Nature Of Meaningfulness Representing Powers And Meaning:

The Nature of Meaningfulness Robert K. Shope, 1999 Shope presents a unified perspective on meaningfulness spanning such varied topics as the meaningfulness of linguistic expressions and conventional signs Freud's conception of the meaningfulness of various mental phenomena and instances of behavior a person's meaning to do something meaning in the arts and even life's having a meaning Shope's perspective is based upon a constitutive analysis of what it is for one item to represent another Criticizing the views of philosophers who attempt to analyze such representing in causal terms or merely in epistemological terms he shows that a successful analysis needs to invoke both types of considerations

The Nature of Suffering and the Goals of Medicine Eric J. Cassell, 2004-03-25 This is a revised and expanded edition of a classic in palliative medicine originally published in 1991 With three added chapters and a new preface summarizing our progress in the area of pain management this is a must have for those in palliative medicine and hospice care The obligation of physicians to relieve human suffering stretches back into antiquity But what exactly is suffering One patient with metastatic cancer of the stomach from which he knew he would shortly die said he was not suffering Another someone who had been operated on for a minor problem in little pain and not seemingly distressed said that even coming into the hospital had been a source of pain and not suffering With such varied responses to the problem of suffering inevitable questions arise Is it the doctor's responsibility to treat the disease or the patient And what is the relationship between suffering and the goals of medicine According to Dr Eric Cassell these are crucial questions but unfortunately have remained only queries void of adequate solutions It is time for the sick person Cassell believes to be not merely an important concern for physicians but the central focus of medicine With this in mind Cassell argues for an understanding of what changes should be made in order to successfully treat the sick while alleviating suffering and how to actually go about making these changes with the methods and training techniques firmly rooted in the doctor's relationship with the patient Dr Cassell offers an incisive critique of the approach of modern medicine Drawing on a number of evocative patient narratives he writes that the goal of medicine must be to treat an individual's suffering and not just the disease In addition Cassell's thoughtful and incisive argument will appeal to psychologists and psychiatrists interested in the nature of pain and suffering

Realism and the Correspondence Theory of Truth Richard Fumerton, 2002-04-25 This book is a defense of realism about truth The author argues that the most plausible version of realism is a correspondence theory of Truth that takes thought as the primary bearer of truth value Furthermore after distinguishing realism about Truth from various sorts of metaphysical realisms the author suggests that one can embrace much of anti realist rhetoric from within the framework of a variety of plausible claims about the way in which minds do and must represent the world

The Oxford Handbook of Epistemology Paul K. Moser, 2005-10-27 The Oxford Handbook of Epistemology contains 19 previously unpublished chapters by today's leading figures in the field These chapters function not only as a survey of key areas but as original scholarship on a range of vital topics Written accessibly for advanced

undergraduates graduate students and professional philosophers the Handbook explains the main ideas and problems of contemporary epistemology while avoiding overly technical detail

Perspectives on the Philosophy of William P. Alston Heather D. Battaly, Michael P. Lynch, 2005-04-06 One of the most influential analytic philosophers of the late twentieth century William P Alston is a leading light in epistemology philosophy of religion and the philosophy of language In this volume twelve leading philosophers critically discuss the central topics of his work in these areas including perception epistemic circularity justification the problem of religious diversity and truth Together with Alston's vigorous responses these articles make significant new contributions to the literature and will be of interest to a wide range of philosophers and students In addition the volume contains a comprehensive introduction and overview of Alston's work and a complete bibliography of his publications

Resurrecting Old-fashioned Foundationalism Michael Raymond DePaul, 2001 The contributions in this volume make an important effort to resurrect a rather old-fashioned form of foundationalism They defend the position that there are some beliefs that are justified and are not themselves justified by any further beliefs This Epistemic foundationalism has been the subject of rigorous attack by a wide range of theorists in recent years leading to the impression that foundationalism is a thing of the past DePaul argues that it is precisely the volume and virulence of the assaults which points directly to the strength and coherence of the position

Handbook of Epistemology I. Niiniluoto, Matti Sintonen, Jan Wolenski, 2004-03-31 The twenty eight essays in this Handbook all by leading experts in the field provide the most extensive treatment of various epistemological problems supplemented by a historical account of this field The entries are self-contained and substantial contributions to topics such as the sources of knowledge and belief knowledge acquisition and truth and justification There are extensive essays on knowledge in specific fields the sciences mathematics the humanities and the social sciences religion and language Special attention is paid to current discussions on evolutionary epistemology relativism the relation between epistemology and cognitive science sociology of knowledge epistemic logic knowledge and art and feminist epistemology This collection is a must-have for anybody interested in human knowledge and its fortunes and misfortunes

Skepticism and the Veil of Perception Michael Huemer, 2001-07-17 This book develops and defends a version of direct realism the thesis that perception gives us direct awareness and non-inferential knowledge of the external world Huemer rebuts the main arguments used by philosophical skeptics to try to show that we cannot know anything about the world outside of the mind as well as the arguments used by representationalists to try to show that we only perceive representations of external objects

Knowledge, Belief, and Character Guy Axtell, 2000 There have been many books over the past decade including outstanding collections of essays on the topic of the ethical virtues and virtue theoretic approaches in ethics But the professional journals of philosophy have only recently seen a strong and growing interest in the intellectual virtues and in the development of virtue theoretic approaches in epistemology There have been four single-authored book-length treatments of issues of virtue epistemology over the last seven years beginning with

Ernest Sosa's *Knowledge in Perspective* Cambridge 1991 and extending to Linda Zabzebski's *Virtue of the Mind* Cambridge 1996 Weighing in with Jonathan Kvanvig's *The Intellectual Virtues and the Life of the Mind* 1992 and James Montmarquet's *Epistemic Virtue and Doxastic Responsibility* 1993 Rowman Littlefield has had a particularly strong interest in the direction and growth of the field To date there has been no collection of articles directly devoted to the growing debate over the possibility and potential of a virtue epistemology This volume exists in the belief that there is now a timely opportunity to gather together the best contributions of the influential authors working in this growing area of epistemological research and to create a collection of essays as a useful course text and research source Several of the articles included in the volume are previously unpublished Several essays discuss the range and general approach of virtue theory in comparison with other general accounts What advantages are supposed to accrue from a virtue based account in epistemology in handling well known problems such as Gettier and Evil Genie type problems Can reliabilist virtue epistemology handle skeptical challenges more satisfactorily than non virtue centered forms of epistemic reliabilism Others provide a needed discussion of relevant analogies and disanalogies between ethical and epistemic evaluation The readings all contribute

The Blackwell Guide to Philosophy of Mind Stephen P. Stich, Ted A. Warfield, 2008-04-15 Comprising a series of specially commissioned chapters by leading scholars this comprehensive volume presents an up to date survey of the central themes in the philosophy of mind It leads the reader through a broad range of topics including Artificial Intelligence Consciousness Dualism Emotions Folk Psychology Free Will Individualism Personal Identity and The Mind Body Problem Provides a state of the art overview of philosophy of mind Contains 16 newly commissioned articles all of which are written by internationally distinguished scholars Each chapter reviews a central issue examines the current state of the discipline with respect to the topic and discusses possible futures of the field Provides a solid foundation for further study

Reality and Humean Supervenience Gerhard Preyer, Frank Siebelt, 2002-07-15 If asked what Humeanism could mean today there is no other philosopher to turn to whose work covers such a wide range of topics from a unified Humean perspective as that of David Lewis The core of Lewis's many contributions to philosophy including his work in philosophical ontology intensional logic and semantics probability and decision theory topics within philosophy of science as well as a distinguished philosophy of mind can be understood as the development of philosophical position that is centered around his conception of Humean supervenience If we accept the thesis that it is physical science and not philosophical reasoning that will eventually arrive at the basic constituents of all matter pertaining to our world then Humean supervenience is the assumption that all truths about our world will supervene on the class of physical truths in the following sense There are no truths in any compartment of our world that cannot be accounted for in terms of differences and similarities among those properties and external space time relations that are fundamental to our world according to physical science

Themes from Klein Branden Fitelson, Rodrigo Borges, Cherie Braden, 2019-03-22 This volume features more than fifteen essays written in honor of Peter D Klein It explores the work and

legacy of this prominent philosopher who has had and continues to have a tremendous influence in the development of epistemology. The essays reflect the breadth and depth of Klein's work. They engage directly with his views and with the views of his interlocutors. In addition, a comprehensive introduction discusses the overall impact of Klein's philosophical work. It also explains how each of the essays in the book fits within that legacy. Coverage includes such topics as a knowledge-first account of defeasible reasoning, felicitous falsehoods, the possibility of foundationalist justification, the many formal faces of defeat, radical scepticism, and more. Overall, the book provides readers with an overview of Klein's contributions to epistemology, his importance to twentieth and twenty-first century philosophy, and a survey of his philosophical ideas and accomplishments. It's not only a celebration of the work of an important philosopher; it also offers readers an insightful journey into the nature of knowledge, scepticism, and justification.

Explaining Knowledge Rodrigo Borges, Claudio de Almeida, Peter D. Klein, 2017-12-01. The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years. Before Edmund Gettier published his famous 1963 paper, it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence. Gettier presented a powerful challenge to that presumption. This led to the development and refinement of many prominent epistemological theories, for example, defeasibility theories, causal theories, conclusive reasons theories, tracking theories, epistemic virtue theories, and knowledge-first theories. The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition. The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem. The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper, as are the debates between fallibilists and infallibilists. Indeed, it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge, even those accounts that hold that the Gettier Problem rests on mistakes of various sorts. This volume presents a collection of essays by twenty-six experts, including some of the most influential philosophers of our time, on the various issues that arise from Gettier's challenge to the analysis of knowledge. **Explaining Knowledge** sets the agenda for future work on the central problem of epistemology.

Ubuntu Marietjie Oelofsen, Upenyu Majee, Bongani Mgijima, Jamie Monson, 2024-08-20. *Ubuntu: Interdisciplinary Conversations Across Continents* is a collection of work by 17 scholars emerging from the Ubuntu Dialogues Seminar Exchange Fellowship hosted by Stellenbosch University in South Africa and Michigan State University in the US between 2019 and 2022. This collaborative work brings new voices and new ways of interrogating a concept that holds possibilities for living together differently. The contributions problematise the concept in provocative and surprising ways and disrupt narrow and superficial interpretations of Ubuntu. The contributors to this book foreground critical issues which are fundamental towards a deeper understanding of the notion of ubuntu. Dr Sithembele Marawu, University of Fort Hare.
