## **Nature And Nationalism:**

*Nature and Nationalism* Jonathan Olsen, 2024-12-02 In this new edition of his now classic 1999 book Jonathan Olsen explores the relationship between the far right and the environment or what he terms right wing ecology Arguing that radical environmentalism is not exclusively a domain of the left Olsen shows how many of Germany s far right parties and groups ground their ecological ideology in an anti universalist anthropology which sees human beings as naturally rooted in specific nations and cultural traditions Pollution in this discourse signifies not only the disruption of the natural world but the social world as well thus providing an environmental justification for an anti immigrant politics which finds resonance outside the specific milieu of the far right A rigorously theoretical book *Nature and Nationalism* challenges our understanding of the deeply ambiguous ways in which nature functions to legitimate a wide variety of political ideas Jonathan Olsen is Professor and Chair of the Department of Social Sciences and Historical Studies at Texas Woman s University USA [Nature and Nationalism](#)

Jonathan Olsen, 1999 Across Europe parties of the radical Right are moving environmental themes to the centre of their political programmes Perhaps nowhere is this phenomenon more visible than among Germany s numerous far Right parties and groups Jonathan Olsen explores the right wing ecology in Germany its ideological underpinnings historical evolution and relationship to more mainstream political environmental discourse Arguing that radical environmentalism is not exclusively a domain of the left Olsen shows how many of Germany s radical Right parties ground their environmental ideology in an anti universalist anthropology which sees human beings as naturally rooted on specific nations and cultural traditions Pollution in this discourse signifies not only the disruption of the natural world but the social as well thus providing an environmental justification for an anti immigrant politics which finds resonance outside the specific milieu of the far Right

*Nature and Nationalism* Bianca Apostol, 2016 This thesis has aimed to bring together several case studies from the field of art and through content analysis discover whether or not specific interpretations of nature the natural world ecology environment etc have an influence over the politics more exactly whether or not these narratives reinforce nationalism and national identities [The Nature of Nationalism](#) Hans Kohn, 1939 **A Grammar of Politics** Harold Joseph Laski, 1925

**Managing Visitor Experiences in Nature-based Tourism** Julia N. Albrecht, 2021-03-19 This book focuses on the experiences of tourists visiting nature based destinations exploring current knowledge and providing insights into conceptual issues through the use of empirical evidence from five continents Presented as three topics the contents discuss tourism and naturebased experiences by looking at the role and relevance of nature and the uniqueness of such experiences The book identifies visitor management challenges and provides explanations for the solutions reached The final section takes a more overarching destination management perspective that transcends the tourism product or business level and focuses on destination and generic issues like indicators or marketing implications The book also includes research based case studies which contribute to an overall understanding of the core issues involved in managing visitor experiences in nature based

tourism      **Nationalism and Internationalism** Ramsay Muir,1918      Nationalism and Internationalism in the Post-Cold War Era Kjell Goldmann,Ulf Hannerz,Charles Westin,2012-12-06 The tension between nationalism and internationalism has been a major feature of world politics since the end of the Cold War Based on a Nobel symposium this collection brings together an international selection of acclaimed authors from a wide variety of academic disciplines The book combines focused case studies and more theoretically based material to examine critically the post Cold War political landscape Subjects covered include changing interpretation of the nation state and nationalism the growing prominence of transnational organisations technological changes in information communication and transport multiculturalism and citizenship ethnicity and religious identity in African Indian Bosnian and Polish nationalism the growing global significance of Islam      **Mediating Nature** Nils Lindahl Elliot,2013-04-15 Mediating Nature provides a history of the present nature of mass mediation It examines the ways in which a number of discourses technologies and institutions have historically shaped the current ways of imagining nature in the mass media Where much of the existing research treats mass mediation as a matter of media technologies texts or institutions this text adopts a somewhat different approach it considers mass mediation as a historical process by means of which the members of audiences and indeed the public more generally came to be incorporated as observers in and of mass culture This approach allows the book to investigate the roles that a wide range of genres relating to nature played in constructing senses of nature but also of mass culture itself The genres include landscape paintings and gardens modern zoos photography early cinema nature essays disaster and animal attack films as well as wildlife documentaries on television The investigation develops what Lindahl Elliot describes as a social semeiotic approach that combines the semeiotic theory of Charles Peirce with a historical sociology of cultural formations Topical and timely this fascinating book will be of great interest to students and researchers in the fields of media sociology cultural geography and environmental studies      **Nationalism** Eugene Kamenka,1976      **Ecological Nationalisms** Gunnel Cederlöf,K. Sivaramakrishnan,2006 The works presented in this collection take environmental scholarship in South Asia into novel territory by exploring how questions of national identity become entangled with environmental concerns in Bangladesh Nepal Pakistan and India The essays provide insight into the motivations of colonial and national governments in controlling or managing nature and bring into fresh perspective the different kinds of regional political conflicts that invoke nationalist sentiment through claims on nature In doing all this the volume also offers new ways to think about nationalism and more specifically nationalism in South Asia from the vantage point of interdisciplinary environmental studies The contributors to this innovative volume show that manifestations of nationalism have long and complex histories in South Asia Terrestrial entities imagined in terms of dense ecological networks of relationships have often been the space or reference point for national aspirations as shared memories of Mother Nature or appropriated economic political and religious geographies In recent times different groups in South Asia have claimed and appropriated ancient landscapes and territories for the purpose

of locating and justifying a specific and utopian version of nation by linking its origin to their nature mediated attachments to these landscapes The topics covered include forests agriculture marine fisheries parks sacred landscapes property rights trade and economic development Gunnel Cederlofis associate professor of history Uppsala University Sweden K Sivaramakrishnanis professor of anthropology and international studies and director of the South Asia Center Jackson School of International Studies at the University of Washington The other contributors are Nina Bhatt Vinita Damodaran Claude A Garcia Urs Geiser G tz Hoeppe Bengt G Karlsson Antje Linkenbach Wolfgang Mey Kathleen D Morrison J P Pascal and Sarah Southwold Llewellyn Ecological Nationalisms is an unusually coherent anthology focused on the complex intersections among identity ethnicity political economy and ecology in South Asia An important resource for a broad interdisciplinary audience in the social sciences Ann Grodzins Gold Syracuse University

**Nordic Perspectives on Nature-based Tourism** Peter Fredman, 2021-02-26 Nature based tourism NBT is a sector where entrepreneurial success is highly knowledge driven This insightful book offers a comprehensive evaluation of NBT in a Nordic context highlighting how long established Nordic traditions of outdoor recreation practices can reveal lessons for the field more broadly Chapters explore Nordic and international perspectives local communities market dynamics firms creativity innovations and value added experience products

"Gypsies" in European Literature and Culture V. Glajar, D. Radulescu, 2008-04-28 This book traces representations of Gypsies that have become prevalent in the European imagination and culture and influenced the perceptions of Roma in Eastern and Western European societies

*Nature's Man* Maurizio Valsania, 2013 Although scholars have adequately covered Thomas Jefferson s general ideas about human nature and race this is the first book to examine what Maurizio Valsania terms Jefferson s philosophical anthropology philosophical in the sense that he concerned himself not with describing how humans are culturally or otherwise but with the kind of human being Jefferson thought he was wanted to become and wished for citizens to be for the future of the United States Valsania s exploration of this philosophical anthropology touches on Jefferson s concepts of nationalism slavery gender roles modernity affiliation and community More than that *Nature's Man* shows how Jefferson could advocate equality and yet control and own other human beings A humanist who asserted the right of all people to personal fulfillment Jefferson nevertheless had a complex philosophy that also acknowledged the dynamism of nature and the limits of human imagination Despite Jefferson s famous advocacy of apparently individualistic rights to life liberty and the pursuit of happiness Valsania argues that both Jefferson s yearning for the human individual to become something good and his fear that this hypothetical being would turn into something bad were rooted in a specific form of communitarianism Absorbing and responding to certain moral philosophical currents in Europe Jefferson s nature infused vision underscored the connection between the individual and the community

**Natural Theology Versus Theology of Nature?/ Natürliche Theologie versus Theologie der Natur?** Gert Hummel, 2015-07-01 No detailed description available for Natural Theology Versus Theology of Nature Nat rliche Theologie versus Theologie der

Natur     The Broken Olive Branch: Nationalism, Ethnic Conflict, and the Quest for Peace in Cyprus Harry Anastasiou, 2008-12-05 At the forefront of its field The Broken Olive Branch examines the dynamics of ethnonationalism in Cyprus a country torn in two by decades long struggles fueled by ethnic rivalry Harry Anastasiou s analysis of Cyprus s historic conflict through the lens of conflict analysis and resolution traces the division of Greek and Turkish Cypriots since the country s independence from British rule and mediation in 1960 In the first of two volumes Anastasiou offers a detailed portrait of Cyprus s dual nationalisms identifying the ways in which the ideologies undermined the relations between Greek and Turkish Cypriots The author demonstrates how the ethnic rivalry was largely engineered by the leaders of each community Taking a multilevel approach he maps out the changes in ethnonationalism over time tracing the impact of political leadership and international relations     **Readers' Guide to Periodical Literature** ,1920     *Nationalism vs. Nature* Bruce E. Johansen, 2023-09-01 Developing an original approach this book examines how both nationalism and climate change threaten humankind with future catastrophes arguing that humanity is on a fast track to a dystopian future unless significant changes are implemented While the world warms wars driven by nationalism may lead to worldwide devastation with humankind being caught between two existential threats of its own creation The author explains how both nationalism and climate change originate from human ingenuity and can only be answered by human cooperation While in a perfect world such problems already would have been solved by the United Nations this isn t the case in reality The book discusses how humanity s many peoples can cooperate to a degree necessary to retain mutual respect without war in the interest of achieving long term change which will use technology for mutual good also dodging the bullet of climate change Offering an outlook into a possible better world the author also analyzes the massive changes required for everyone to face discuss and solve the problems at hand The book will appeal to students scholars and researchers of political science international relations and environmental sciences as well as practitioners and a general audience interested in the study of nationalism diplomacy wars and climate change     **Reader's Guide to Periodical Literature Supplement** ,1923     **British Politics and the Environment in the Long Nineteenth Century** Peter Hough, 2023-09-29 This volume of archival source material chronicles British environmental politics between 1789 and 1914 This text examines scientific discoveries during this period and the result of these findings on the political environment bringing the public s attention to public health issues such as acid rain and river pollution Accompanied by extensive editorial commentary this collection will be of great interest to students of environmental and political history
