Nature and Scripture in the Abrahamic Religions: Up to 1700 (2 vols) Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of *Nature and Scripture in the Abrahamic Religions* contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation Furthermore questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories

We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences Contributors are Peter Barker Paul M Blowers James J Bono Pamela Bright William E Carroll Kathleen M Crowther Maurice A Finocchiaro Carlos Fraenkel Miguel A Granada Peter Harrison Kenneth J Howell Eric Jorink Kerry V Magruder Scott Mandelbrote Charlotte Methuen Robert Morrison Richard J Oosterhoff Volker R Remmert T M Rudavsky Stephen D Snobelen Jitse M van der Meer and Rienk H Vermij

The Knowledge of Nature and the Nature of Knowledge in Early Modern Japan Federico

Marcon, 2015-07-16 Opens a fascinating window into the history of Japan's relationship to its natural environment A must read for historians of early modern science New Books in East Asian Studies Between the early seventeenth and the mid nineteenth century the field of natural history in Japan separated itself from the discipline of medicine produced knowledge that questioned the traditional religious and philosophical understandings of the world developed into a system called honzogaku that rivaled Western science in complexity and then seemingly disappeared Or did it In *The Knowledge of Nature and the Nature of Knowledge in Early Modern Japan* Federico Marcon recounts how Japanese scholars developed a sophisticated discipline of natural history analogous to Europe's but created independently without direct influence and argues convincingly that Japanese natural history succumbed to Western science not because of suppression and substitution as scholars traditionally have contended but by adaptation and transformation The first book length English language study devoted to the important field of honzogaku *The Knowledge of Nature and the Nature of Knowledge in Early Modern Japan* will be an essential text for historians of Japanese and East Asian science and a fascinating read for anyone interested in the development of science in the early modern era Marcon introduces to a Western readership for the first time the early history of natural history in Japan Who those naturalists were how they fitted into society and what they accomplished is Marcon's beautifully told story Archives of Natural History A bold attempt to provincialize Eurocentric narratives of modernity's relation to nature Canadian Journal of History An essential resource Journal of Japanese Studies

Knowledge, Information, and Business Education in the British Atlantic World, 1620–1760 Siobhan Talbott, 2025-02-10 Accurate information is essential to successful business activity The early modern period saw an increase in printed commercial information including newspapers printed exchange rates and educational texts part of the print revolution that permeated all aspects of the early modern world Rather than relying on externally produced printed works commercial agents retained agency in creating and sharing their own business and educational information which was shared in other forms and prioritised and valued over printed material This book explores the ways that merchants and other commercial agents learned about business in the early modern British Atlantic World It considers how they acquired dispersed stored and used information as well as considering their contribution to creating and shaping that information Prioritising a wide range of manuscript material held in disparate collections including merchants correspondence letter books notebooks family papers exercise

books and ships logs Talbott explores the ways that knowledge information and business education was created circulated and used in the early modern British Atlantic World It offers a new perspective on the exchange of business information in a period dominated by discussions of print prioritising manuscript and oral forms of exchange In doing so it presents a more holistic account of the ways that networks of knowledge operated in early modern business centralising the creation circulation and use of business information specifically by those individuals most involved in and most affected by its production

Forms, Formats and the Circulation of Knowledge Louisiane Ferlier, Benedicte Miyamoto, 2020-07-27

Forms *Formats and the Circulation of Knowledge* explores the printscape the mental mapping of knowledge in all its printed shapes to chart the British networks of publishers printers copyright holders readers and authors This transdisciplinary volume skilfully recovers innovations and practices in the book trade between 1688 and 1832 It investigates how print circulated information in a multitude of sizes and media through an evolving framework of transactions The authority of print is demonstrated by studies of prospectuses blank forms periodicals pamphlets globes games and ephemera uniquely gathered in eleven essays engaging in legal economic literary and historical methodologies The tight focus on material format reappraises a disorderly market accommodating a widening audience consumption

The Enclosure of Knowledge James D. Fisher, 2022-07-21

The rise of agrarian capitalism in Britain is usually told as a story about markets land and wages This study reveals that it was also about books knowledge and expertise challenging the dominant narrative of an agricultural enlightenment and showing how farming books appropriated traditional knowledge in pre industrial Britain

Recipes and Everyday Knowledge Elaine Leong, 2018-11-28

Across early modern Europe men and women from all ranks gathered medical culinary and food preservation recipes from family and friends experts and practitioners and a wide array of printed materials Recipes were tested assessed and modified by teams of householders including masters and servants husbands and wives mothers and daughters and fathers and sons This much sought know how was written into notebooks of various shapes and sizes forming treasuries for health each personalized to suit the whims and needs of individual communities In *Recipes and Everyday Knowledge* Elaine Leong situates recipe knowledge and practices among larger questions of gender and cultural history the history of the printed word and the history of science medicine and technology The production of recipes and recipe books she argues were at the heart of quotidian investigations of the natural world or household science She shows how English homes acted as vibrant spaces for knowledge making and transmission and explores how recipe trials allowed householders to gain deeper understandings of sickness and health of the human body and of natural and human built processes By recovering this story Leong extends the parameters of natural inquiry and productively widens the cast of historical characters participating in and contributing to early modern science

The Culture of Commerce in England, 1660-1720 Natasha Glaisyer, 2006

Late seventeenth and early eighteenth century England the period between the Restoration and the South Sea Bubble was dramatically transformed by the massive cost of fighting wars and significantly a

huge increase in the re export trade This book seeks to ask how commerce was legitimated promoted fashioned defined and understood in this period of spectacular commercial and financial revolution It examines the packaging and portrayal of commerce and of commercial knowledge positioning itself between studies of merchant culture on the one hand and of the commercialisation of society on the other It focuses on four main areas the Royal Exchange where the London trading community gathered sermons preached before mercantile audiences periodicals and newspapers concerned with trade and commercial didactic literature Dr NATASHA GLAISYER teaches in the Department of History at the University of York

Nature and the Godly Empire Sujit Sivasundaram,2005-11-17 A study of the relations between nineteenth century science and Christianity Movable Types David Finkelstein,2018-06-21 This is a study of international print networks developed across the English speaking world over a significant part of the long nineteenth century The first study of its kind it draws on unique sources from Australasia North America South Africa the British Isles and Ireland to explore how printers interacted and shared trade and cultural identities across international boundaries during the period 1830 1914 Morality mobility mobilisation and solidarity were central to how compositors and print trade workers defined themselves during this period These themes are addressed in case studies on roving printers striking printers and creative printers The case studies explore the cultural values and trade skills transmitted and embedded by such actors the global networks that enabled print workers to travel across continents in search of work and experience the trade actions reliant on mobilization and information sharing across the printing world and the creative ideas that printers shared through such means as memoirs poetry prose and trade news contributions to print trade journals and other public outlets **Fatal Revolutions**

Christopher P. Iannini,2013-03-12 Drawing on letters illustrations engravings and neglected manuscripts Christopher Iannini connects two dramatic transformations in the eighteenth century Atlantic world the emergence and growth of the Caribbean plantation system and the rise of natural science Iannini argues that these transformations were not only deeply interconnected but that together they established conditions fundamental to the development of a distinctive literary culture in the early Americas In fact eighteenth century natural history as a literary genre largely took its shape from its practice in the Caribbean an oft studied region that was a prime source of wealth for all of Europe and the Americas The formal evolution of colonial prose narrative Ianinni argues was contingent upon the emergence of natural history writing which itself emerged necessarily from within the context of Atlantic slavery and the production of tropical commodities As he reestablishes the history of cultural exchange between the Caribbean and North America Ianinni recovers the importance of the West Indies in the formation of American literary and intellectual culture as well as its place in assessing the moral implications of colonial slavery Science in Print Rima D. Apple,Gregory J. Downey,Stephen L. Vaughn,2012-09-25 Ever since the threads of seventeenth century natural philosophy began to coalesce into an understanding of the natural world printed artifacts such as laboratory notebooks research journals college textbooks and popular paperbacks have been

instrumental to the development of what we think of today as science But just as the history of science involves more than recording discoveries so too does the study of print culture extend beyond the mere cataloguing of books In both disciplines researchers attempt to comprehend how social structures of power reputation and meaning permeate both the written record and the intellectual scaffolding through which scientific debate takes place Science in Print brings together scholars from the fields of print culture environmental history science and technology studies medical history and library and information studies This ambitious volume paints a rich picture of those tools and techniques of printing publishing and reading that shaped the ideas and practices that grew into modern science from the days of the Royal Society of London in the late 1600s to the beginning of the modern U S environmental movement in the early 1960s **The Broadview Reader**

in Book History Michelle Levy, Tom Mole, 2014-10-23 Book History has emerged as one of the most exciting new interdisciplinary fields of study in the humanities By focusing on the production circulation and reception of the book in all its forms it has transformed the study of history literature and culture The Broadview Book History Reader is the most complete and up to date introduction available to this area of study The reader reprints 33 key essays in the field grouped conceptually and provided with headnotes explanatory footnotes an introduction a chronology and a glossary of terms **Sociable**

Knowledge Elizabeth Yale, 2016-02-02 Sociable Knowledge reconstructs the collaborations of seventeenth century naturalists who dispersed across city and country worked through writing conversation and print to convert fragmented knowledge of the hyper local and curious into an understanding and representation of Britain as a unified historical and geographical space **Everyday Nature: Knowledge of the Natural World in Colonial New York**, 2007 In Everyday Nature Sara Gronim shows how scientific advances were received in the early modern world from the time Europeans settled in America until just before the American Revolution Settlers approached a wide range of innovations such as smallpox inoculation maps and surveys Copernican cosmology and Ben Franklin s experiments with electricity with great skepticism New Yorkers in particular were distrustful because of the chronic political and religious factionalism in the colony Those discoveries that could be easily reconciled with existing beliefs about healing the sick agricultural practices and the revolution of the planets were more readily embraced *Handbook of Nature-study for Teachers and Parents* Anna Botsford Comstock, 1922 Provides lessons on many topics of nature study with questions that may form the basis for student projects

Instituting Nature Andrew S. Mathews, 2011 A study of how encounters between forestry bureaucrats and indigenous forest managers in Mexico produced official knowledge about forests and the state **History of Technology Volume 29**

Ian Inkster, 2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of

Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather educated gents practitioners instrument makers craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental commercial and cognitive resources required to pursue innovative production projects
