Nature's Altars Susan R. Schrepfer, 2005 Book Review *On Zion's Mount* Jared Farmer, 2010-04-10 Shrouded in the lore of legendary Indians Mt Timpanogos beckons the urban populace of Utah And yet no Indian legend graced the mount until Mormon settlers conjured it once they had displaced the local Indians the Utes from their actual landmark Utah Lake On Zion's Mount tells the story of this curious shift It is a quintessentially American story about the fraught process of making oneself native in a strange land But it is also a complex tale of how cultures confer meaning on the environment how they create homelands Only in Utah did Euro American settlers conceive of having a homeland in the Native American sense an endemic spiritual geography They called it Zion Mormonism a religion indigenous to the United States originally embraced Indians as Lamanites or spiritual kin On Zion's Mount shows how paradoxically the Mormons created their homeland at the expense of the local Indians and how they expressed their sense of belonging by investing Timpanogos with Indian meaning This same pattern was repeated across the United States Jared Farmer reveals how settlers and their descendants the new natives bestowed Indian place names and recited pseudo Indian legends about those places cultural acts that still affect the way we think about American Indians and American landscapes *The American Environment Revisited* Geoffrey L. Shopping All the Way to the Woods Rachel S. Gross, 2024-03-26 A fascinating history of the profitable paradox of the American outdoor experience visiting nature first requires shopping No escape to nature is complete without a trip to an outdoor recreational store or a browse through online offerings This is the irony of the American outdoor experience visiting

wild spaces supposedly untouched by capitalism first requires shopping. With consumers spending billions of dollars on clothing and equipment each year as they seek out nature, the American outdoor sector grew over the past 150 years from a small collection of outfitters to an industry contributing more than 2 percent of the nation's economic output. Rachel S. Gross argues that this success was predicated not just on creating functional equipment but also on selling an authentic anticommercial outdoor identity. In other words, shopping for the woods was also about being or becoming the right kind of person. Demonstrating that outdoor culture is commercial culture, Gross examines Americans' journey toward outdoor expertise by tracing the development of the nascent outdoor goods industry, the influence of World War II on its growth and the boom years of outdoor businesses.

Proving Ground Edward Slavishak, 2018-06-01. Disrupting the intervenor narrative in Appalachian studies. The Appalachian Mountains attracted an endless stream of visitors in the twentieth century, each bearing visions of what they would encounter. Well before large numbers of tourists took to the mountains in the latter half of the century, however, networks of missionaries, sociologists, folklorists, doctors, artists, and conservationists made Appalachia their primary site for fieldwork. In *Proving Ground*, Edward Slavishak studies several of these interlopers to show that the travelers' tales were the foundation of powerful forms of insider knowledge. Following four individuals and one cohort as they climbed professional ladders via the Appalachian Mountains, Slavishak argues that these visitors represented occupational and recreational groups that used Appalachia to gain precious expertise. Time spent in the mountains in the guise of work or play that mimicked work distinguished travelers as master problem solvers and transformed Appalachia into a proving ground for preservationists, planners, hikers, anthropologists, and photographers. Based on archival materials from outdoors clubs, trade journals, field notes, correspondence, National Park Service records, civic promotional materials, and photographs, *Proving Ground* presents mountain landscapes as a fluid combination of embodied sensation, narrative, fantasy, and class privilege. Touching on critical regionalism and mobility studies, this book is a boundary pushing cultural history of expertise, an environmental history of the Appalachian Mountains, and a historical geography of spaces and places in the twentieth century.

[The Oxford Handbook of Environmental History](#) Andrew C. Isenberg, 2017. The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field. *U.S. Environmentalism since 1945* NA, 2016-09-23. By the end of World War II, Americans' relationship with nature had changed dramatically. New consumption patterns drove an industrial economy that damaged the earth in new ways, and the atomic age heightened awareness of the earth's fragility. Environmental historian Steven Stoll identifies 1945 as the birth of American environmentalism, the point when conservation and nature advocacy fused with activism to form a political movement. In this thematically organized collection of primary sources, Stoll traces the development of the environmental movement and identifies its central issues and ideologies, including the politics of preservation, population growth, biological interdependence, ecodefense, climate change, ethical consumption, and environmental justice. Stoll's insightful introduction provides students

America for over a century In *The Maximum of Wilderness* Kelly Enright traces the representation of tropical forests what Americans have typically thought of as jungles and their place in both our perception of wildness and the globalization of the environmental movement In the early twentieth century jungle adventure as depicted by countless books and films from Burroughs's Tarzan novels to King Kong had enormous mass appeal Concurrent with the proliferation of a popular image of the jungle that masked many of its truths was the work of American naturalists who sought to represent an authentic view of tropical nature through museums zoological and botanical gardens books and film Enright examines the relationship between popular and scientific representations of the forest through the lives and work of Martin and Osa Johnson who with films such as *Congorilla* and *Simba* blended authenticity with adventure as well as renowned naturalists John Muir William Beebe David Fairchild and Richard Evans Schultes The author goes on to explore a startling shift at midcentury in the perception of the tropical forest from the jungle a place that endangers human life to the rain forest a place that is itself endangered
