Nature Of Research Inquiry Into Academic Contexts:

The Nature of Research Angela Brew, 2002-11 What is wrong with research today This book argues that research priorities need to be reordered to address the concerns of today's society

The Nature of Research Angela Brew, 2002-11-01 Increasingly new academics are entering higher education without conventional research training and without a clear idea of what research actually involves This is particularly true of academics who enter from having spent time in a profession including many in the newer disciplines In addition institutions of higher education which do not have a tradition of research are increasingly competing for research funding The Nature of Research looks at this background and discusses what is wrong with academic research and discusses what is wrong with academic research today what needs to change for it to survive how to allow new kinds of research to flourish directions for future action and how academic research can teach us to live in today's complex and uncertain society The aim of the book then is to provide a stimulus to thinking about the nature and role of research with a view to considering what might be appropriate in the next century Since research is so central to university life looking at research will tell us much about what the university of the future might be like

Personal Transferable Skills in Accounting Education Kim Watty, Beverley Jackling, Richard M.S. Wilson, 2014-07-16 The development of generic skills often referred to as soft skills in accounting education has been a focus of discussion and debate for several decades During this time employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills In addition there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide knowledge professionals to meet the needs of a global business environment Personal Transferable Skills in Accounting Education illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational environments has been addressed The challenges involved in generic skills development in higher education have not been limited to the accounting discipline This book provides examples which potentially inform a wide range of discipline areas Academics will benefit from reading the experiences of incorporating generic skills in the accounting curriculum from across the globe This book was originally published as a themed issue of Accounting Education an international journal

Teach Truth to Power David R. Garcia, 2022-02-08 How academics and researchers can influence education policy putting research in a policy context finding unexpected allies interacting with politicians and more Scholarly books and journal articles routinely close with policy recommendations Yet these recommendations rarely reach politicians How can academics engage more effectively in the policy process In Teach Truth to Power David Garcia offers a how to guide for scholars and researchers who want to influence education policy

explaining strategies for putting research in a policy context getting in the room where policy happens finding unexpected allies interacting with politicians and more Countering conventional wisdom about research utilization also referred to as knowledge mobilization Garcia explains that engaging in education policy is not a science it is a craft a combination of acquired knowledge and intuition that must be learned through practice Engaging in policy is an interpersonal process academics who hope to influence policy have to get face to face with the politicians who create policy Garcia s experience as trusted insider researcher and political candidate make him uniquely qualified to offer a roadmap that connects research to policy He explains that academics can leverage their content expertise to build relationships with politicians even before they are politicians demonstrates the effectiveness of the research one pager and shows how academics can teach politicians to be champions of research

The Routledge International Handbook of Higher Education Malcolm Tight,Ka Ho Mok,Jeroen Huisman,Christopher Morphey,2009-06-03 This volume is a detailed and up to date reference work providing an authoritative overview of the main issues in higher education around the world today Consisting of newly commissioned chapters and impressive journal articles it surveys the state of the discipline and includes the examination and discussion of emerging controversial and cutting edge areas

The PhD at the End of the World Robyn Barnacle,Denise Cuthbert,2021-03-02 This book addresses a world wide audience with reference to a global problem how the PhD can serve the planet It examines the role of the PhD in and of itself and as representative of research the university and evidence based knowledge in relation to global crisis and the future of humanity As such it speaks to the scholar the teacher the policy maker and the administrator concerned with the role of higher education s highest award at a time of great global crisis The approach is critical in that it offers diverse views on these issues and does not seek to privilege one single school of thought The collected articles span theoretical reflections on key issues through to case study examples of how PhDs are being deployed and re thought to address global issues

Cultural Compatibility in Educational Contexts Kumi Kato,2010-02-23 Cultural Compatibility in Educational Contexts examines the mechanism of control and efficacy underlying specific cultural contexts intercultural value differences and consequential conflicts which invisibly and unintentionally cause communication difficulties and negative performances This specific study centers on Japanese language classrooms in Australia taught by native Japanese speakers Comparative studies were carried out in classrooms in both Japan and Australia and identified specific teaching strategies perceived to be effective in each cultural context The book concludes by asserting that the notion of culture in the educational context goes beyond ethnic and linguistic differences an awareness of cultural compatibility should be recognized as one of the professional responsibilities of all educators This is particularly relevant to multicultural societies such as Australia where both teaching and learning populations are increasingly diverse as well as being applicable to other social contexts

New Approaches to Qualitative Research Maggi Savin-Baden,Claire Howell Major,2010-04-08 Qualitative research has seen a surge of growth during the past decade This is in large part because positivist approaches

have not yielded the kinds of results that had been anticipated and more researchers are seeking alternative perspectives to understand phenomena. The number of researchers using qualitative approaches continues to grow yet there are few up to date guides to assist thinking broadly about qualitative research as a field of inquiry. Over the decades the range of approaches has increased which has led to an even greater lack of certainty about how to think about doing qualitative research. In considering key issues while offering practical guidance on how to work within the face of uncertainty this book will be a valuable resource to this next generation of researchers. *New Approaches to Qualitative Research* offers a clear understanding of the range of issues related to researcher stance the way that researchers position themselves in relation to their subjects their participants and their own belief systems and the way in which they locate themselves across the qualitative paradigm an overview of some of the most cutting edge qualitative techniques in use today from the exploration of visual texts to the concept of inquiry to synthesis methods this section lays out the state of the art in methodology specific information regarding processes of data analysis synthesis and interpretation that are employed in these various approaches. In this book the authors take the stance that qualitative research is a broad approach that encompasses and even encourages difference and uncertainty and here at last they provide a route map to this uncertain but fruitful line of inquiry. This vital text is ideal for professional researchers and postgraduates in a range of subject areas.

Academic Research and Researchers Angela Brew, Lisa Lucas, 2009-10-16

University research is of central political cultural and economic importance for nations and is currently the subject of considerable debate and discussion in universities worldwide. Research has become highly competitive though scarce resources. In recent years research policies and strategies at different levels have called into question researcher autonomy problematised academic freedom created new disciplinary hierarchies skewed publication rates and processes created powerful ways to measure research outputs and demanded new working habits. This book is concerned with how individual researchers experience and respond to this scenario. It brings together research and scholarship examining the socio political context of university research and explores how researchers' perceptions and identities are changed by political and cultural agendas for research. The book brings together the work of leading international scholars from different countries who have investigated theoretically and empirically the nature of research research cultures and academic researcher identities. It brings together work that has hitherto only been reported in isolated and esoteric contexts internationally thus consolidating the nature of research as an important field of study in its own right and providing important new understandings of how research is experienced in universities. A range of different theoretical positions taken by different authors is indicative of a lively and robust field of developing knowledge.

Global Citizenship Education in the Global South, 2022-10-31 This volume presents a critical discussion that brings contemporary academic debate about southern theory to Global Citizenship Education GCE It situates the discussion around GCE in the Global South within a critical and post colonial paradigm informed by the values and knowledge of critical pedagogy ingrained in social justice Global Citizenship Education in the Global South invites the reader into chapters written by educators exploring analysing and celebrating ideas and concepts on GCE in the Global South The book is presented as a pedagogical tool for discussion that invites educators to reflect critically on the possible origins and implications of GCE discourses they are exposed to The book is designed with the intent to contribute towards the possibility of imagining a yet to come critical transformative and post colonial and value creating GCE curriculum beyond a westernised market oriented and apolitical practices towards a more sustainable paradigm based on principles of mutuality and reciprocity

Music and Knowledge: A Performer's Perspective Per Dahl, 2019-02-18 FREELY AVAILABLE ONLINE AS OPEN ACCESS BOOK This book illustrates the acquisition of knowledge in a musician s performative practice and how this can contribute to the development of Artistic Research Using a broad understanding of knowledge the first part of the book presents aspects of the practitioner knowledge a musician develops through daily exercises and performances Technical and practical skills creativity and music reading are central topics Part II describes four different methodologies of knowledge accumulation First is the hypothetico deductive method music as object Then the author asks Where is the musical work After an introduction to semiotics the question that must follow is Is music a language Following up methodologies focusing on intersubjective and contextual topics the presentation of hermeneutics generates the question What happens to the music when you are listening Being the most subjective phenomenology is the last methodology to be presented The question it poses is Are analysis and interpretation two sides of the same coin Artistic research is a new perspective in knowledge acquisition and the performing artist is the pivot point The obvious insight positioning music beyond the score is elaborated into a critique of the representational theory as a relevant ontological discourse in music As an alternative the potential in embodied meaning theories is discussed through cognitive linguistic and artistic approaches Artistic expressions convey the subjective

practitioner knowledge based on the difference between the objective sign and the intersubjective expression This makes music as communication the ultimate topic In conclusion understanding the meaning construction and the conditions of artistic content are both of importance in artistic research **Encyclopedia of Case Study Research** Albert J.

Mills,Gabrielle Durepos,Elden Wiebe,2010 This is the authoritative reference work in the field An interdisciplinary set it investigates the extensive history design and methods of case study research Writing for Social Work Lucy

Rai,2021-02-03 Writing is an important skill not just for a social work degree but also as an integral part of practice Social workers need to be able to write effectively in a range of formats for different contexts Equipping students with guidance on both academic and assessed writing and writing in social work practice this book will use case studies and examples to develop their ability to plan and respond to the challenges of new and familiar writing tasks *Research and Inequality* Beth Humphries,Carole Truman,2020-10-07 It has been noted by researchers from a variety of backgrounds that the dominant social research paradigms have frequently failed to represent the viewpoints of many marginalized groups The authors of this collection confront this imbalance by looking at how issues such as ethnicity sexual orientation and identity disability gender and ethnicity and health and old age can be addressed in research conducted among groups who may often be the objects of research but who seldom have control over what is said about them Containing sections written by contributors from a variety of backgrounds cultures and nationalities the chapters explore ways in which issues of social diversity and division within the research process might be addressed While considering whether this might be done through an emancipatory research paradigm the book also examines the philosophical tenets and methodological implications of such an approach
