Oele,2017-10-04 This volume contains essays that offer both historical and contemporary views of nature as seen through a hermeneutic deconstructive and phenomenological lens It reaches back to Ancient Greek conceptions of physis in Homer and Empedocles encompasses 13th century Zen master D gen and extends to include 21st Century Continental Thought By providing ontologies of nature from the perspective of the history of philosophy and of contemporary philosophy alike the book shows that such perspectives need to be seen in dialogue with each other in order to offer a deeper and more comprehensive philosophy of nature The value of the historical accounts discussed lies in discerning the conceptual problems that contribute to the dominant thinking underpinning our ecological predicament as well as in providing helpful resources for thinking innovatively through current problems thus recasting the past to allow for a future yet to be imagined The book also discusses contemporary continental thinkers who are more critically aware of the dominant anthropocentric and instrumental view of nature and who provide substantial guidance for a sensible innovative ontology of nature suited for an ecology of the future Overall the ontologies of nature discerned in this volume are not merely of theoretical interest but strategically serve to suspend anthropocentrism and spark ethical and political reorientation in the context of our current ecological predicament
