The Geomantic Year Richard Leviton,2006-11 The spiritual world blesses the Earth at least 58 times a year here s how you can join the party Do you think folklore customs about solstices and equinoxes and other regular celebration days are quaint holdovers from the past Not so Do you sometimes wish there were a way to include the entire planet in a meditation practice There is and it s called the geomantic year At least 58 times a year the spiritual world angels archangels Ascended Masters Star Angels even the Supreme Being tunes in to the Earth blesses and even heals it in real time day long events Our planet is constantly receiving input from the cosmos and heavenly realms

It is all part of a rhythmic maintenance calendar in which the Earth is enlivened and all of humanity is invited to participate. This book shows you how. What kinds of events? On Epiphany January 6 the Christ focuses on the planet to birth his Light. On Bifrost Paints the Planet April 10 the Great Bear constellation envelopes the Earth in 14 rays of light. On Michaelmas September 29 the Archangel Michael cleanses the Earth's sacred sites and all their plumbing. Other events in the geomantic year involve stars, Nature Spirits, holy mountains, River gods, Pleiadians, Hollow Earth dwellers, Grail Kings, volcano spirits, the Great Mother and much more. The Geomantic Year documents 58 festival dates that focus on the Earth through its sacred sites and it provides 58 simple meditations to help you participate. And it offers 12 informative essays linking Earth energies with hot topics such as the Illuminati and world control, parallel universes, the world's gold supply, the Ghost Dance, the Fall of Man, Earth and climate changes and the apocalyptic year 2012. Why not get out your appointment book and pencil in a few dates the Earth's expecting you.

The Seasons Nick Groom, 2014-06-01. For millennia the passing seasons and their rhythms have marked our progress through the year. But what do they mean to us now that we lead increasingly atomized and urban lives and our weather becomes ever more unpredictable or extreme? Will it matter if we no longer hear even notice the first cuckoo call of spring or rejoice in the mellow fruits of harvest festival? How much will we lose if we can no longer find either refuge or reassurance in the greater natural and meteorological scheme of things? Nick Groom's splendidly rich and encyclopedic book is an unabashed celebration of the English seasons and the trove of strange folklore and often stranger fact they have accumulated over the centuries. Each season and its particular history are given their full due and these chapters are interwoven with others on the calendar and how the year and months have come to be measured on important dates and festivals such as Easter, May Day and of course Christmas on that defining first cuckoo call on national attitudes to weather, our seasonal relationship with the land and horticulture and much more. The author expresses the hope that his book will not prove an elegy only time will tell.
