons interested in zoos and their role in conservation and education John Alcock author of Animal Behavior An Evolutionary Approach Giraffes elephants gorillas snakes and toucans respond poorly to the usual conventions of human architecture Zoo architects usually respond no less poorly to the needs of animals David Hancocks draws on a lifetime's experience working as a zoo director and zoo architect to explore this dilemma and offers a compelling vision for the future This is an important book for those interested in conservation as well as for zoo and museum buffs William Conway former President and General Director of the Wildlife Conservation Society and the Bronx Zoo For over two decades David Hancocks has fervently tried to reform the fundamental character and mission of zoos This book is his most thorough analysis of what is wrong with them and his most detailed and

compelling plea for improvement Every conscientious zoo administrator curator and keeper should read it from cover to cover with an open mind Professionals in botanical gardens museums and nature parks should also consider this treatise because Hancocks advocates that a fusion of all of these institutions into a new entity better positioned to interpret the entire biosphere Mark A Dimmitt Director of Natural History Arizona Sonora Desert Museum *The Journal of Microscopy and Natural Science: the Journal of the Postal Microscopical Society* ,1894 **The Wolves of Isle Royale** Rolf Olin Peterson,1995 For 35 years this pristine island has been the site of the longest running study on the planet of any wild mammal A compelling and fascinating first hand account of the Isle Royale wolves and moose dynamic and literally a voice in the wilderness regarding solutions to the current dilemma as the wolf population falters at its lowest recorded level **The Journal of Microscopy and Natural Science** ,1894 **Journal of Microscopy and Natural Science; the Journal of the Postal Microscopical Society and the Wesley Naturalists' Society** ,1894 **The Grizzly Bear** Thomas McNamee,1990 *Preserving Yellowstone's Natural Conditions* James A. Pritchard,2022-10 In this new edition James A Pritchard has added a summary of recent developments in wildlife science and management and discusses historical continuities in the role of Yellowstone Park as a wildlife refuge and conservator *The Lady and the Octopus* Danna Staaf,2022-10-04 Born in a small village in eighteenth century France Jeanne Villepreux wasn't expected to transform marine science Curious creative and clever Jeanne ventured to Paris by foot as a teenager After achieving acclaim as a seamstress she met a wealthy merchant and traveled with him to Sicily where they married Rather than settling into a life of domesticity on this beautiful island she set out to investigate its natural wonders from fossils and insects on land to the marvelous mysteries of the sea In an era when women weren't accepted into scientific societies and many naturalists based their findings on dead specimens Jeanne fashioned her own fortune She observed and experimented on living animals in particular one very unusual shelled octopus called an argonaut To keep argonauts and other sea creatures alive long enough to learn from them she invented a device to hold them the aquarium With patience and persistence she solved the two thousand year old mystery of whether argonauts grow or steal their shells and she made sure the scientific world knew about it Author and octopus enthusiast Danna Staaf presents an engrossing look at the life and science of Jeanne Villepreux Power showing how this remarkable woman helped bring about a sea change in the study of marine life
