mobile operators within a wider business context via a broad ten year appraisal of the companies involved in the entire telecommunications media and technology TMT sector The issue as to whether there truly is such a thing as a global mobile operator is addressed the answer in practice is negative Based upon the very latest data available the underlying premise of the book is that mobile telecommunications is such a fast moving sector that operators are obliged to alter their international strategies as circumstances unravel without necessarily having a long term master plan and hence that opportunism is a hallmark of operators international strategies This state of the art overview of the internationalisation of mobile telecommunications will prove essential reading for academics and practitioners with a vested interest in technology telecommunications and strategic management
