Natures Work Of Art The Human Body As Image Of The World:

Nature's Work of Art Leonard Barkan, 1975 **Humoring the Body** Gail Kern Paster, 2010-11-15 Though modern readers no longer believe in the four humors of Galenic naturalism blood choler melancholy and phlegm early modern thought found in these bodily fluids key to explaining human emotions and behavior In *Humoring the Body* Gail Kern Paster proposes a new way to read the emotions of the early modern stage so that contemporary readers may recover some of the historical particularity in early modern expressions of emotional self experience Using notions drawn from humoral medical theory to untangle passages from important moral treatises medical texts natural histories and major plays of Shakespeare and his contemporaries Paster identifies a historical phenomenology in the language of affect by reconciling the significance of the four humors as the language of embodied emotion She urges modern readers to resist the influence of post Cartesian abstraction and the disembodiment of human psychology lest they miss the body mind connection that still existed for Shakespeare and his contemporaries and constrained them to think differently about how their emotions were embodied in a premodern world **The Body of Nature and Culture** R. Giblett, 2008-10-14 This book explores the relationship of human bodies with natural and cultural environments arguing that these categories are linked and intertwined It argues for an environmentally sustainable and healthy relationship between the body and the earth **The Norton History of the Human Sciences** Roger Smith, 1997 Beginning with the Renaissance s rediscovery of Greek psychology political philosophy and ethics author Roger Smith recounts how the human sciences gradually organized themselves around a scientific conception of psychology and how this trend has continued to the present day in a circle of interactions between science and ordinary life influencing and influenced by popular culture Photos drawings **Negotiating the French Pox in Early Modern Germany** Claudia Stein, 2009 Combining medical religious economic municipal and institutional history this book offers a fascinating insight into how early modern society came to terms with disease both in a practical and theoretical sense This revised English translation of Dr Stein s original German book adds new layers of understanding to a fascinating but complex subject BOOK JACKET *The Feminine Reclaimed* Stevie Davies, 1986-01-10 *The Feminine Reclaimed* breaks new ground in the field of Renaissance scholarship Stevie Davies considers the feminine principle as it was developed through the humanist and Neoplatonic revival of ancient classical learning and from this perspective approaches the major works of the three great literary figures of the English Renaissance Spenser Shakespeare and Milton Through close perceptive readings of their most crucial works informed by a familiarity with the whole range of their context in the European literature and thought of their time Stevie Davies is able to demonstrate the great importance of the feminine principle in the consciousness of these writers and their age a time of political religious and social upheaval in which perceptions of woman and her status in society underwent momentous changes She analyzes guiding symbols mythical allusions and literary structures in major works by the three poets to show that this rediscovered image of the feminine was

incorporated into The Faerie Queene Shakespeare's last plays and Paradise Lost in such a manner as to create an alternative system of values which either redefined or criticized the patriarchal structures of the contemporary world **Christ's Body**

Sarah Beckwith, 2005-08-04 Through her fascinating series of readings of texts such as The Book of Margery Kempe

Beckwith develops a materialist analysis of religious texts showing the vital cultural work they do **The Imprint of**

Gender Wendy Wall, 1993 What did it mean to be published at the end of the sixteenth century While in polite circles

gentlemen exchanged handwritten letters published authors risked association with the low born masses Examining a wide

range of published material including sonnets pageants prefaces narrative poems and title pages Wendy Wall considers how

the idea of authorship was shaped by the complex social controversies generated by publication during the English

Renaissance **Shakespeare's Theatre** Hugh Macrae Richmond, 2004-01-01 Under an alphabetical list of relevant terms

names and concepts the book reviews current knowledge of the character and operation of theatres in Shakespeare's time

with an explanation of their origins **Literature and the Politics of Family in Seventeenth-Century England** Su Fang

Ng, 2007-01-25 A common literary language linked royal absolutism to radical religion and republicanism in seventeenth

century England Authors from both sides of the Civil Wars including Milton Hobbes Margaret Cavendish and the Quakers

adapted the analogy between family and state to support radically different visions of political community They used family

metaphors to debate the limits of political authority rethink gender roles and imagine community in a period of social and

political upheaval While critical attention has focused on how the common analogy linking father and king family and state

bolstered royal and paternal claims to authority and obedience its meaning was in fact intensely contested In this wide

ranging study Su Fang Ng analyses the language and metaphors used to describe the relationship between politics and the

family in both literary and political writings and offers a fresh perspective on how seventeenth century literature reflected as

well as influenced political thought **Doctors, Politics and Society: Historical Essays**, 2020-01-29 The great British

reformer Jeremy Bentham wrote that the art of legislation is but the art of healing practised upon a large scale He added that

It is the common endeavour of both to relieve men from the miseries of life But the physician relieves them one by one the

legislator by millions at a time Bentham raised the question of the interplay of medicine with politics It forms an important

topic with powerful contemporary overtones This volume containing eleven essays plus a lengthy introduction seeks to

explore it historically It takes a long perspective covering the last two centuries and also an international viewpoint

examining Britain in detail but also containing contributions dealing with the United States Germany Russia and France

The Face of Mammon David Landreth, 2012-04-19 Money talked in sixteenth century England as money still does today

But what the sixteenth century's gold and silver had to say for itself is strikingly different from the modern discourse of

money As David Landreth demonstrates in The Face of Mammon the material and historical differences between the coins of

the English Renaissance and today's paper and electronic money propel a distinctive and complex assessment of the relation

between material substance and human value Although the sixteenth century was marked by the traumatic emergence of conditions that would prove to be characteristic of the modern economy the discipline of economics had not been invented to assess those conditions The Face of Mammon considers how literary texts investigated these unexplained material transformations through attention to the materiality of gold and silver money In new readings of Spenser's Faerie Queene Marlowe's Jew of Malta three plays by Shakespeare King John The Merchant of Venice and Measure for Measure the poetry of John Donne and the prose of Thomas Nashe Landreth argues that these texts situate the act of exchange at the center of a system of common wealth that sought to integrate political ethical and religious values with material ones and probe the ways in which market value corrodes that system even as it depends upon it Joining the methods of material culture studies to those of economic criticism The Face of Mammon offers a new account of the historical transformations of the concept of value to scholars of early modern literature culture and art as well as to those interested in economic history *The Revival of Antique Philosophy in the Renaissance* John L. Lepage, 2012-12-05 This book examines the revival of antique philosophy in the Renaissance as a literary preoccupation informed by wit Humanists were more inspired by the fictionalized characters of certain wise fools including Diogenes the Cynic Socrates Aesop Democritus and Heraclitus than by codified systems of thought Rich in detail this study offers a systematic treatment of wide ranging Renaissance imagery and metaphors and presents a detailed iconography of certain classical philosophers Ultimately the problems of Renaissance humanism are revealed to reflect the concerns of humanists in the twenty first century *Social Thought in England, 1480-1730 A.L.* Beier, 2016-02-05 Authorities ranging from philosophers to politicians nowadays question the existence of concepts of society whether in the present or the past This book argues that social concepts most definitely existed in late medieval and early modern England laying the foundations for modern models of society The book analyzes social paradigms and how they changed in the period A pervasive medieval model was the body social which imagined a society of three estates the clergy the nobility and the commonalty conjoined by interdependent functions arranged in static hierarchies based upon birth and rejecting wealth and championing poverty Another model the book describes as social humanist that fundamentally questioned the body social advancing merit over birth mobility over stasis and wealth over poverty The theory of the body social was vigorously articulated between the 1480s and the 1550s Parts of the old metaphor actually survived beyond 1550 but alternative models of social humanist thought challenged the body concept in the period advancing a novel paradigm of merit mobility and wealth The book's methodology focuses on the intellectual context of a variety of contemporary texts

The Anthropomorphic Lens Walter Melion, Bret Rothstein, Michel Weemans, 2014-11-06 Anthropomorphism the projection of the human form onto the every aspect of the world closely relates to early modern notions of analogy and microcosm What had been construed in Antiquity as a ready metaphor for the order of creation was reworked into a complex system relating the human body to the body of the world Numerous books and images cosmological diagrams illustrated

treatises of botany and zoology maps alphabets collections of ornaments architectural essays are entirely constructed on the anthropomorphic analogy Exploring the complexities inherent in such work the interdisciplinary essays in this volume address how the anthropomorphic model is fraught with contradictions and tensions between magical and rational speculative and practical thought Contributors include Pamela Brekka Anne Laure van Bruaene Ralph Dekoninck Agn s Guiderdoni Christopher P Heuer Sarah Kyle Walter S Melion Christina Normore Elizabeth Petcu Bertrand Prevost Bret Rothstein Paul Smith Miya Tokumitsu Michel Weemans and Elke Werner

Memories of War in Early Modern England Susan Harlan, 2016-09-23 This book examines literary depictions of the construction and destruction of the armored male body in combat in relation to early modern English understandings of the past Bringing together the fields of material culture and militarism Susan Harlan argues that the notion of spoiling or the sanctioned theft of the arms and armor of the vanquished in battle provides a way of thinking about England s relationship to its violent cultural inheritance She demonstrates how writers reconstituted the spoils of antiquity and the Middle Ages in an imagined military struggle between male bodies An analysis of scenes of arming and disarming across texts by Christopher

Marlowe and William Shakespeare and tributes to Sir Philip Sidney reveals a pervasive militant nostalgia a cultural fascination with moribund models and technologies of war Readers will not only gain a better understanding of humanism but also a new way of thinking about violence and cultural production in Renaissance England
