The Nature of Man Il'ia Il'ich Mechnikov, 1905      **The Nature of Man** Elie Metchnikoff, 1903      **Metchnikoff and the Origins of Immunology** Alfred I. Tauber, Leon Chernyak, 1991-07-25 This fascinating intellectual history is the first critical study of the work of Elie Metchnikoff the founding father of modern immunology Metchnikoff authored and championed the theory that phagocytic cells actively defend the host body against pathogens and diseased cells His program developed from comparative embryological studies that sought to establish genealogical relations between species at the dawn of the Darwinian revolution In this scientific biography Tauber and Chernyak explore Metchnikoff's development as an embryologist showing how it prepared him to propose his theory of host pathogen interaction They discuss the profound impact of Darwin's theory of evolution on Metchnikoff's progress and the influence of 19th century debates on vitalism teleology and mechanism As a case study of scientific discovery this work offers lucid insight into the process of creative science and its dependence on cultural and philosophic sources Immunologists and historians of science and medicine will find it an absorbing and accessible account of a remarkable individual      **Physiologic Autoimmunity and Preventive Medicine** Alexander B. Poletaev, 2013-06-03 The immune system is a natural component regulator and direct participant in the physiological activities in a healthy body A considerable number of immune functions including those related to antimicrobial defense derive from autoclearance as well as construction and support of multicellularity Various pathological processes in any organ are usually accompanied by different patterns of cell death and thus by increased exposure and presentation of self antigens These events induce the secondary rise in production of autoantibodies with appropriate specificity opsonins which provides augmentation of clearance by facilitating the efficacy of macrophage dependent consumption of debris in the affected organ Secondary changes in production and serum content of autoantibodies can be considered the universal and earliest detectable marker of any chronic disease Experimental and clinical production antibodies reveal antibodies against nuclear antigens which penetrate into living cell nuclei and alter nuclear acid synthesis cell proliferation and function Autoantibodies can thus be regarded as hormone like bioregulators of gene expression The immune system is apparently able to reproduce complementary regulators for various cell receptors including nuclear ones The book focuses on physiological autoimmunity models and delves into the relation between autoimmunity and autoallergy in the context of disease prevention and prediction The E book is a unique and comprehensive monograph and includes a history and contemporary research on natural autoimmunity a fundamental concept essential for many branches of medicine and pathology The concepts described in this e book also have broad practical implications for the healthcare sector because it establishes effective method of early prediction for many different diseases and creates a basis for prophylaxis The reference gives medical and clinical professionals a chance to revisit old dogmas and acquire fruitful perspectives for theoretical reasoning and research planning      Democracy in Contemporary Confucian Philosophy David Elstein, 2014-06-27

This book examines democracy in recent Chinese language philosophical work. It focuses on Confucian inspired political thought in the Chinese intellectual world from after the communist revolution in China until today. The volume analyzes six significant contemporary Confucian philosophers in China and Taiwan describing their political thought and how they connect their thought to Confucian tradition and critiques their political proposals and views. It illustrates how Confucianism has transformed in modern times the divergent understandings of Confucianism today and how contemporary Chinese philosophers understand democracy as well as their criticisms of Western political thought.
